PLANS ARE COMPLETE FOR P-P. H. S. MEET

HUNDREDS ARE EXPECTED TO GATHER HERE TOMORROW

Special Service Planned to Honor the Memory of Col. Goodnight and Mr. Turner.

The scene is all set for the best meeting of the Panhandle-Plains Historical society since the founding of that organization, in its annual meeting here tomorrow. Old-timers and others interested in the work of the organization will be here from every section of the Panhandle to attend the sessions.

However, a note of sadness will linger over the body as it convenes tomorrow at 11 o'clock, as two strong and faithful men who have done more to promote the association, perhaps, than any other two men, are counted among those missing. They are Col. Charles C. Goodnight and Judge Thomas F. Turner, who have died in the past year.

President J. A. Hill of the College will call the meeting to order in the auditorium of the administration building at the West Texas State Teachers College. A special service honoring the memory of the two departed men will be held in the education building, conducted by Horace Russell of Amarillo.

The activities of the day are divided into four sections with the following programs:

11 a. m., at auditorium of the West Texas State Teachers College, President J. A. Hill, presiding.

"America"—Audience and band. Welcome to Visitors—Pres. Hill. Music—Buffalo band.

Introductions—Pres. Hill. Short Talk—W. H. Patrick, Clarendon.

At noon, in the gymnasium of the Education Building, a "Chuck" lunch will be served as a courtesy to members of the Society.

2:00 to 2:30, in auditorium of the Education Building, an appreciation of Colonel C. C. Goodnight and Judge Thomas F. Turner, Mr. Horace Russell of Amarillo, presiding.

My Friend, C. C. Goodnight—Mr. T. D. Hobart, Pampa.

Our First President—Mr. G. A. F. Parker, Hereford.

2:30, in auditorium of the Education building, business session. Mr. T. D. Hobart, President, presiding.

Election of Officers. Report of Committees.

6:00, Banquet at Cousins Hall. T. D. Hobart, toastmaster.

Panhandle Plains Movies—C. Don Hughes, Amarillo.

Cow Boy Songs—Jake Burkett, Plainview.

Introductions—L. F. Sheffy, Canyon.

Music—Old Time Fiddlers.

An Interpretation of the Life of Col. Goodnight—J. Evetts Haley.

FOSTER RETURNS HOME

Mark A. Foster returned to Canyon Wednesday from a hospital in Amarillo, where he has recently undergone an operation. Mr. Foster is rapidly recovering from the effects of his illness.

Last Rites For L. L. Hand To Be Held Friday

Funeral services for L. L. Hand will be conducted tomorrow afternoon at 2 o'clock at the First Baptist church, by Rev. C. G. Howard, pastor.

Mr. Hand died suddenly at his home near here about 8 p. m. Monday.

He had been a prominent farmer of this section for about four years. He was a native of Georgia, born there on July 27, 1868. At the time of his death he was 61 years, 8 months and 10 days old.

He is survived by his wife, four sons, W. A. Hand of Amarillo, W. B. Hand of Amarillo, H. H. Hand and J. S. Hand, both of Canyon, and one daughter, Mrs. J. R. Thompson of Yuma, Ariz.

Active pall bearers will be: S. S. Williams, J. E. Roberson, Rhea Robbins, J. S. Pool, W. H. Lewis and J. H. Lisle. Honorary pallbearers will be: James A. Bush, Amarillo; W. H. Fuqua, Amarillo; L. M. Lemmon, Amarillo; W. H. Bush, Chicago; Henry Schefer, El Reno, Okla.; J. M. Black, T. C. Thompson, Grady Oldham, G. G. Foster, S. B. Orton, A. H. Hunt, G. W. Johnson, Oscar Hunt, R. A. Warren, W. A. Warren, J. C. Black, R. McGee, J. A. Hill, Travis Shaw, Dr. D. M. Stewart, Dr. C. E. Donnell, Will Foster, R. E. Foster, R. L. Campbell, W. B. Hardin, C. R. Burrow, L. R. Johnson, R. M. Gibbs, J. L. Prichard, J. C. Dowd, and R. H. Wright, all of Canyon.

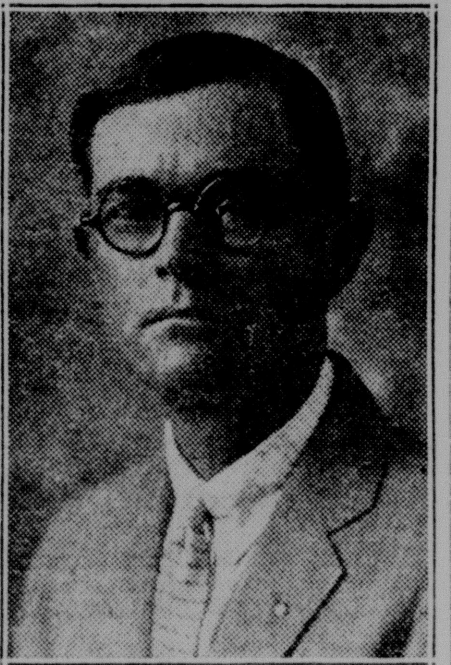

Interment will be at Dreamland cemetery, with Griggs-Thompson Funeral Home in charge.

Elected Directors of Dairy Show

H. B. HALES

Mr. Hales is a prominent dairyman of Randall County and has been a successful exhibitor at the Panhandle Plains Dairy Show each year. At the annual meeting of the board of directors and officers, Tuesday night, Mr. Hales was named as a new director of the organization.

W. H. UPCHURCH

Mr. Upchurch who has been a director of the Dairy Show organization since it was organized several years ago was re-elected as director at the annual meeting of the officers and directors Tuesday night.

Mr. Upchurch was superintendent of the Holstein department of the show this year.

Board of Control Members Are Here

R. B. Walthall, member of the board of control, and J. D. Hall, chief of the bureau of appropriations, were here Monday and inspected the college plant. They are making the budget for the coming two years, which will be presented to the legislature in January.

Mr. Walthall will soon retire from the board, his successor not having been named, but it is generally thought that Representative Adrian Pool of El Paso will succeed him.

Every item on the budget was carefully gone over with President Hill.

WILL FARM HERE

Clarence Reeds and family arrived this week from Oklahoma City to make their future home. Mr. Reeds is a brother of Coach Claude Reeds of the Buffalo football team. He is highly impressed with the opportunities which are presented in Randall county.

Work of Health Nurse in County Nearing Finish

With more than 1,000 school children of Randall county already examined, the work of Miss Ridley, Red Cross nurse, is nearing completion. Miss Ridley announces that she has been enthusiastically received in her work over the county in examining the school children in a health drive sponsored by the Randall county Red Cross chapter.

She appreciates the interest and assistance given by the parents in her work among the schools. The consultations with the parents have enabled her to discuss the individual problems of each child and urge the parents to take steps to correct any deficiencies found.

She is at this time working in the Canyon high school. Only three more weeks of her three months' stay in this county remain. The committee of the Red Cross in charge of this work urge the parents of the county to take advantage of the service and advice offered. Miss Ridley may be found in the county judge's office each Saturday.

Mr. and Mrs. A. E. Terry and son, Alfred E., were in Amarillo Sunday afternoon.

HALE'S HERD IS SENSATION AT DAIRY SHOW

RANDALL COUNTY MAN AND BOYS SWEEP SHOW PRIZES

R. P. Hales Winner Over Entry of His Father; Four Boys Place in Calf Show.

Randall county entries in the Holstein division of the dairy show at Plainview brought away a large portion of the ribbons.

H. B. Hales and his four future dairymen of the Panhandle, especially the boys, created a sensation with their winnings. Seven-year-old Joe Vern Hales, showing his Holstein heifer to the junior championship, defeated his father with ease.

Entries of Mr. Hales' Holstein cows won places as follows: First place on bulls, two years and under three; second on aged cows; first on cows three years and under four; first on senior yearling heifers and first on junior yearling heifer.

R. P. Hales, son of H. B., won second in the junior yearling heifer class. Also fourth in the Holstein division of the club boys' calf show.

Joe Vern, Louis and H. B. Hales, Jr., placed first, second and third, respectively in the Holstein division of the club boys' calf show.

J. W. Watson, another Randall county dairyman, showing for the first time at the show, won seventh in the junior heifer class in the Jersey division, showing against a field of 42 entries from the best herds in the Panhandle and in the hands of veteran show men.

In the Jersey division the first prize senior yearling bull, exhibited by B. W. Wilks of Plainview, was bred in Randall county and was sired by one of the first circle bulls placed in the county. He was sold last year to Mr. Wilks by H. C. Roffy.

New Commissioners Installed Monday

R. P. Jarrett and Grady Oldham, newly elected city commissioners, were duly installed to the offices, at the regular meeting of the city commission Monday night.

Routine business was transacted at the meeting. The commission canvassed the returns of last Tuesday's election, examined the qualifications of the incoming officers and installed them, retiring commissioners relinquishing their authorities.

The retiring commissioners whose terms expired were T. C. Thompson and J. J. Walker. They did not seek re-election.

Happy Highway To Be Open To Traffic Soon

The highway from Canyon to Happy will be open to traffic within the next ten days, Highway Engineer A. E. Dyatt, stated Monday. Only a few low places in the road remain to be filled. After that State Highway officials will pass on the work and if it is accepted by them it will be opened to traffic immediately. This will require about ten days Mr. Dyatt estimates.

The contracting firm began the removal of their equipment from here early this week. Work was begun on the roadbed some six months ago.

The county commissioners court will send representatives to Austin in a few days to confer with the State Highway commission regarding the work on the highway south to the Swisher county line. It is learned that the State Highway commission is urging the commissioners court to accept a topped road from Canyon south. In the event this is done the money for construction will be available at once and work on the road will be completed during this year.

Draftsmen have about completed the drawings on the highway running from here to Hereford. These plans are yet to be approved by the State Highway officials before they will be accepted as official routing for the highway.

Tulia Golfers To Play Here Sunday

Members of the Canyon Country club are expecting to entertain a group of Tulia men as visitors Sunday afternoon, in a golf match. Approximately 50 visitors are expected providing the weather is favorable.

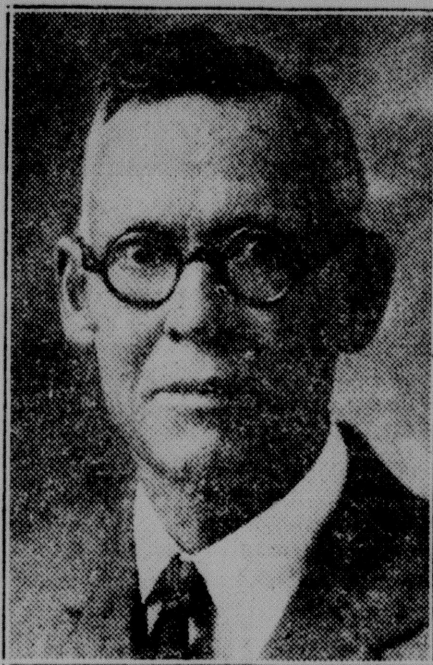

Two such matches have been played so far this spring. Tulia won the match in their trip to Canyon, while the one played at Tulia resulted in a tie.

Mr. and Mrs. Bryan McDonald and children, of Ozona, visited friends and attended to business interests here Sunday.

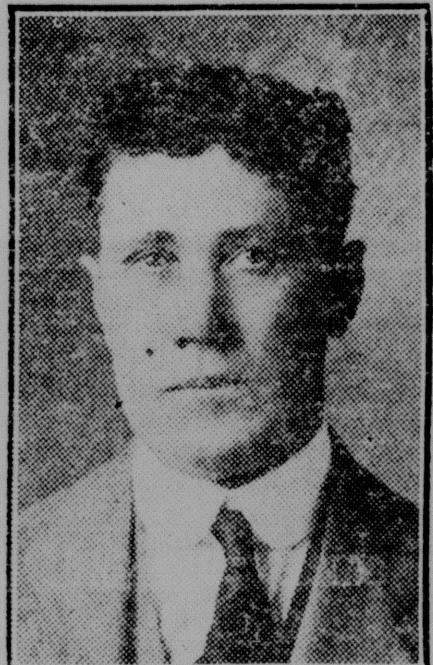

New School Trustees Elected

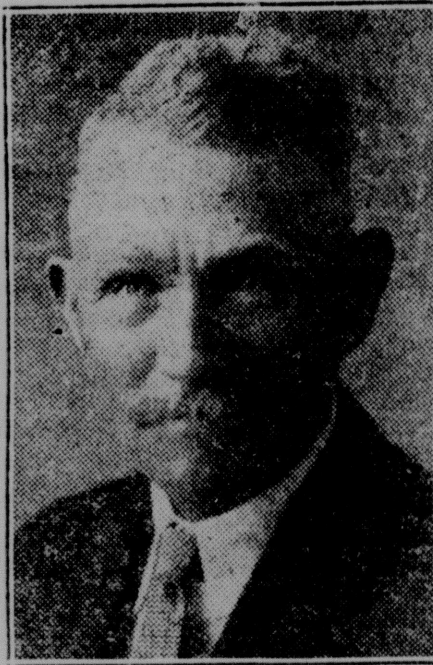

R. E. BALL

E. BURROUGHS

W. H. STROUD

T. V. SLACK

All Efforts Are Being Made For Complete Census

In an effort to make the 1930 census of the United States as nearly accurate as possible the census bureau directors are using every means possible to include every person in the count.

Enumeration of the nation's population began last Wednesday and in some instances it is expected to be completed within two weeks, while plans were originally set to have the census completed not later than April 30.

Mrs. C. R. Flesher is the enumerator for the city of Canyon and her enumeration will be complete if at all possible, she states. However, in order to help her get a complete and total count of the persons residing in Canyon, everyone is urged to cooperate with her in the enumeration.

If it is doubtful that any resident will be away from home when she calls they are asked to get in touch with Mrs. Flesher, and blanks will be furnished to be filled out at the convenience of the person to be enumerated.

H. G. Ballengee, who is census enumerator for precinct one outside of Canyon, announces that he will work north and west of Canyon next week. Mr. Ballengee states that he will appreciate a co-operation in making the census complete.

Galen R. Smith, supervisor of the census for this district, may be notified by mailing the following notice to him. However, if it is inconvenient to mail it to Mr. Smith, the same will be received at the News office, and will be forwarded to the proper authorities.

HERE FROM ARKANSAS

Mr. and Mrs. L. E. Thompson of Fayetteville, Ark., are visiting here and in Amarillo for a short while. Both were citizens of Canyon until a few years ago. Mrs. Thompson will be remembered as Miss Gladys Rogers, daughter of J. E. Rogers of Amarillo. They will likely move back to the Panhandle in a short time.

Preparations are being made to care for approximately four or five hundred delegates and visitors to the convention. Complete programs, giving final arrangements in detail, were mailed out early this week from the secretary's office.

Mr. Thompson states that indications point to the most successful convention in the history of the association.

Officers of the association are: O. W. Kirk, Floydada, president; H. C. Stokes, Amarillo, vice-president, and C. L. Thompson, Canyon, secretary and treasurer.

HAVE YOU BEEN ENUMERATED?

If not, or if you have any doubt, fill out this coupon and mail to: Galen R. Smith, Supervisor of Census, 330 Federal Bldg., Amarillo, Texas.

On April 1, 1930, I was living at address given below, but to the best of my knowledge I have not been enumerated, either there or anywhere else.

Cemetery Is In Fine Condition After Clean-up

According to Judge B. F. Fronabarger, work was completed Saturday on the cleanup of Dreamland cemetery. It was through the co-operation of the county commissioners, city officials, and the pastors of the various churches of Canyon that employment was given to a number of men who were needing employment and were anxious to work.

These men were sent to the cemetery and instructed to put it in good condition. For the time they were employed these men did a good job.

Dreamland cemetery is in the best condition it has been in for fifteen years. The Thompson Hardware company, at their own expense, repaired the well, windmill and hydrants, putting them in good working condition, assuring an abundance of water for shrubbery and flowers.

It is hoped that everyone who has an interest in the resting place of the bodies of our departed loved ones will help to keep the cemetery in good condition from now on.

Extension Sought On Rural Route 1

A four-mile extension of route No. 1 out of Canyon is being asked by S. M. Snyder and other farmers living west of Canyon, according to Mr. Snyder.

An application for the extension has been forwarded to the postoffice department at Washington, and other necessary papers will be sent soon. The extension, Mr. Snyder states, will begin at the corner of the J. P. Hicks place, going north for two miles and then west one mile, turning back south to the highway. It is pointed out that some five or six more families living in that section will be greatly benefited by the extension.

A. H. Bryant Is Manager For the Texas Utilities

A. H. Bryant, better known to the people of Canyon as plain "Bill," has returned here after an absence of more than a year. Mr. Bryant returns as new local manager of the Texas Utilities company, succeeding R. B. Meredith. He was former local manager of the West Texas Gas company.

Mr. Bryant located here in July, 1927, prior to the opening of West Texas Gas company office here in October, coming here from Oklahoma. He and his family lived here until March of last year, when he was transferred to Plainview as the manager of the gas company at that place. The transfer was brought about in a general change-up of managers over the entire section. He was succeeded by Earl Robbins, present manager of the gas company.

Although he has spent a number of years in the gas business, Mr. Bryant is not unfamiliar with electric utilities, as he was manager of an electric office of the Empire Utilities in Missouri several years ago.

Mr. and Mrs. Bryant, with their two daughters, Kathryn and Thelma will move their household goods from Plainview to Canyon within a few days. Commenting on his new position and returning to Canyon, Mr. Bryant stated that he and his family were highly delighted to get to return to Canyon. "It's just like returning home," Mr. Bryant said.

Scholastics of District Show Increase of 108

A rise of 108 scholastics for the Canyon independent school district is found this year over last, according to J. W. Shanklin, secretary of the school board.

The scholastic census of the district, which was completed a few days ago, shows that there are 868 scholastics in the district this year, compared with 760 last year.

There are more than 1,350 scholastics in all of Randall county. A total of 498 scholastics of the rural school districts have been reported to the county superintendent's office.

Hereford Choir To Give Easter Cantata

The Hereford Municipal Chorus, under the direction of Mrs. Ardelle George, will give an Easter Cantata at the Baptist church Sunday evening, April 13, at 8 o'clock.

This is to be a union service. Everyone is invited to attend. There will be no admission charge.

S. B. Orton attended the dairy show in Plainview Tuesday.

DR. STEWART TALKS ON RED CROSS WORK

ROTARIANS HEAR OF WORK DONE BY LOCAL BODY

Health of School Children Now an Object of Randall County Chapter; Hire Health Nurse.

A study of the Red Cross work in this country, and in Randall county in particular, was made Tuesday at the luncheon of the Rotary club by Dr. D. M. Stewart, who has been chairman of the Randall county Red Cross chapter for several years. Music was furnished by Prof. Charles W. Chylinski of Amarillo, who played several original interpretations on the piano.

Visitors present were Rev. L. B. Shell of Plainview, Rev. W. H. Bessie of Canyon, H. G. Wilson of Amarillo, Charles W. Chylinski of Amarillo, Mr. and Mrs. Frank Clowe of Amarillo.

After reviewing some of the important work of the Red Cross in the Southwest, Dr. Stewart explained what the organization had done in Randall county. It was now providing a nurse who was making an examination of all of the school children of the county, for the purpose of finding the physical defects, and suggesting methods of remedying these defects.

The nurse has completed the grades of the public schools, the training school of the College, and 19 of the rural schools. She is now working in the Canyon high school. The nurse is paid by the Red Cross chapter for three months, and it is hoped that every child in the county will be examined in that time.

The following children have been found to be defective:

Eyes, 101.

Teeth, 377.

Throats, 233.

Poor posture, 93.

Nervous symptoms, 93.

Ten per cent under weight, 40.

Twenty per cent over weight, 21.

Normal as to weight, 58.

Dr. Stewart reports that many of the parents have called upon the nurse to seek information as to the method of correcting these defects. Members of the P. T. A. and teachers of the schools have given full co-operation to the nurse.

The physicians and dentists have assisted the nurse in the examinations. Judge B. F. Fronabarger gave transportation to the rural schools.

Dr. Stewart believed that the work being done will have very great value to the coming generation. The chapter needs the hearty co-operation of every citizen in this work of providing health and happiness to the children, who are to be the fathers and mothers of the future.

Superintendent Irby Carruth of the Canyon public schools highly praised the work which was being done by the nurse. Most of the failures in the schools are among those who are defective. To correct these defects is a great economic saving to the district, as well as a humanitarian act to the individual.

A. H. (Bill) Bryant was elected to membership of the club. He was formerly a Rotarian while manager of the local gas company.

The annual election of officers of the club will be held next month. President Joe Hill named the following nomination committee: Irby Carruth, Harry A. Brown, Sylvester Ingham.

Haley Honored By Gift From Taos Indians

One of the most interesting objects which has appeared in the Museum of the Panhandle-Plains Historical Society is a carreta or cart constructed by the Taos Indians and presented as a token of their affection and respect for J. Evetts Haley, former field secretary of the Society.

The carreta has huge wooden wheels, the center portion of which were hewed out of a tree trunk. The wheels are held on the axle by substantial wooden pegs. The bed of the cart, which has no springs is fastened directly to the axle, huge wooden pegs being used here.

The whole cart is made just as such carts were made 500 years ago, and is representative of the means of transportation which the Pueblo Indians and early Spanish explorers used during their trips over New Mexico at the time that the earliest missions were established.

The carreta is on display in the main corridor of the Administration Building of the Teachers College this week until after the Historical Society meeting on Friday.

Mrs. T. A. Kay is visiting with friends in Pampa this week.

PLANS ARE COMPLETE FOR P-P. H. S. MEET

HUNDREDS ARE EXPECTED TO GATHER HERE TOMORROW

Special Service Planned to Honor the Memory of Col. Goodnight and Mr. Turner.

The scene is all set for the best meeting of the Panhandle-Plains Historical society since the founding of that organization, in its annual meeting here tomorrow. Old-timers and others interested in the work of the organization will be here from every section of the Panhandle to attend the sessions.

However, a note of sadness will linger over the body as it convenes tomorrow at 11 o'clock, as two strong and faithful men who have done more to promote the association, perhaps, than any other two men, are counted among those missing. They are Col. Charles C. Goodnight and Judge Thomas F. Turner, who have died in the past year.

President J. A. Hill of the College will call the meeting to order in the auditorium of the administration building at the West Texas State Teachers College. A special service honoring the memory of the two departed men will be held in the education building, conducted by Horace Russell of Amarillo.

The activities of the day are divided into four sections with the following programs:

11 a. m., at auditorium of the West Texas State Teachers College, President J. A. Hill, presiding. "America"—Audience and band. Welcome to Visitors—Pres. Hill. Music—Buffalo band. Introductions—Pres. Hill. Short Talk—W. H. Patrick, Clarendon.

At noon, in the gymnasium of the Education Building, a "Chuck" lunch will be served as a courtesy to members of the Society.

2:00 to 2:30, in auditorium of the Education Building, an appreciation of Colonel C. C. Goodnight and Judge Thomas F. Turner. Mr. Horace Russell of Amarillo, presiding. My Friend, C. C. Goodnight—Mr. T. D. Hobart, Pampa.

Our First President—Mr. G. A. F. Parker, Hereford.

2:30, in auditorium of the Education building, business session. Mr. T. D. Hobart, President, presiding. Election of Officers.

Report of Committees. 6:00, Banquet at Cousins Hall. T. D. Hobart, toastmaster. Panhandle Plains Movies—C. Don Hughes, Amarillo.

Cow Boy Songs—Jake Burkett, Plainview.

Introductions—L. F. Sheffy, Canyon.

Music—Old Time Fiddlers.

An Interpretation of the Life of Col. Goodnight—J. Evetts Haley.

FOSTER RETURNS HOME

Mark A. Foster returned to Canyon Wednesday from a hospital in Amarillo, where he has recently undergone an operation. Mr. Foster is rapidly recovering from the effects of his illness.

Last Rites For L. L. Hand To Be Held Friday

Funeral services for L. L. Hand will be conducted tomorrow afternoon at 2 o'clock at the First Baptist church, by Rev. C. G. Howard, pastor.

Mr. Hand died suddenly at his home near here about 8 p. m. Monday.

He had been a prominent farmer of this section for about four years. He was a native of Georgia, born there on July 27, 1868. At the time of his death he was 61 years, 8 months and 10 days old.

He is survived by his wife, four sons, W. A. Hand of Amarillo, W. B. Hand of Amarillo, H. H. Hand and J. S. Hand, both of Canyon, and one daughter, Mrs. J. R. Thompson of Yuma, Ariz.

Active pall bearers will be: S. S. Williams, J. E. Roberson, Rhea Roberson, J. S. Pool, W. H. Lewis and J. H. Lisle. Honorary pallbearers will be: James A. Bush, Amarillo; W. H. Fuqua, Amarillo; L. M. Lemmon, Amarillo; W. H. Bush, Chicago; Henry Schefer, El Reno, Okla.; J. M. Black, T. C. Thompson, Grady Oldham, G. G. Foster, S. B. Orton, A. H. Hunt, G. W. Johnson, Oscar Hunt, R. A. Warren, W. A. Warren, J. C. Black, R. McGee, J. A. Hill, Travis Shaw, Dr. D. M. Stewart, Dr. C. E. Donnell, Will Foster, R. E. Foster, R. L. Campbell, W. B. Hardin, C. R. Burrow, L. R. Johnson, R. M. Gibbs, J. L. Prichard, J. C. Dowd, and R. H. Wright, all of Canyon.

Interment will be at Dreamland cemetery, with Griggs-Thompson Funeral Home in charge.

Elected Directors of Dairy Show

H. B. HALES

Mr. Hales is a prominent dairyman of Randall County and has been a successful exhibitor at the Panhandle Plains Dairy Show each year. At the annual meeting of the board of directors and officers, Tuesday night, Mr. Hales was named as a new director of the organization.

W. H. UPCHURCH

Mr. Upchurch who has been a director of the Dairy Show organization since it was organized several years ago was re-elected as director at the annual meeting of the officers and directors Tuesday night. Mr. Upchurch was superintendent of the Holstein department of the show this year.

Board of Control Members Are Here

R. B. Walthall, member of the board of control, and J. D. Hall, chief of the bureau of appropriations, were here Monday and inspected the college plant. They are making the budget for the coming two years, which will be presented to the legislature in January.

Mr. Walthall will soon retire from the board, his successor not having been named, but it is generally thought that Representative Adrian Pool of El Paso will succeed him.

Every item on the budget was carefully gone over with President Hill.

WILL FARM HERE

Clarence Reeds and family arrived this week from Oklahoma City to make their future home. Mr. Reeds is a brother of Coach Claude Reeds of the Buffalo football team. He is highly impressed with the opportunities which are presented in Randall county.

Work of Health Nurse in County Nearing Finish

With more than 1,000 school children of Randall county already examined, the work of Miss Ridley, Red Cross nurse, is nearing completion. Miss Ridley announces that she has been enthusiastically received in her work over the county in examining the school children in a health drive sponsored by the Randall county Red Cross chapter.

She appreciates the interest and assistance given by the parents in her work among the schools. The consultations with the parents have enabled her to discuss the individual problems of each child and urge the parents to take steps to correct any deficiencies found.

She is at this time working in the Canyon high school. Only three more weeks of her three months' stay in this county remain. The committee of the Red Cross in charge of this work urge the parents of the county to take advantage of the service and advice offered. Miss Ridley may be found in the county judge's office each Saturday.

Mr. and Mrs. A. E. Terry and son, Alfred E., were in Amarillo Sunday afternoon.

HALE'S HERD IS SENSATION AT DAIRY SHOW

RANDALL COUNTY MAN AND BOYS SWEEP SHOW PRIZES

R. P. Hales Winner Over Entry of His Father; Four Boys Place in Calf Show.

Randall county entries in the Holstein division of the dairy show at Plainview brought away a large portion of the ribbons.

H. B. Hales and his four future dairymen of the Panhandle, especially the boys, created a sensation with their winnings. Seven-year-old Joe Vern Hales, showing his Holstein heifer to the junior championship, defeated his father with ease.

Entries of Mr. Hales' Holstein cows won places as follows: First place on bulls, two years and under three; second on aged cows; first on cows three years and under four; first on senior yearling heifers and first on junior yearling heifer.

R. P. Hales, son of H. B., won second in the junior yearling heifer class. Also fourth in the Holstein division of the club boys' calf show.

Joe Vern, Louis and H. B. Hales, Jr., placed first, second and third, respectively in the Holstein division of the club boys' calf show.

J. W. Watson, another Randall county dairyman, showing for the first time at the show, won seventh in the junior heifer class in the Jersey division, showing against a field of 42 entries from the best herds in the Panhandle and in the hands of veteran show men.

In the Jersey division the first prize senior yearling bull, exhibited by B. W. Wilks of Plainview, was bred in Randall county and was sired by one of the first circle bulls placed in the county. He was sold last year to Mr. Wilks by H. C. Roffey.

New Commissioners Installed Monday

R. P. Jarrett and Grady Oldham, newly elected city commissioners, were duly installed to the offices, at the regular meeting of the city commission Monday night.

Routine business was transacted at the meeting. The commission canvassed the returns of last Tuesday's election, examined the qualifications of the incoming officers and installed them, retiring commissioners relinquishing their authorities.

The retiring commissioners whose terms expired were T. C. Thompson and J. J. Walker. They did not seek re-election.

Happy Highway To Be Open To Traffic Soon

The highway from Canyon to Happy will be open to traffic within the next ten days, Highway Engineer A. E. Dyatt, stated Monday.

Only a few low places in the road remain to be filled. After that State Highway officials will pass on the work and if it is accepted by them it will be opened to traffic immediately. This will require about ten days Mr. Dyatt estimates.

The contracting firm began the removal of their equipment from here early this week. Work was begun on the roadbed some six months ago.

The county commissioners court will send representatives to Austin in a few days to confer with the State Highway commission regarding the work on the highway south to the Swisher county line.

It is learned that the State Highway commission is urging the commissioners court to accept a topped road from Canyon south. In the event this is done the money for construction will be available at once and work on the road will be completed during this year.

Draftsmen have about completed the drawings on the highway running from here to Hereford. These plans are yet to be approved by the State Highway officials before they will be accepted as official routing for the highway.

Tulia Golfers To Play Here Sunday

Members of the Canyon Country club are expecting to entertain a group of Tulia men as visitors Sunday afternoon, in a golf match. Approximately 50 visitors are expected providing the weather is favorable.

Two such matches have been played so far this spring. Tulia won the match in their trip to Canyon, while the one played at Tulia resulted in a tie.

Mr. and Mrs. Bryan McDonald and children, of Ozona, visited friends and attended to business interests here Sunday.

New School Trustees Elected

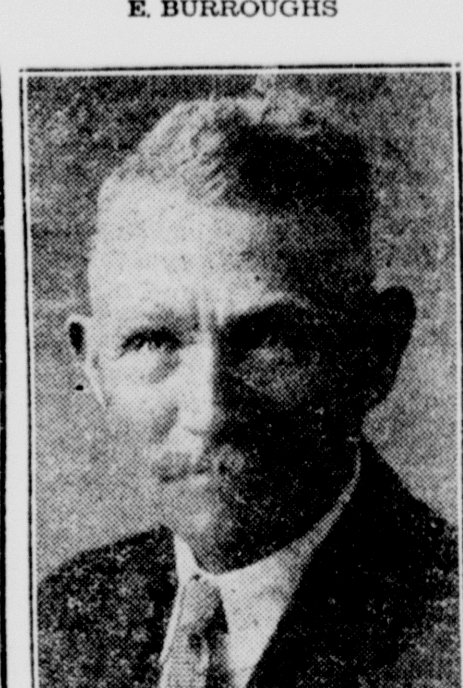

R. E. BALL

W. H. STROUD

E. BURROUGHS

T. V. SLACK

All Efforts Are Being Made For Complete Census

In an effort to make the 1930 census of the United States as nearly accurate as possible the census bureau directors are using every means possible to include every person in the count.

Enumeration of the nation's population began last Wednesday and in some instances it is expected to be completed within two weeks, while plans were originally set to have the census completed not later than April 30.

Mrs. C. R. Flesher is the enumerator for the city of Canyon and her enumeration will be complete if at all possible, she states. However, in order to help her get a complete and total count of the persons residing in Canyon, everyone is urged to co-operate with her in the enumeration. If it is doubtful that any resident will be away from home when she calls they are asked to get in touch with Mrs. Flesher, and blanks will be furnished to be filled out at the convenience of the person to be enumerated.

H. G. Ballengee, who is census enumerator for precinct one outside of Canyon, announces that he will work north and west of Canyon next week. Mr. Ballengee states that he will appreciate a co-operation in making the census complete.

Galen R. Smith, supervisor of the census for this district, may be notified by mailing the following notice to him. However, if it is inconvenient to mail it to Mr. Smith, the same will be received at the News office, and will be forwarded to the proper authorities.

HERE FROM ARKANSAS

Mr. and Mrs. L. E. Thompson of Fayetteville, Ark., are visiting here and in Amarillo for a short while. Both were citizens of Canyon until a few years ago. Mrs. Thompson will be remembered as Miss Gladys Rogers, daughter of J. E. Rogers of Amarillo. They will likely move back to the Panhandle in a short time.

Little Interest Shown in School Trustee Election

Little interest was manifest in the election of school trustees for the Canyon independent school district Saturday, when three members were elected to the board, and one present member was re-elected.

W. H. Stroud, R. F. Hall and E. Burroughs were new trustees, and T. V. Slack was re-elected from a field of six candidates.

The official returns were:

W. H. Stroud 81
T. V. Slack 71
R. E. Ball 66
E. Burroughs 66
C. R. Jarrett 56
I. W. Scott 39

Members of the board whose terms expired were T. V. Slack, J. W. Johnson, A. W. Sternberg, and J. A. Guthrie.

Annual Convention Of Hardware Men Opens on Monday

The twenty-first annual convention of the Panhandle Hardware and Implement Association will open with the convention headquarters at the Herring hotel in Amarillo, Monday, April 14, according to C. L. Thompson, secretary of the association. The convention sessions will be held in the Crystal ballroom of the Herring hotel, April 14, 15 and 16.

Preparations are being made to care for approximately four or five hundred delegates and visitors to the convention. Complete programs, giving final arrangements in detail, were mailed out early this week from the secretary's office.

Mr. Thompson states that indications point to the most successful convention in the history of the association.

Officers of the association are: O. W. Kirk, Floydada, president; H. C. Stokes, Amarillo, vice-president, and C. L. Thompson, Canyon, secretary and treasurer.

A. H. Bryant Is Manager For the Texas Utilities

A. H. Bryant, better known to the people of Canyon as plain "Bill," has returned here after an absence of more than a year. Mr. Bryant returns as new local manager of the Texas Utilities company, succeeding R. B. Meredith. He was former local manager of the West Texas Gas company.

Mr. Bryant located here in July, 1927, prior to the opening of the West Texas Gas company office here in October, coming here from Oklahoma. He and his family lived here until March of last year, when he was transferred to Plainview as the manager of the gas company at that place. The transfer was brought about in a general change-up of managers over the entire section. He was succeeded by Earl Robbins, present manager of the gas company.

Although he has spent a number of years in the gas business, Mr. Bryant is not unfamiliar with electric utilities, as he was manager of an electric office of the Empire Utilities in Missouri several years ago.

Mr. and Mrs. Bryant, with their two daughters, Kathryn and Thelma will move their household goods from Plainview to Canyon within a few days. Commenting on his new position and returning to Canyon, Mr. Bryant stated that he and his family were highly delighted to get to return to Canyon. "It's just like returning home," Mr. Bryant said.

Scholastics of District Show Increase of 108

A rise of 108 scholastics for the Canyon independent school district is found this year over last, according to J. W. Shanklin, secretary of the school board.

The scholastic census of the district, which was completed a few days ago, shows that there are 868 scholastics in the district this year, compared with 760 last year.

There are more than 1,350 scholastics in all of Randall county. A total of 498 scholastics of the rural school districts have been reported to the county superintendent's office.

Hereford Choir To Give Easter Cantata

The Hereford Municipal Chorus, under the direction of Mrs. Ardelle George, will give an Easter Cantata at the Baptist church Sunday evening, April 13, at 8 o'clock.

This is to be a union service. Everyone is invited to attend. There will be no admission charge.

S. B. Orton attended the dairy show in Plainview Tuesday.

Cemetery Is In Fine Condition After Clean-up

According to Judge B. F. Fronabarger, work was completed Saturday on the cleanup of Dreamland cemetery. It was through the co-operation of the county commissioners, city officials, and the pastors of the various churches of Canyon that employment was given to a number of men who were needing employment and were anxious to work. These men were sent to the cemetery and instructed to put it in good condition. For the time they were employed these men did a good job.

Dreamland cemetery is in the best condition it has been in for fifteen years. The Thompson Hardware company, at their own expense, repaired the well, windmill and hydrants, putting them in good working condition, assuring an abundance of water for shrubbery and flowers.

It is hoped that everyone who has an interest in the resting place of the bodies of our departed loved ones will help to keep the cemetery in good condition from now on.

Extension Sought On Rural Route 1

A four-mile extension of route No. 1 out of Canyon is being asked by S. M. Snyder and other farmers living west of Canyon, according to Mr. Snyder.

An application for the extension has been forwarded to the postoffice department at Washington, and other necessary papers will be sent soon. The extension, Mr. Snyder states, will begin at the corner of the J. P. Hicks place, going north for two miles and then west one mile, turning back south to the highway. It is pointed out that some five or six more families living in that section will be greatly benefited by the extension.

DR. STEWART TALKS ON RED CROSS WORK

ROTARIANS HEAR OF WORK DONE BY LOCAL BODY

Health of School Children Now an Object of Randall County Chapter; Hire Health Nurse.

A study of the Red Cross work in this country, and in Randall county in particular, was made Tuesday at the luncheon of the Rotary club by Dr. D. M. Stewart, who has been chairman of the Randall county Red Cross chapter for several years. Music was furnished by Prof. Charles W. Chylinski of Amarillo, who played several original interpretations on the piano.

Visitors present were Rev. L. B. Shell of Plainview, Rev. W. H. Besire of Canyon, H. G. Wilson of Amarillo, Charles W. Chylinski of Amarillo, Mr. and Mrs. Frank Clowe of Amarillo.

After reviewing some of the important work of the Red Cross in the Southwest, Dr. Stewart explained what the organization had done in Randall county. It was now providing a nurse who was making an examination of all of the school children of the county, for the purpose of finding the physical defects, and suggesting methods of remedying these defects.

The nurse has completed the grades of the public schools, the training school of the College, and 19 of the rural schools. She is now working in the Canyon high school. The nurse is paid by the Red Cross chapter for three months, and it is hoped that every child in the county will be examined in that time.

The following children have been found to be defective:

Eyes, 101.
Teeth, 377.
Throats, 233.
Poor posture, 93.
Nervous symptoms, 93.
Ten per cent under weight, 40.
Twenty per cent over weight, 21.
Normal as to weight, 58.

Dr. Stewart reports that many of the parents have called upon the nurse to seek information as to the method of correcting these defects. Members of the P. T. A. and teachers of the schools have given full co-operation to the nurse.

The physicians and dentists have assisted the nurse in the examinations. Judge B. F. Fronabarger gave transportation to the rural schools.

Dr. Stewart believed that the work being done will have very great value to the coming generation. The chapter needs the hearty co-operation of every citizen in this work of providing health and happiness to the children, who are to be the fathers and mothers of the future.

Superintendent Irby Carruth of the Canyon public schools highly praised the work which was being done by the nurse. Most of the failures in the schools are among those who are defective. To correct these defects is a great economic saving to the district, as well as a humanitarian act to the individual.

A. H. (Bill) Bryant was elected to membership of the club. He was formerly a Rotarian while manager of the local gas company.

The annual election of officers of the club will be held next month. President Joe Hill named the following nomination committee: Irby Carruth, Harry A. Brown, Sylvester Ingham.

Haley Honored By Gift From Taos Indians

One of the most interesting objects which has appeared in the Museum of the Panhandle-Plains Historical Society is a carreta or cart constructed by the Taos Indians and presented as a token of their affection and respect for J. Evetts Haley, former field secretary of the Society.

The carreta has huge wooden wheels, the center portion of which were hewed out of a tree trunk. The wheels are held on the axle by substantial wooden pegs. The bed of the cart, which has no springs is fastened directly to the axle, huge wooden pegs being used here.

The whole cart is made just as such carts were made 500 years ago, and is representative of the means of transportation which the Pueblo Indians and early Spanish explorers used during their trips over New Mexico at the time that the earliest missions were established.

The carreta is on display in the main corridor of the Administration Building of the Teachers College this week until after the Historical Society meeting on Friday.

Mrs. T. A. Kay is visiting with friends in Pampa this week.

HAVE YOU BEEN ENUMERATED?

If not, or if you have any doubt, fill out this coupon and mail to: Galen R. Smith, Supervisor of Census, 330 Federal Bldg., Amarillo, Texas.

On April 1, 1930, I was living at address given below, but to the best of my knowledge I have not been enumerated, either there or anywhere else.

Owner and Publisher

SUBSCRIPTION \$1.50 PER YEAR

Entered at the postoffice at Canyon, Texas, as second class matter. Published weekly at office, 1513 Fourth Avenue, Canyon, Texas.

This part of the Panhandle is again shown in the "good business" section of the United States. Only a very, very small part of the United States is reported in this condition. Most of the country is shown as "fair." Travelling men state that this section of the Plains; has always been good because there has been no wild speculation or booms. No one is being run over with business, but every substantial business firm is enjoying a healthy growth. Crops have been above normal for several years; farmers are in better condition than in sections with high priced land, and not better income per acre than seen here. Citizens in this section of Texas should be proud of the development being made here, and proud of the country; and think about three times before they sell their holdings here for other pastures which may look a little greener.

Such weather! Regular spring fever kind—or was when this was written Monday morning. The interesting part about Panhandle weather is that the kind which prevails on Monday may be far from the opposite when this is printed Thursday. But today things are looking pretty in Randall county; plenty of moisture to get the grass and trees started; and plenty of warmth in the sunshine to start a growing season. Of course people in South Texas, who have had their cotton planted several weeks, and have been pushing the old lawn mower two or three times, will not understand why we are talking about spring just getting started. A matter of 900 miles and 3500 feet elevation makes a lot of difference in the temperature.

The school census for the Canyon Independent School district shows a substantial growth—the first large increase in several years. Canyon has never gone through a boom, which is fortunate for all of the citizens. There has been a steady, substantial growth every year, which is a fine indication of the sound foundation upon which the town's future is being builded. Booms are always followed by a headache. Business expands faster than is justified. Too many houses are built. Too many bonds are voted; public improvements follow too fast. Show your faith in Can-

yon by continuing to invest in Canyon and make the town better; but don't advocate a boom.

The federal census is being taken this week. Census takers will do their very best to enumerate every citizen who resided in every county on the first of April. But census takers may overlook persons; they have done so before, and while they do not intend to do so this year, mistakes are liable to happen. The News has been asked by the census supervisor of this district to assist in seeing that every person is counted. A blank is being printed this week in the News. If you have not been counted in this census, fill out the blank and return it to the News. We shall see that it reaches the district office.

Senator C. C. Small is being urged by voters from all over the state to get into the race for Governor. No man has risen so rapidly in politics as Clint Small, and his friends in West Texas will take great pleasure in working for him should he decide to make the race. Texas is a big state over which to travel while making a campaign. And rumor has it that several other candidates may get into the campaign before the spring has aged very much. The plot thickens.

It was a much different atmosphere that the Dallas trade trippers brought from that usually displayed on such trips. Dallas has sent trains here before, but not under such conditions as the one coming Friday. It is refreshing to see a great city send out its representatives, the biggest business men, without bands or bluster, for the purpose of getting real information about the country through which they travel. Dallas set a fine example, and one which other cities could well afford to follow.

The Chamber of Commerce is going to ask every business, professional and public spirited citizen of Canyon to make a monthly contribution to the organization. No citizen of Canyon can deny that this organization is doing a great work for Canyon. The funds are very, very limited, and should be doubled for the coming year. When the solicitors come around, let every business house sign up for a membership, and every citizen of Canyon should feel enough interest in the future welfare of the city to invest in the community's welfare and growth.

We imagine that a glider is about as much fun as hooking a little sled on behind the old bob sled in the winter time. But where the thing is practical or of any particular use as a means of navigation, we are at a loss to understand. But we are willing to admit there are several other things we don't know about air travel.

The Quanah Tribune-Chief is worried about the moon. It wants to settle the argument as to which

is a wet and which a dry moon. Very simple indeed; when there is rain, it is a wet moon; when it is dry, that is certainly a dry moon. So that's that.

Southwest Plainsman: "The Stay-er," which was the original name of the Canyon News, was certainly an inspiring title and the Canyon newspaper has lived up to it—and away beyond anything its founder could have conceived in his most ambitious moments. Under the guidance of Editor Warwick, it has long been one of the outstanding publications of this section and there are few, if any, plants in the state in a town of Canyon's size or even larger, than can compare with the News in point of completeness of equipment. Last week, the News passed its 33rd birthday, which makes it an old timer among Plains newspapers—and it hasn't stopped growing yet! Warwick has just installed a second Linotype, which most publishers would consider quite sufficient new investment for a year at least, but the News editor has other improvements up his sleeve for early consummation. Our hearty congratulations go to the proprietor but we opine that the city of Canyon and the county of Randall are mighty lucky in their newspaper man."

Sunny Hill News

The Stamps Quartet known as the West Texas Entertainers, rendered a special program here Friday night. The members of the quartet were Mr. Gunn, Mr. Meek, Mr. Kidwell, and Mr. Dyess.

The new trustees elected Saturday for district No. 9 are Messrs. I. H. Hollabaugh, P. D. Sherwood, and Clark Neff.

Mr. and Mrs. Clarence Stallings and small daughter went to Turkey Saturday, returning Sunday afternoon.

Mrs. C. I. Kaufman and children spent Saturday with Mrs. J. T. Sykes.

Miss Elora Duncan spent Friday night with Bertha Sykes.

Miss Bernice Dubbs spent Saturday with Miss Corinne Hollabaugh.

Mrs. Edna McCaslin spent Saturday night in the Charley Stallings home. They were guests in the J. T. Sykes home Sunday afternoon.

Messrs. J. B. Knox, C. O. Hayes, F. E. Culp, and C. V. Buchanan returned from New Mexico Saturday night.

Ellis Knox, who has been taken to Glenrose is becoming weaker. He is to be brought back this week. J. B. Knox was in Amarillo attending to business Monday. He also visited J. M. Sears who is able to be back at his work now.

Mr. and Mrs. Rex Roby, Ernest and Elora Duncan took dinner in the J. B. Knox home Sunday night. Joe Currie and I. H. Hollabaugh were in Canyon Monday.

Mildred and Billy Scott, who have been out of school on account of illness are back this week.

Mrs. I. H. Hollabaugh visited Mrs. P. D. Sherwood Monday afternoon. Clark Neff and children were in Amarillo Sunday.

Mr. and Mrs. C. I. Kaufman and children were visitors in Happy Sunday.

Ernest Duncan visited Forrester Hollabaugh Saturday.

FIND HOW MUCH SUNLIGHT AVERAGE DWELLING NEEDS

Preparation of the new "regional plan" for the city of New York, has established scientifically for the first time the amount of sunshine the average dwelling receives and how much it needs, according to Woman's Home Companion.

The minimum reasonable amount of sunshine which should be available for every room is one-half hour of noon intensity or its equivalent on the shortest day of the year, the report declares. In cases where some rooms cannot secure the sunlight standard, daylight can be used as a substitute under certain conditions.

From every window which does not receive direct sunlight, at least one per cent of the half-dome of the sky shall be visible from any part of the room.

"To such close calculations has our civilization reduced a people bred in the open under the wide heavens," says the magazine. "Yet there are hundreds of thousands of Americans today whose windows do not admit even a half hour of sunshine or look out upon even one one-hundredth of the sky's dome."

How perfectly some names fit the persons who bear them. Coolness, thrift, austerity—Calvin Coolidge. Romance, intrigue, adventure—Rafael Sabatini.

Get acquainted with this modern CROP BOOSTER

WE'VE GOT a modern cost-cutting and crop booster here—the Case Wheatland Disk Plow—that saves time, prevents waste and increases work done per man per day.

With the Case Wheatland, you can realize a saving in cost per acre of 100 to 200%—by cutting your best time with a moldboard plow in half, or better.

It penetrates to a uniform tilling depth—shallow or deep, 6 inches if you like. Used immediately after harvest—it kills weeds, conserves moisture—all ground completely moved and turned.

diately after harvest—it kills weeds, conserves moisture—all ground completely moved and turned.

Built strong—light in draft—handles easily. Plow cupped, heat-treated disks give extra wear. Disk cylinders, built in sections—turn as one. It's easy to remove a section if soil conditions require it.

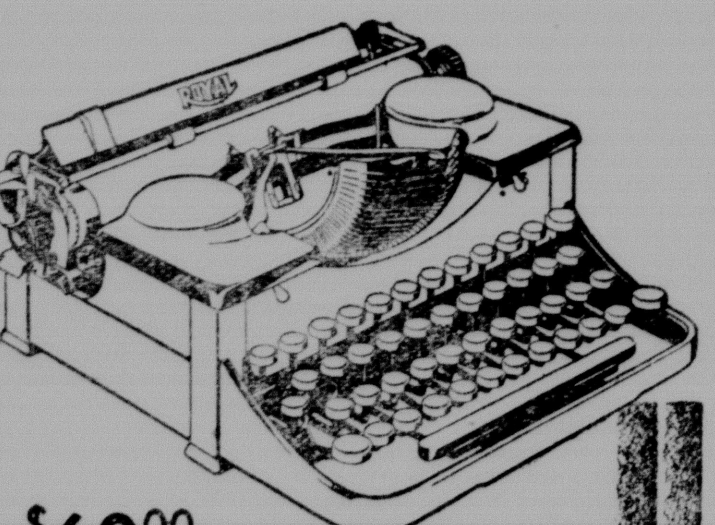

Come in and see this money-saving plow—or use your phone. Call on us for service—any time.

THE FIRST REALLY NEW OIL IN 25 YEARS

THIS is the simple story of the new oil that is now enjoying such remarkable acceptance: Conoco Germ-Processed... In the first place, this new oil is an extraordinarily fine paraffin-base lubricant. And then... under exclusive Conoco patents, this oil is endowed with the unusual faculty of penetrating and combining with metal surfaces. This faculty, we call "Penetrative Lubricity." The Germ Process, by adding a precious oily-essence lacking in all other oils, does this... And so provides constant un-failing lubrication for your motor under any conceivable strenuousness of motor operation. Germ Process is the first fundamental improvement in refining methods in the last quarter century.

So won't you come into the next station you see bearing the Red Triangle and join the thousands of other motorists who have changed to Conoco Germ-Processed Oil in the last few weeks?

Get acquainted with this modern CROP BOOSTER

WE'VE GOT a modern cost-cutter and crop booster here—the Case Wheatland Disk Plow—that saves time, prevents waste and increases work done per man per day.

With the Case Wheatland, you can realize a saving in cost per acre of 100 to 200%—by cutting your best time with a mold-board plow in half, or better.

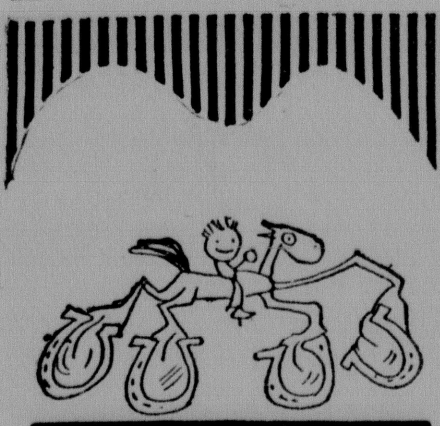

It penetrates to a uniform tilling depth—shallow or deep, 6 inches if you like. Used imme-

diately after harvest—it kills weeds, conserves moisture—all ground completely moved and turned.

Built strong—light in draft—handles easily. Plow cupped, heat-treated disks give extra wear. Disk cylinders, built in sections—turn as one. It's easy to remove a section if soil conditions require it.

Come in and see this money-saving plow—or use your phone. Call on us for service—any time.

For Economical Transportation

It's wise to choose a SIX!

It is wise to choose a six-cylinder motor—the only way to get six-cylinder smoothness. Six-cylinder smoothness takes out vibration and roughness. This saves motor, chassis, body, passengers, and driver.

The Chevrolet is a six. Yet it sells at a price that anyone can afford to pay. And it lasts longer, because of fine materials, oversize parts and a big, smooth, 50-horsepower six-cylinder engine that always "takes it easy."

With all its six-cylinder smoothness and power the New Chevrolet Six saves gasoline and oil, through modern efficiency—overhead valves—high compression power—latest carburetor—long-wearing pistons—crankcase ventilation—air cleaner. Thus Chevrolet brings truly modern transportation within reach of all who can afford any car. Chevrolet economy also means sincerity in manufacture. To illustrate:

Chevrolet valves are adjustable—to save replacing. Chevrolet molded brakelining greatly reduces brake upkeep. The rear axle inspection plate on the Chevrolet means accessibility.

The whole car is full of such evidence that true economy comes from advancement and refinement. There are four extra-long, chrome-vanadium springs controlled

by hydraulic shock absorbers. They are mounted lengthwise, in the direction of car travel, with self-adjusting spring shackles to maintain quiet.

Modern low suspension and extra wheelbase give the Chevrolet Six good proportions. The front view is distinguished by the honeycomb radiator. The gasoline tank is at the rear for safety and finer appearance.

Chevrolet beauty instantly says "Body by Fisher"—style, quiet, safety—Fisher composite steel-and-wood construction—non-glare windshield—adjustable driver's seat—deeper cushions—greater leg room—clearer vision—finer fabrics and fittings.

There is just as much extra value throughout. BY ANY STANDARD the Chevrolet Six is the wisest choice in the low-price field... with its six-cylinder valve-in-head motor... with full scientific equipment... with Body by Fisher... with four long semi-elliptic springs, long wheelbase, low suspension, rear-mounted gasoline tank, honeycomb radiator and all the other features of this day and age.

40 Colleges Are Invited to Great Plains Track Meet

well with the weights, as is Gatewood.

Besides Fuller in the pole vault, are: Britt, a freshman, who promises quite a bit; Hatcher Brown, a junior who is coming out for track for his first year; and Burk of Ralls.

In the broad and high jumps, not much has been done, but probably some of the sprinters will be used, and Coach Burton states that if he has a high jumper, he doesn't know it.

The Japanese, a race who really like baseball, have a world's series of their own and the crowds, drawn from a country smaller than the state of Texas, that turned out to watch it last fall were bigger than those which saw the Athletics beat the Cubs.

There is no domestic wreckage more pitiful than that which has come about through a wife standing still while her husband was advancing.

STATEMENT OF OWNERSHIP
Management, Circulation, Etc., Required by Act of Congress of August 24, 1912.

Of The Canyon News, published weekly at Canyon, Texas, for April 1st, 1930.

STATE OF TEXAS,

County of Randall.

Before me, a notary public, in and for the State and County aforesaid, personally appeared Clyde W. Warwick, who having been duly sworn according to law, deposes and says that he is the owner of The Canyon News, and that the following is to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the names and addresses of the publisher, editor, managing editor and business manager are: Publisher, Editor, Managing Editor and Business Manager, Clyde W. Warwick, Canyon, Texas.

2. That the owner is Clyde W. Warwick, Canyon, Texas.

3. That the known bondholders, mortgagees and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages or other securities, are: Mergenthaler Linotype Co., Brooklyn, New York.

CLYDE W. WARWICK, Owner.
Sworn to and subscribed before me this 1st day of April, 1930.
(Seal) LILLIAN J. ATKINS,
Notary Public, Randall Co., Texas.
My commission expires June 1, 1931.

busy for the past two or three months getting the track and field in readiness for this meet, as well as for the Interscholastic league meet that comes a week earlier.

Last year the Great Plains meet included, for the first time, a high school section, nine high schools entered, and it is believed that there will be as many as 25 or 30 this year.

First, second and third place medals will be awarded winners in both the high school and college section, with a suitable award to the all-around man in each section.

16-Man Oklahoma Team to Enter in Great Plains Meet

Southwestern Teachers from Weatherford, Oklahoma, will bring a 16-man team to Canyon for the Great Plains track and field meet April 25 and 26. They have won

the meet twice, and were winners last year.

Coach Rankin Williams states that they are coming prepared to defend their last year's championship and claim permanent possession of the mammoth cup which has been making the rounds of the plains colleges for the past nine years. Williams states that "so sure are they that they are going to win this year, that they have already had a new polish put on the cup and that it looks like a brand new one, despite the fact that it has been in the trophy cases of some half dozen colleges during the past nine years."

One way to do away with the noise evil might be to make so many new noises that the old ones soon would be drowned out.

We speak of a child "learning to walk." As a matter of fact, he grows into walking or, in other words, his nervous system develops to the point where he walks.

HOUSEHOLD EXPERT TO LECTURE FRIDAY AND SATURDAY

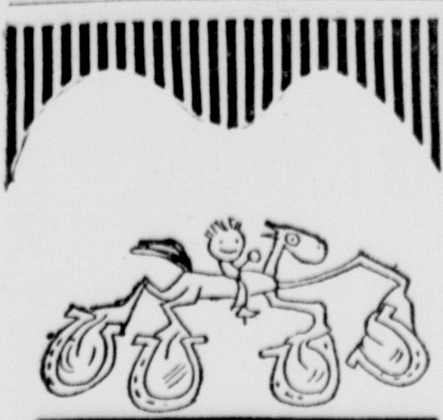

Mrs. Jordan of the Home Service Department of Texas Utilities Company.

Texas Utilities Company has recently established a Home Service Department for the benefit of its customers. Mrs. Jordan, who has had many years' experience and is an expert in culinary arts, is in charge. She will be at this office Friday and Saturday, April 11 and 12. She wishes to meet all the housewives of Canyon. We invite you to come at any time from 2:00 p. m. to 5:00 p. m., either Friday or Saturday. Mrs. Jordan will be glad to discuss any household problems which you may have.

Hot crisp waffles and coffee will be served.

TRACK TEAM IS DEVELOPING GOOD MATERIAL

ONLY FOUR LETTER MEN ARE BACK THIS YEAR; MANY FIRST YEAR MEN ARE SHOWING UP WELL.

The cinder path men of West Texas Teachers College are rapidly rounding into form for the spring meets. Although prospects for a winning track team are not good, it is expected that some good men will be developed.

Only four letter men are back: Sloan Miller, who placed first in the discus at the T. I. A. A. last year, is back and is captain of the team; Prech Fuller, who lettered in the pole vault several years ago, is back and is working out daily. Penick, a two-miler of some repute, was showing more stuff than ever, until he suffered a torn ligament. It is not probable that he will be in shape for the first meet.

Newton Crain, who until last year ran the two-mile, but last year shifted to the mile, seems in better condition than ever and is pointing to at least two meets when he expects to get revenge for former defeats. He is striding the mile in practice at better than five minutes and should be down around record time soon.

Some first year men showing well are: Powell, Clyde Keith, Terry, and Cox in the sprints. Cox, being an old-timer at the job, is not included among the new men. Shirley, Monroe, Nafzger, and Cox are in the hurdles. Burk, Dubbs, Crowder, Dougherty are in the middle distance, while Swafford and Morris are the only new men to try the distance races.

Besides Captain Miller in the weights, there are a number of promising youngsters that may or may not come through this year: Comer, the rangy lad from Clovis, is a man of much promise with the discus, shot, and javelin. Cotton, a product of Vega, is also showing

well with the weights, as is Gatewood.

Besides Fuller in the pole vault, are: Britt, a freshman, who promises quite a bit; Hatcher Brown, a junior who is coming out for track for his first year; and Burk of Ralls.

In the broad and high jumps, not much has been done, but probably some of the sprinters will be used, and Coach Burton states that if he has a high jumper, he doesn't know it.

The Japanese, a race who really like baseball, have a world's series of their own and the crowds, drawn from a country smaller than the state of Texas, that turned out to watch it last fall were bigger than those which saw the Athletics beat the Cubs.

40 Colleges Are Invited to Great Plains Track Meet

About forty colleges have been invited to attend the tenth annual Great Plains Intercollegiate track and field meet, to be held in Canyon, April 25 and 26. This meet has grown to be one of the best meets held any place in the Southwest, and gives a great many colleges an opportunity to compete in a really big meet, that are not members of any conference, and therefore not eligible for conference meets.

Some exceptionally good records have been set, and with the great improvements being made on the West Texas track, several others are due to fall this year.

West Texas now has one of the best tracks in the Southwest. A 220-yard straightaway and cinders all the way around, are some of its features. Several hands have been

busy for the past two or three months getting the track and field in readiness for this meet, as well as for the Interscholastic league meet that comes a week earlier.

Last year the Great Plains meet included, for the first time, a high school section, nine high schools entered, and it is believed that there will be as many as 25 or 30 this year.

First, second and third place medals will be awarded winners in both the high school and college section, with a suitable award to the all-around man in each section.

Canyon People Attend Dairy Show Tuesday

A caravan of approximately 35 cars bearing Canyon people helped swell the crowds at the Panhandle Plains Dairy Show in Plainview, Tuesday. It was estimated that 125 Canyon people attended the show. The trip was sponsored by the Canyon Chamber of Commerce.

A large number of Randall county farmers have dairy cows entered in the show. A very creditable record was made last year by the large number of ribbons won by Randall county exhibitors.

Frank Phillips, head of the agricultural department of the College, and W. H. Upchurch, county agent, are members of the board of directors of the show, and have had an active part in aiding to make the third annual show the most successful in the history of the association.

A record in entries of 326 head of the finest dairy cows in the world is found at the show this week. A new feature of the show is a farm implement exhibit, one of the finest ever displayed in the west.

Sunrise Easter Service Planned by Student Council

A special Easter sunrise service is being planned by the Students' Religious council at the College. The service will be held on the front steps of the administration building.

Rev. E. Cecil Seaman, bishop of the Episcopal church, of Amarillo, will be the principal speaker.

The service is not a college affair, but one that will be of interest to all Canyon. Everyone is invited to attend.

The following committees are busy with the promotion of the sunrise service: D. A. Shirley is chairman of the co-operation committee, Mrs. T. V. Reeves of the advertising committee, Travis Shaw of transportation, C. W. West of traffic, Bessie Chambers of finance, and K. Savage of ushers. Programs will be distributed by the Girl Scouts.

Clean-Up a Success Says Club Chairman

Mrs. J. M. Daugherty, chairman of the Federated Club Women's clean-up drive of last week, states that the clean-up drive was successful, and more was accomplished than had been anticipated at the beginning of the campaign.

However, there are yet a few things to be done than were not completed last week that will add to the sanitation and cleanliness of the town. Mrs. Daugherty urges that the clean-up be not stopped now just because the day and week set apart for such have passed.

Let all citizens of Canyon do their part in keeping Canyon clean.

Bond Election Tied In District No. 10

The election held Saturday in connection with the school trustee election in district No. 10 for bonds to erect a new school house resulted in a tie.

The proposed bond issue was to erect a new school building to cost \$6,000 and combine the two schools of Fairview and Plains Center.

ELECTION A TIE
In the trustees election of the Tierra Blanca school, district No. 24, C. O. Jones and Henry Prichard were named. Three others tied for the third place on the ticket, and Judge B. F. Fronabarger has ordered another election to decide between Mrs. Joe Hastings, Harry Upfold and Cass Jennings.

CANYON BAKERY IMPROVES
Among recent improvements in the Canyon Bakery is a new display window built a few days ago. The place is undergoing other minor repairs and improvements.

Dallas Business Men Visitors In Canyon Friday

A special train bearing 25 executives of large Dallas business firms visited Canyon Friday morning for two hours.

The first hour was spent at breakfast on the T. & P. dining car, 15 Canyon business and professional men being guests of the Dallas visitors.

Following the breakfast, a short drive was taken over the city, ending with an inspection of the College plant. A meeting was held in the auditorium of the education building, with President J. A. Hill making the address of welcome and telling the visitors some of the outstanding points of interest regarding Randall county. Several Dallas men told of the feeling of Dallas for West Texas.

The special train was dismissed here, and an automobile trip was made to Amarillo in order that the visitors might have a chance to see more of the fine lands in Randall county.

Senator C. C. Small of Wellington was here to greet the visitors in the name of the 31st senatorial district.

Water Users Take Advantage of Rate

With today left for signing for the low rate on water during the summer months, it was expected that the total of last year would be passed by a large number.

Late yesterday afternoon Harvey Cash, city secretary, announced that 337 users of city water had signed the irrigation contract for the use of more water at a lower rate during the summer months. Today being the 10th of the month, final date for paying water bills and also for signing the irrigation contract, it is expected that the number of signers this year will surpass the 366 of last year.

Last year was the first time such an offer had been made to users of city water. The experiment was so successful and proved to be so popular that the same was repeated this year.

Governor Cuts Fuel Item for the College

Fuel, power and light for next year, amounting to \$3,000, was cut from the emergency appropriation bill for W. T. yesterday by Governor Moody. He approved the item for summer school this year, for fuel, light and power for this year, and the small contingent for next year.

Governor Moody wrote President J. A. Hill recently that he did not consider this item for next year an emergency. Mr. Hill will be forced to ask the regular session of the legislature in January for this same item, which was vetoed by the governor.

IMPROVEMENTS AT CITY PHARMACY

The City Pharmacy is adding a sky-light as an improvement to their building. They recently installed a new soda fountain and equipment.

Alabama Man is to Be Student Rec- tor of Epis. Church

Mr. Walter Henckell of Birmingham, Alabama, has just accepted the position of Student Rector of the Episcopal church.

Mr. Henckell is a candidate for the ministry of that church, and has just received his B. A. degree from the Birmingham Southern college.

He is doing post-graduate work here on his M. A. degree. Mr. Henckell is staying at the Pool home on Fifth avenue.

M. L. Dowd was a visitor in Fort Worth and Waco Sunday, where he visited and attended to business affairs.

Demonstration For Canyon Housewives at Texas Utilities

A new service has been inaugurated by the Texas Utilities company for the benefit of their patrons. The new service comes under a department known as the Home Service Department and, as the name implies, renders service to the home.

Mrs. Jordan, for a number of years connected with such companies as the Westinghouse Manufacturing Co. in demonstrating the proper use of electrical appliances, has been secured as head of the new department.

It is now located at Plainview in the home office of the Texas Utilities company. She will visit every town served by the company, and will be ready at all times to aid the housewife in securing the maximum amount of service from the electrical appliances with the use of a minimum amount of electricity.

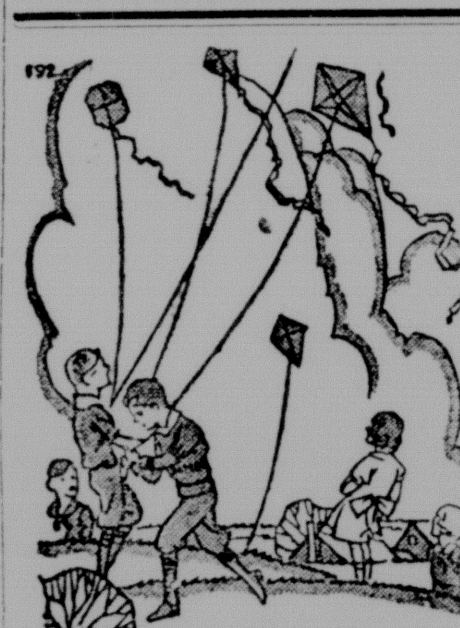

Mrs. Jordan will be at the Canyon office of the Texas Utilities company both Friday afternoon and Saturday afternoon from 2 to 5 o'clock. She will lecture and demonstrate the use of various electrical appliances at that time. An invitation is extended the ladies of Canyon to attend. Refreshments are to be served.

Man Blindfolded Is Driving to New York

Driving a car blindfolded, Rube Perkins of El Paso drove into Canyon Wednesday evening, to spend the night here. Mr. Perkins, with his wife, is driving along federal highway from El Paso to New York in the interest of the El Paso Chamber of Commerce drive to make federal highway No. 366 an all-year highway.

Mr. Perkins is making the drive blindfolded. At each town some Chamber of Commerce representative checks him in and out of the town. Byrle Elliston, vice-president of the Canyon Chamber of Commerce, checked Mr. Perkins as he arrived in Canyon last night, and blindfolded and checked him out this morning.

Mrs. E. C. Dickinson, who has been visiting her sister, Mrs. B. A. Stafford of this city, left Saturday for Lubbock, where she will visit her daughter for several days before returning to her home in Rusk.

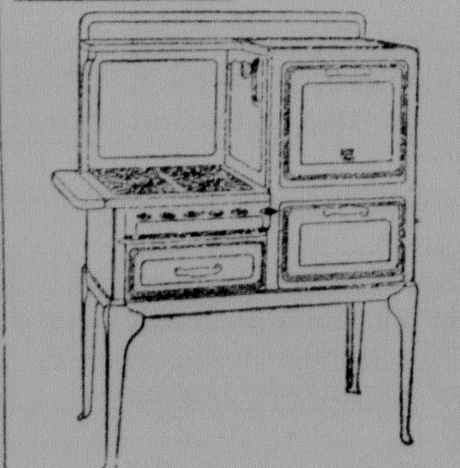

Kite-flying Time is Appetite Time

VIGOROUS outdoor play makes kids really hungry. Pies, cakes, muffins, roasts—everything tastes better baked in the Self-regulating Oven of a Clark Jewel Gas Range.

The insulated oven keeps your kitchen much cooler and saves gas. Artistic color combinations make Clark Jewel Ranges highly popular everywhere. Beautifully rounded edges and corners;

closed in manifold pipe; all steel construction; enamelled oven and broiler are other splendid features. Ask us about the new Clark Jewel today.

If you take pride in driving a clean, spic-and-span car, if you're anxious to preserve the beauty of its finish, you are interested in our Weaverized Washing Service for your convenience.

This efficient, scientific, new service is as far ahead of those old hose and bucket methods as the 1930 car is ahead of the horse and buggy. Here's our idea of real washing service:—

1. Top washed.
2. Car elevated on Curtis Lift so we can wash chassis and wheels thoroughly with high pressure stream from our Weaver Washer, that quickly removes caked mud and grease.
3. Body carefully washed with fine, velvety spray of aerated water, that gently removes dirt and dust without harming the finest finish.
4. Car carefully dried—no dripping to stain.
5. Inside of car completely vacuumed.

And if you want them—Your engine washed—fenders and body cleaned and waxed—and your top refinished with special dressing.

And you'll be pleased at our moderate charge and the prompt service we give you.

The following committees are busy with the promotion of the sunrise service: D. A. Shirley is chairman of the co-operation committee, Mrs. T. V. Reeves of the advertising committee, Travis Shaw of transportation, C. W. West of traffic, Bessie Chambers of finance, and K. Savage of ushers. Programs will be distributed by the Girl Scouts.

Clean-Up a Success Says Club Chairman

Mrs. J. M. Daugherty, chairman of the Federated Club Women's clean-up drive of last week, states that the clean-up drive was successful, and more was accomplished than had been anticipated at the beginning of the campaign.

However, there are yet a few things to be done than were not completed last week that will add to the sanitation and cleanliness of the town. Mrs. Daugherty urges that the clean-up be not stopped now just because the day and week set apart for such have passed.

Let all citizens of Canyon do their part in keeping Canyon clean.

Bond Election Tied In District No. 10

The election held Saturday in connection with the school trustee election in district No. 10 for bonds to erect a new school house resulted in a tie.

The proposed bond issue was to erect a new school building to cost \$6,000 and combine the two schools of Fairview and Plains Center.

ELECTION A TIE

In the trustees election of the Tierra Blanca school, district No. 24, C. O. Jones and Henry Prichard were named. Three others tied for the third place on the ticket, and Judge B. F. Fronabarger has ordered another election to decide between Mrs. Joe Hastings, Harry Upfold and Cass Jennings.

CANYON BAKERY IMPROVES

Among recent improvements in the Canyon Bakery is a new display window built a few days ago. The place is undergoing other minor repairs and improvements.

Dallas Business Men Visitors In Canyon Friday

A special train bearing 25 executives of large Dallas business firms visited Canyon Friday morning for two hours.

The first hour was spent at breakfast on the T. & P. dining car, 15 Canyon business and professional men being guests of the Dallas visitors.

Following the breakfast, a short drive was taken over the city, ending with an inspection of the College plant. A meeting was held in the auditorium of the education building, with President J. A. Hill making the address of welcome and telling the visitors some of the outstanding points of interest regarding Randall county. Several Dallas men told of the feeling of Dallas for West Texas.

The special train was dismissed here, and an automobile trip was made to Amarillo in order that the visitors might have a chance to see more of the fine lands in Randall county.

Senator C. C. Small of Wellington was here to greet the visitors in the name of the 31st senatorial district.

Water Users Take Advantage of Rate

With today left for signing for the low rate on water during the summer months, it was expected that the total of last year would be passed by a large number.

Late yesterday afternoon Harvey Cash, city secretary, announced that 337 users of city water had signed the irrigation contract for the use of more water at a lower rate during the summer months. Today being the 10th of the month, final date for paying water bills and also for signing the irrigation contract, it is expected that the number of signers this year will surpass the 366 of last year.

Last year was the first time such an offer had been made to users of city water. The experiment was so successful and proved to be so popular that the same was repeated this year.

Governor Cuts Fuel Item for the College

Fuel, power and light for next year, amounting to \$3,000, was cut from the emergency appropriation bill for W. T. yesterday by Governor Moody. He approved the item for summer school this year, for fuel, light and power for this year, and the small contingent for next year.

Governor Moody wrote President J. A. Hill recently that he did not consider this item for next year an emergency. Mr. Hill will be forced to ask the regular session of the legislature in January for this same item, which was vetoed by the governor.

IMPROVEMENTS AT CITY PHARMACY

The City Pharmacy is adding a sky-light as an improvement to their building. They recently installed a new soda fountain and equipment.

Alabama Man is to Be Student Rec- tor of Epis. Church

Mr. Walter Henckell of Birmingham, Alabama, has just accepted the position of Student Rector of the Episcopal church.

Mr. Henckell is a candidate for the ministry of that church, and has just received his B. A. degree from the Birmingham Southern college.

He is doing post-graduate work here on his M. A. degree. Mr. Henckell is staying at the Pool home on Fifth avenue.

M. L. Dowd was a visitor in Fort Worth and Waco Sunday, where he visited and attended to business affairs.

Demonstration For Canyon Housewives at Texas Utilities

A new service has been inaugurated by the Texas Utilities company for the benefit of their patrons. The new service comes under a department known as the Home Service Department and, as the name implies, renders service to the home.

Mrs. Jordan, for a number of years connected with such companies as the Westinghouse Manufacturing Co. in demonstrating the proper use of electrical appliances, has been secured as head of the new department.

It is now located at Plainview in the home office of the Texas Utilities company. She will visit every town served by the company, and will be ready at all times to aid the housewife in securing the maximum amount of service from the electrical appliances with the use of a minimum amount of electricity.

Mrs. Jordan will be at the Canyon office of the Texas Utilities company both Friday afternoon and Saturday afternoon from 2 to 5 o'clock. She will lecture and demonstrate the use of various electrical appliances at that time. An invitation is extended the ladies of Canyon to attend. Refreshments are to be served.

Man Blindfolded Is Driving to New York

Driving a car blindfolded, Rube Perkins of El Paso drove into Canyon Wednesday evening, to spend the night here. Mr. Perkins, with his wife, is driving along federal highway from El Paso to New York in the interest of the El Paso Chamber of Commerce drive to make federal highway No. 366 an all-year highway.

Mr. Perkins is making the drive blindfolded. At each town some Chamber of Commerce representative checks him in and out of the town. Byrle Elliston, vice-president of the Canyon Chamber of Commerce, checked Mr. Perkins as he arrived in Canyon last night, and blindfolded and checked him out this morning.

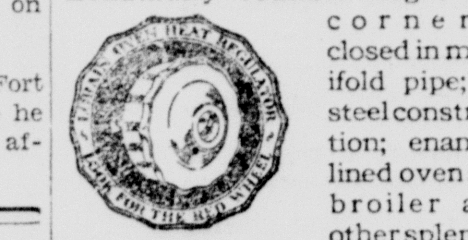

Mrs. E. C. Dickinson, who has been visiting her sister, Mrs. B. A. Stafford of this city, left Saturday for Lubbock, where she will visit her daughter for several days before returning to her home in Rusk.

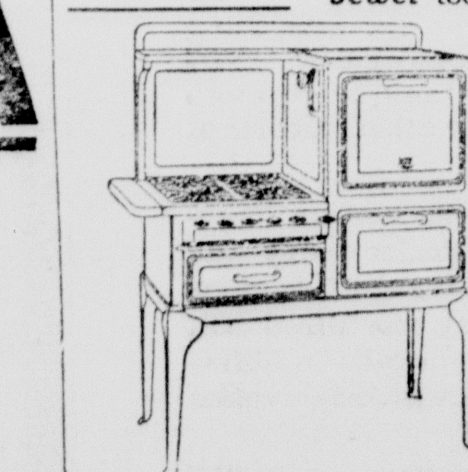

Kite-flying Time is Appetite Time

VIGOROUS outdoor play makes kids really hungry. Pies, cakes, muffins, roasts—everything tastes better baked in the Self-regulating Oven of a Clark Jewel Gas Range.

The insulated oven keeps your kitchen much cooler and saves gas. Artistic color combinations make Clark Jewel Ranges highly popular everywhere. Beautifully rounded edges and corners; closed in manifold pipe; all steel construction; enamelled oven and broiler are other splendid features. Ask us about the new Clark Jewel today.

UNLESS the Gas Range has a RED WHEEL it is NOT a LORAIN

Warwick Printing Company

"The Gift Shop"

If you take pride in driving a clean, spic-and-span car, if you're anxious to preserve the beauty of its finish, you are interested in our Weaverized Washing Service for your convenience.

This efficient, scientific, new service is as far ahead of those old hose and bucket methods as the 1930 car is ahead of the horse and buggy. Here's our idea of real washing service:—

1. Top washed.
2. Car elevated on Curtis Lift so we can wash chassis and wheels thoroughly with high pressure stream from our Weaver Washer, that quickly removes caked mud and grease.
3. Body carefully washed with fine, velvety spray of aerated water, that gently removes dirt and dust without harming the finest finish.
4. Car carefully dried—no dripping to stain.
5. Inside of car completely vacuumed.

And if you want them—Your engine washed—fenders and body cleaned and waxed—and your top refinished with special dressing.

And you'll be pleased at our moderate charge and the prompt service we give you.

Mrs. Nonnie Smith Sunday evening.

Mr. and Mrs. J. A. Meador, enroute to Plainview took Sunday dinner with their daughter, Mrs. Albert Byars.

New Water Pump Being Installed At City Plant

A new water pump is being installed at this time in the city water plant. The pump, which has a capacity of 200 gallons per minute, will double the present capacity of well number 3.

The increasing consumption in the water, together with the view of a heavy demand for the summer months, has made it necessary to install the new pump.

The pump is one of the latest models and should be able to sufficiently take care of the water supply of Canyon for some time to come.

Jowell News

School election was held at Jowell, Saturday. Louis Henders, C. O. Hayes and J. J. Leavitt were elected trustees.

Rev. Scott, pastor of the Christian church at Canyon will preach at Jowell next Sunday afternoon at three o'clock. Everybody is invited to attend.

Quite a number from this community motored to Amarillo Sunday to see the big airplane.

P. P. Dos and M. D. Randolph left early Sunday morning on a business trip to New Mexico.

Mr. and Mrs. Fred Grace are staying with Mrs. M. D. Randolph this week.

Mr. and Mrs. J. J. Leavitt and children visited with Mr. and Mrs. H. Garvin Sunday.

Mrs. W. Fewell who has been quite ill, is improving some.

Mr. and Mrs. Bill Lowe visited with friends near Tierra Blanca Sunday.

Mr. and Mrs. J. J. Leavitt and children, Mr. and Mrs. Lowe and George Glenn spent Saturday evening with Mr. and Mrs. A. L. Glenn.

J. L. Iribeck and Mr. and Mrs. Louis Iribeck were shopping in Canyon Tuesday.

Bill Sims, Norman Mangum, Clarence and Leroy Leavitt and Reece Garvin, all were Canyon visitors Sunday.

Louis Henders made a business trip to Hereford Tuesday.

CHRISTIAN ENDEAVOR

Young People's Christian Endeavor meets each Sunday evening at 7 o'clock. All young people are cordially invited to attend. The program for next Sunday, April 13, follows:

Topic, "Why Everybody Needs Christ."

Leader, Pearl Buckley.

Talks, "How does nations' treatment of each other show need of Christ?" Lorene Wherry. "Do you think the home is better or worse today than a century ago? In what ways better? Worse?" Ola Mae Baer. "Have our great industries come any nearer Christ's way in settling of strikes and labor troubles?" Freeman Curtis.

Special, Jennings Flathers.

Friona Truckman Found Unconscious Near Here Sunday

Hubert Fulk, operator of a truck line from Friona to Amarillo, was found unconscious on the highway nine miles west of Canyon about 9 o'clock Sunday morning.

When found, Mr. Fulk was sitting in the cab of his truck unconscious, while the engine of the truck was still running. He was brought to Canyon where Dr. C. E. Donnell rendered first aid. He had been overcome by carbon monoxide gas.

Mr. Fulk is said to have left Amarillo en route to Friona, late Saturday afternoon. He was expected to reach Friona late Saturday night and when he had not arrived early Sunday morning, relatives began a search for him, finding him west of town.

It is supposed that he filled the gas tank of the truck in Canyon as he passed through late Saturday. The tank was almost empty when it was found, and practically all of the oil was burned up.

Unconfirmed reports were heard on the streets of Canyon Monday that the driver who started to Friona with the truck after Mr. Fulk had been found Sunday, failed to reach Friona at the time expected, and searchers found the car broke down near Hereford, but no trace could be found of the driver.

ST. PAUL'S LUTHERAN CHURCH

Three Randall Cows Win in Show Production

Three Randall county dairymen took prizes in three of the four divisions of the production contest at the Panhandle Plains Dairy Show, Tuesday.

In the 5-year-old class, Holtex Echo Hartog Elzever, owned by H. B. Hales, produced 76 pounds of milk, 2.9 per cent, 2,237 pounds butterfat, and placed third. In the four years, and under five class, a grade Jersey owned by J. W. Watson produced 46.1 pounds of milk, 5.5 per cent, 2,569 pounds of butterfat to place 2nd. Colantha Echo Coronet, owned by R. P. Hales, in the three year and under four class, placed second by producing 54.6 pounds of milk, 3.5 per cent, 1,933 pounds butterfat.

The contest sponsored by the News-Globe covered a 24-hour period. The News-Globe offered prizes amounting to \$100. Cows from Randall county were entered in all four divisions of the production contest.

The walkin' stick is the legitimate outgrowth o' the staff so poplar as late as 1810. The staff was the natural successor o' the club which had such a run durin' the stone age. Gorillas and shepherds still carry staffs.—Abe Martin.

CACTUS CAL

Here is a letter I got yesterday:
Dear Cactus Cal:

Mr. Cactus, I'm worried. I can't sleep in classes. I don't know what could possibly be wrong with me because I stopped drinking coffee for breakfast, but still I couldn't sleep. Then I quit drinking cold drinks, but still I couldn't sleep. The only thing I have found which would do any good was sleeping powders and they made me snore and disturbed the class. What can I do, Mr. Cactus?

Always,
IMA DREAMER.

(Why don't you try listening to the lesson, that always worked for me.)

I knew I was a weather prophet. When I predicted warm weather a few weeks ago it got warm and it's still that way, and I predict a warm clear day for the rest of the day.

"The word housewife," said Mrs. Thomas A. Edison, "is the worst misnomer in our language. She should be known as a home executive."

DR. H. G. GRAINGER

Doubtless you are one of millions who have found prompt relief from that occasional headache in Bayer Aspirin. But until you invoke its aid for more serious pain, you'll endure much needless suffering! Try it for neuralgia or neuritis. Even for rheumatism. It comforts quickly, and harmlessly. Doctors prescribe it; say it does not affect the heart. *Genuine Aspirin* has Bayer on each box and tablet.

ASPIRIN
Aspirin is the trade mark of Bayer Manufacture of Monrovia, California of Germany

Boys and Girls Are Interested In Summer Games

The boys are reporting regularly for the daily baseball game. Most of the ball boys are playing almost every day at noon and four o'clock. Coach Spann seems to get as much enjoyment out of this practice as anyone.

The girls have also been having their daily baseball game at noon. Usually a large crowd are witnesses to these displays of energy. Everybody in school seems to be enjoying the sport as they have had nothing to occupy their time.

When the baseball season is over spring football will start in earnest. C. H. S. seems to have quite a bit of raw material for football, but we think this season will turn into a strong team backed by its many loyal supporters.

Tennis Takes a Place in Sports In Canyon High

Until this year there has been little or no local competition in tennis for the Interscholastic League Tournament. Last year only four or five boys were out for tennis, and of these boys, the Robinson brothers, Billie and Arthur, who were freshmen at the time, went to the tournament.

This year, it looks like they will go again despite their many opponents. The four who form the most competition for these brothers are "Sheik" McDaniels, "Pete" Hazlewood, Johnnie Pool and Ulmer Jackson.

Last year Mary Orton and Pauline Wilson were our girl representatives, but this year "Bib" Jameson, the captain-elect for the girls' basketball team and Hettie Lou Bagley will make some one lose their place.

Mr. McDonald states that tennis should be recognized more in Canyon high school.

GIRL SCOUT NEWS

Kalsomine and cretonne are all a girl scout of troop number one thinks about now. The Scout house is slowly but surely taking on a presentable appearance. All the walls are being done over, floors re-stained and windows hung with gay curtains. At present all have stopped test work to get the house finished. After about another week we think it will be finished. The money made by the candy sales this winter at basketball games is being used.

The pioneers who first built this country had to be content with houses of simple lines. The result was so good that today architects use those houses as models, while homes of the Victorian era are now strictly shunned.

Ahead lies the huge labor of stemming by prevention the rising flood of mental disorder which has its sources in the complexity jangle and scurry of modern life.

Millions of people in the east, says President Atterbury of the Pennsylvania railroad, soon will have to go a day's journey to see a steam locomotive.

Life tests us by degrees and there is nothing ever set against us that we shouldn't be able to beat or to bear.

Crime may be rife in big cities, but it is only a dim tradition in Danbury, Vt. That town has just turned its jail into a cooking school.

Dr. Ingham and Dr. Cook Speak to P. T. A. Thursday

Thursday, March 27, the P. T. A. held its regular meeting. The program was a health program planned to show health conditions and progress under Miss Ridley. It is a recognized fact among education students that a pupil's health is the biggest factor in determining a student's progress or failure. A machine cannot function properly unless in order, neither can a child do its best work unless physical mechanism is in proper order and is functioning perfectly. Bad teeth, adenoids, defective eye sight, faulty hearing, bodily defects such as are left as a result of measles, whooping cough, scarlet fever, etc., all have a tendency to retard the intellectual development of a child. If these drawbacks are not discovered in time, grave damage can be done by them to the career of the student, states Mr. Carruth.

We have many students in school today just has every other school, who are failing in school work, or who are making low grades, because of some physical disarrangement. If it were possible to keep a strict physical diagnosis of these people, and the parents would co-operate with the school and health authorities in correcting these defects, a great percent of the present failures in school would be eliminated. Many times a student shows a comparative low mental status, and to all outward appearances has a low intelligence quotient when in reality it is some physical trouble causing this poor mental showing.

All of this, Mr. Carruth continues, is very important in the daily performances of a student. A dry mouth caused by adenoids usually brings about dullness in school. Poor eye sight brings about headaches and as a consequence poorly prepared lessons. Under nourishment causes fatigue and consequently a lack of application to daily lessons. These are but a few of the many illustrations that can be given to show the importance of a constant health program being carried on in public schools.

The program brought out some important phases of our health program. Dr. Ingham gave a very interesting illustrated talk on the care of the teeth and the connection between abscessed teeth and heart trouble. Dr. Ingham stated that it was a recognized fact among leading physicians that seventy-five per cent of heart trouble was caused by abscessed teeth. Dr. Harris M. Cook of the college spoke on the importance of recreation of students and the present health condition in Canyon schools. Some very interesting and alarming facts in regard to bodily defects have been found by Miss Ridley.

Mr. Carruth states that a complete resume of the health work in public schools will be made at an early date.

It was King Edward the First of England who started the egg rolling festivals that are held at the White House on Easter. His books show that he paid 18 pence for four hundred eggs.

A correspondent writes how, in the 80's, she and her sisters had a terrible time getting their mother to wear a bustle, and later, to stop her from wearing one, they had to steal it and hide it under the barn.

Old Hen—Let me give you a piece of good advice.
Young Hen—What is it?
Old Hen—An egg a day keeps the ax away.

Negro Minstrel More Successful Than Best Hopes

The famed Louisiana Negro Minstrel and the Zander-Gump Wednesday were certainly successes.

A total of \$170 was taken in. One half of the proceeds went to the P. T. A. and one half went to the band.

It has been keenly felt for some time that the Eagle band needed uniforms like other high school bands. Hereford has a finely uniformed band, so has Tulia. So far it has been impossible to detect a member of the Eagle band from another member of the school unless he was carrying a horn. The band has recently played at the annual Chamber of Commerce and Rotary Club meeting and dairy-men's convention. It has been the consensus of opinion of most people who have heard the band play, that we have one of the best young bands in the Panhandle. It should be a part of our community's pride to back this growing organization, because it will boost the town, school systems, and on the whole be a decided asset to the entire community. It is hoped that more money can be raised for this purpose before next school session.

Music for the program was furnished by E. Burroughs with a Majestic Radio and Phonograph.

CLASS FIGHT

Tuesday, April 1, was "play day." From 3 to 4 o'clock baseball games were held between the senior girls team and the juniors, and the senior boys' team and a team made up of the other three classes. In both games the seniors were victorious, the boys winning by a large margin.

Tuesday night a severe battle took place between the seniors and the juniors. A large crowd gathered at the school house for this occasion. The juniors had a great deal of fun throwing rotten eggs at the seniors, but the latter found equal pleasure in whipping the naughty little juniors with leather straps after all the eggs were thrown. All was not fighting, however, and the girls and boys enjoyed the evening a great deal. The seniors succeeded in flying their colors during the whole fight.

The forecasts of the weather bureau have been proven 85 per cent accurate.

GASSY STOMACHS Dizziness, Indigestion

Don't worry or suffer another moment from the misery of indigestion, bloating, gas, and that suffocated, hard-to-breathe feeling after eating. Just a tablespoonful of Tanlac before eating will end all this pain and discomfort. But why suffer from these stomach troubles at all? A short course of Tanlac taken regularly before meals and bedtime will do wonders in ridding you of them for good and make you feel like a real man. Try a bottle on the basis it must help you or money back. At all drug-gists. Accept no substitute.

Girls Win Debate Over Amarillo in Chapel Thursday

Thursday afternoon at 3:00 o'clock the girls' debate team defeated the Amarillo girls debate team on the interscholastic league question. Resolved, That the Sterling Plan for Financing State Highways in Texas Should be Adopted. The girls showed skill in knocking Amarillo's arguments in the head. Thursday night the boys were defeated on the same question by Amarillo's boy debaters. This makes the girls' second win over Amarillo and the boys' second loss. The boys meet Hereford Wednesday night at 8:00 o'clock, while the girls and boys both debate Panhandle Thursday night.

SENIOR SNEAK DAY

The seniors took last Monday off and went to Harding's Ranch for a picnic. Besides Mr. McDonald, the fifty-three who went were chaperoned by Mrs. J. D. Gamble and Mrs. Jim Black.

When they got there someone turned on a portable and they danced. Then they paired off and "explored" while "Sheik" McDaniels, "Chicken" Bond, Scout Dubbs and Raymond Schmitz fished. They had good luck, catching one three-inch one and they caught several other big ones. After everyone came back, lots of eats were dealt out to many hungry mouths.

They danced some more but later the boys, including Mr. McDonald, went swimming at the "hole" while the girls waded (at a different place.) Some howling brought everybody back but they saw it was only some of the boys singing. The boys tired of this and organized (and initiated) a club in the Devil's Kitchen. The club is dissolved now.

All went home by six o'clock with their sunburned and freckled faces.

On Memorial Day, May 30, the flag should be displayed at half staff from sunrise until noon, and at full staff from noon until sunset.

Thomas A. Edison has had the same tailor for fifty years.

Part Holiday and Fight Features April Fool's Day

April Fool's Day didn't turn out so bad for C. H. S. Mr. Carruth consented to letting the school out an hour early for two baseball games.

The gallant, invincible seniors, boys and girls, challenged the rest of the school for a fast, exciting baseball game. The seniors, as usual, won. The boys fought hard and fast to win their game, while the girls by their flashy playing ran a score over the junior girls in the game of the season. Much spirit and pep were shown at both games, due to the fact that the senior boys were defeated in the Intramural basketball tournament, and sorely wished to avenge the loss.

After these games the yearly class fight began in earnest. The seniors and sophomores were fighting the juniors and freshmen. Wednesday morning the sun rose and cast its light upon the senior colors flying triumphantly from the flag pole.

Fourth Grade to Present Operetta Friday Night

Friday night at eight o'clock in the high school auditorium, the fourth grades will present the operetta, "A Rose Dream," which promises to be pretty and entertaining. The program will be about an hour long, and there will be no admission charged. Everyone is cordially invited.

The principal characters are:
Little Rose..... Jean Slack
Fairy Queen..... Billie Greenfield
Hop o' My Thumb..... Sherman Higdon
The Giant..... Jack Inman
Fairies, Roses, Elves, and the twins can and can't.

It is strange how dogs sense things. But it is these very things that make it easy to understand why God put a pair of dogs on the ark.

GRADE SCHOOL NOTES

Friday morning at eleven fifteen o'clock, the students of the grade school were entertained by the junior band and Miss Weter's expression class.

The band played "Old MacDonald" and "America," while the audience sang.

The expression department gave a play entitled, "The Infanta's Birthday." Mary May Harrison, Gladys McBride, Edith Elkins and Arma Lee Greenfield were the characters.

Since the ward school pupils do not have chapel often, this was indeed a treat.

Twenty years hence houses will have windows only to look at and out of. Air will be brought in by ducts and circulated in exactly the right condition for human use.

The Panhandle Music Festival Opens Next Week

Five world-famous artists, selected not only because they have met with the approval of critics, but because they have the reputation of pleasing their audiences, will appear on the concert programs to be given this year in connection with the seventeenth annual Panhandle Music Festival, April 16, 17, and 18. Variety was the watchword of Emil F. Myers, head of the Amarillo College of Music and veteran sponsor of artist programs in this city when he arranged his schedule for this year's festival, and he is offering a selection that he believes will please everyone. Another feature of which he is proud is the general joint recitals which have been arranged and which he believes will eliminate any past criticism of monotonous concerts.

The following night programs are announced: Wednesday, April 16, Rosalina Morini, vivacious and beautiful American girl soprano who swept an Amarillo audience off its feet last year. Thursday night, April 17, Cornelius Van Vliet, eminent Dutch cellist and Cameron McLean, baritone of the Detroit Civic Opera. Both are highly praised for their abilities to please the public.

Friday night, April 18th, Joseph Rosenstein, boy prodigy violinist of Chicago, and Paul van Katwijk, head of the piano department, S. M. U., Dallas.

Miss Morini and the Rosenstein youth will appear in joint recital Wednesday afternoon, and van Vliet and McLean will appear in a matinee Thursday. These programs are especially arranged for school children. They will be admitted for twenty-five cents (25c) each. Their parents or friends may attend for \$1.00 and \$1.50.

Season tickets for the Festival have been priced at \$3.50 and \$5.00 each. Only 300 of the \$5 seats were available when the Festival was announced and a good many of these have been sold. Advance reservations may be mailed to the College of Music, Amarillo.

With pupils from all parts of the Panhandle clamoring for entrance in the contest of the Festival, Mr. Myers is expecting the largest attendance and the strongest competition of the 17 years he has been directing these contests.

FIRST CHURCH OF CHRIST SCIENTIST

15th Street, 7th Avenue. Services every Sunday at 11 a. m. and 8 p. m. when experiences, testimonies and remarks on Christian Science are given. Sunday School meets at 9:45. All under twenty years of age are invited to attend these classes. Subject for Sunday, "Are Sin, Disease and Death, Real?" A reading room is maintained in the church from 3 to 5 p. m. on Tuesdays, Thursdays, and Saturdays where the Bible and authorized Christian Science literature may be read, purchased or borrowed. The public is cordially invited to attend these services and to visit the reading room.

Tradition is the enemy of progress.

LOCAL NEWS

Mr. and Mrs. L. P. McKee, of Cameron, N. M., spent the week end with Mrs. McKee's brother, E. H. Porter of Canyon.

J. S. Cleveland and family were Amarillo visitors Sunday.

Mr. and Mrs. W. W. Hill of Panhandle transacted business in Canyon Wednesday.

LOCAL NEWS

Mr. and Mrs. J. W. Moore removed to White Deer Saturday and will again make their home in that place. Mr. and Mrs. Moore located in Canyon several months ago, coming here from White Deer.

J. A. Reid of Hale Center was in the city Wednesday attending to business matters.

LOCAL NEWS

Dr. D. M. Stewart of Canyon attended the 28th annual convention of the Panhandle District Medical society at Amarillo, Wednesday.

J. W. Jones and E. T. Bagley of Claude were in Canyon Tuesday, looking over ranch lands here. Miss Ruby Zachry spent Tuesday in Amarillo visiting friends.

FROCKS for EASTER

Four of the styles are illustrated on this page. There are many, many more just as effective giving you the smartest dress modes of the moment.

Smart Modes

for the

New Season

Bright crepes — chiffons of vivid hue—distinctive prints! Not a single important fashion for early Spring is missing from this stock. Styles are new at 1930—details, colors, fabrics are those that have a bright future in the Spring mode—selection is varied for every occasion from business to tea time.

Plenty of Blacks and High Shades of Spring

Frocks for every type of smart femininity. For street wear — for afternoon wear—for party wear—for dancing—for office, school or day-time.

News in Canyon 25 Years Ago

(From the files of the Canyon City News, April 7, 1905)

Mrs. Walter Cobb and children came in this week on a visit to relatives here and at Tulia.

The News office is now "fixed" and capable of taking care of a great deal more business than it receives.

Miss Mattie Reed, of Pulaski, Tennessee, is visiting at her brother's, J. W. Reed's.

R. B. Redfearn is having a new fence put about his residence.

Tomorrow, President Roosevelt will be at Vernon, Texas, on his way to the hunting grounds in the Indian Territory.

Saturday at 2 p. m. the Canyon City high school team will play the Amarillo Academy Team on the flat south of the Joe Foster residence. Attorney R. A. Sowder left Fri-

day for Plainview, returning Wednesday morning.

Claude Harrison left Thursday evening of last week for Illinois on business pertaining to land matters.

Sheriff Slover got another prisoner for safe keeping Wednesday. Sheriff Inman of Deaf Smith brought him down from "the Territory." George Lewis is his name and the charge is forgery.

The lecture to be given at the Court House Friday night, April 14 by Prof. J. W. Morrison, promises to be a treat to all who attend. His subject, "Air, Sunshine and Showers and the Wireless Telegraph," will be instructive.

Saturday night a new baby boy came to the home of Mr. and Mrs. R. G. Oldham.

W. E. Laughery has rented and moved into the A. E. Brown house formerly occupied by W. W. Merrill.

Work on the phone system goes merrily on and if Canyon City grows to her poles and wires, which she most certainly will, we shall yet out-ripar Amarillo in population.

Where Ideas are Born

Wayside Items

Springlike weather prevails. Vegetation is growing, fruit trees are blooming. Some grazing in pastures, though the grass is short. Wheat growers are wishing for rain.

W. H. Rogers, wife and little folks spent last week end at Kress, visiting Mr. Jim Vaught and family. Corinne and Pauline stopping in Tulia with Mrs. J. E. Culwell and children.

Mr. and Mrs. Knox Spann left Wayside for Dimmitt Sunday.

W. I. Lane, Kenneth Knox and wife attended the "Red and White" meeting in Amarillo Monday night. We wish them success in their new line.

Eighteen ladies of Home Demonstration club and some 4-H club girls were present with Mrs. Bertha Payne Monday afternoon. After the business session a delicious plate lunch with ice cream with Easter favors was served. Miss Phillips demonstrated setting of asparagus roots in the garden. Quite a number of the club members are adding this vegetable, also rhubarb to their list of vegetables this spring. A novel sight to most of us was Mrs. Payne's capon caring for a brood of baby chicks, seemed to be on his job too.

Our next meeting will be two weeks hence in Happy Canyon on the picnic grounds. Will take lunch and expect a big time.

Mrs. Jack Plant and Jack Jr. left Wednesday for Snyder to visit her mother.

Jack Dale Knox is visiting with his sister, Mrs. Ethel May Gillham.

We are glad to report an improvement in Mrs. Spann's health. Mrs. Lou Gillham is suffering with an infection of the eyes. Glad to report they are better.

Mrs. Wyatt Heisler is in Amarillo for treatment, returning with

Mrs. Flora Stoddard last week.

Quite a number of Waysiders attended all day singing at Valley View Sunday. An elegant dinner and a big crowd. Fine singing, too.

Umbarger Items

A signal honor was rendered the community last week when Miss Annie Keeley was elected to the Kappa Gamma Society, a teachers honorary sorority. Miss Keeley represents the rural teachers of Potter and Randall counties. She attended the banquet given at the Capitol Hotel at Amarillo Friday evening.

A birthday dinner and card party honoring Mr. Clark Dowling was given at the teacherage March 30. Those present were: Messrs. Clark Dowling, Henry Beckman, Shorty Jansen, Sam Linton of Amarillo, and Misses Leah Teagler, Minnie Jansen, Ruth Irwin, Bernice Dowling and the hostess, Miss Annie Keeley.

Mr. and Mrs. Henry Batenhorst and children, and Mr. and Mrs. Ben Koch, returned last Friday from Cedar Rapids, Nebraska, where they have been visiting with relatives and friends.

Frank Schule left Tuesday morning for Cedar Rapids, Nebraska.

Miss Katie Erdman entertained a number of friends with a "42" party Sunday evening.

Charlie Friemel returned last week from Akarcha, Okla.

Mr. and Mrs. Walter Hess are moving to their new home near Hereford.

Henry Iribeck is driving a new Ford Coupe.

Miss Dorothy Beckman has started her work as a census taker.

Miss Leah Teagler spent the week end in Amarillo.

Mr. and Mrs. M. Rhodes left Sunday for Mississippi where they

will visit with friends and relatives.

Miss Annie Stocker of Amarillo spent Sunday with her parents, Mr. and Mrs. Leo Stocker.

The people of the Dawn community presented a four act comedy drama here Monday night. There was a large crowd attended.

Mrs. J. H. Irwin who has been visiting with relatives at Byers, Texas, returned Monday evening.

Mr. and Mrs. Fred Beckman and children were in Hereford Sunday.

Zita Breezes

The P. T. A. was held Saturday night. The Burch school rendered us a very good program which was enjoyed by all.

Mr. and Mrs. C. C. Stewart and family and Mr. and Mrs. H. R. Fulton, visited at the L. J. Fulton home Sunday.

H. B. Hales and Jim Watson are at the Plainview Dairy Show. They both took cows.

Mr. and Mrs. H. R. Fulton visited in Amarillo Sunday.

Mrs. H. B. Hales and family spent Sunday in Amarillo.

We all enjoyed the beautiful weather we have had the past week.

A newly discovered planet bears the name "Hooveria," after Herbert Hoover. Perhaps this is the lucky star of the overburdened man in the White House.

The dining room promises soon to be as rare as a "best parlor." Even in the finest homes, the breakfast alcove is replacing it.

Are You Successful?

From the day that a young man starts out to seek his first position to the end of his business life, his health and personal appearance have a world to do with his success. If you are not physically up to the mark—appetite uncertain, digestion poor, and a general sense of incapacity and weakness, take DR. PIERCE'S GOLDEN MEDICAL DISCOVERY. It renews the blood with the vital life-giving red corpuscles and promotes robust health, a clear skin, energy, pep. Get "GMD" from your druggist in either fluid or tablets. Ingredients printed on label.

The man who plays golf all day Sunday thinks he's building up his body. He's tearing it down.

BUFFALO CAGE RECORD VALUED BY N. Y. TIMES

STORY ON NINE YEAR AVERAGE IS RUN ON SPORTS PAGE; HAZLEWOOD SENDS STORY.

Much interest and enthusiasm was created in W. T. last week by the receipt of a sports page from the Sunday, March 9, New York Times, in which appeared a story on the W. T. Buffaloes basketball record, under the head: "Quintet Has Winning Avg. of 83.7 for Nine Year Period." Emmett Hazlewood, an ex-student now in Ithaca, N. Y., sent the paper, accompanied by a letter, from which we quote the following: "The Times rarely publishes anything in the way of sports from the Southwest, having flatly refused to

publish accounts of even the biggest Texas football games last fall.

"I got to see only one of the so-called 'big league' basketball games here, one in which Cornell defeated the strong Yale team. I do not know enough about basketball to speak authoritatively on the relative merits of the teams, but so far as I could tell neither of them had a well-planned and strong offense. Apparently, the main idea of each team was to keep the other team from scoring, and then trust to luck to garner a few lucky points for itself. After seeing that game, which by the way was considered a good one, I have consistently maintained that the Buffaloes could lick the tar out of any bunch in this neck of the woods, unless it might be Columbia and Syracuse, neither of which have I seen in action.

"By the way, another case of West Texas news getting scattered in foreign parts is the rumor that Preach Fuller knocked down a full fifteen hours course last fall for slightly better than a 'C' average, in addition to displaying his athletic ability on the gridiron. If this is true, please pass on to him my heartiest congratulations.

"Ann joins me in expressing the hope that all of your teams in the future may, as they have in the past, be such as will excite the admiration and respect of all incoming students as they have ours in the past."

Osgoods and Brown Will Tour Europe For Summer Months

One of the most interesting of the many European tours being planned by W. T. faculty members for the coming summer is the literary and dramatic pilgrimage to be made by Mr. and Mrs. Osgood, Miss Mary Morgan Brown, and Miss Sarah M. Ellwood of Great Falls, Montana, a friend of the Osgoods.

The party will leave New Orleans June 4, sailing to New York, where they expect to enjoy the summer theater, and do their final shopping preparatory to leaving for Europe on the twelfth of that month. They will sail on the "Minnequa" for Copenhagen, Denmark.

While in Copenhagen, they plan to visit Elsinor Castle, see the grave of Hamlet, and attend performances at the celebrated "Pantomime Theater."

From Copenhagen the party will sail to Amsterdam, Holland; and from there to many of the other important centers of literary and dramatic culture in England, Wales, Scotland, France, Germany and, if time permits, Switzerland and Italy. The group will return in time for Mr. Osgood and Miss Brown to resume their teaching duties at the beginning of the fall quarter.

"In our diet we need copper as well as iron," says a hemoglobin expert. Why not zinc and lead also? Enough people already have plenty of brass.

The modern kitchen has had its face lifted, its hair curled and its position established as one of the most charming rooms in the house.

JONES TALKS ON RELATIONS CLUB WORK

NOW OVER 190 CLUBS ORGANIZED IN NATION; SPEAKER COMPLIMENTS WORK HERE.

Those who were fortunate enough to hear Miss Amy Hemmings Jones speak on "The Work of International Relations Clubs in Colleges and Universities," at 3:30 o'clock last Thursday afternoon received much benefit from her lecture.

Miss Jones stated that there are now in existence one hundred and ninety clubs scattered over the United States from Florida to Maine and from Texas to Canada. These clubs are not only located in the United States but are to be found all over the world. The club is one whose chief purpose is to promote the understanding and the study of international affairs and conditions.

Miss Jones said many complimentary things concerning the work of the club here. She expressed her pleasure upon finding so many interested in the work in this college, and stated that the group here was much larger than in some colleges of much larger enrollment.

The need for an understanding of foreign affairs and relations was stressed in the course of the lecture.

THE STATE OF TEXAS.

County of Randall.
The City of Canyon vs. F. N. Henderson, et al. Condemnation Proceedings before the County Judge of Randall County, Texas.
We, G. G. Foster, W. C. Black and Grady Oldham, of Randall County, Texas, as special commissioners so appointed by B. F. Fronabarger, County Judge of Randall County, Texas, on the 19th day of March, A. D. 1930, to hear the petitioners and claimants in the matter of the condemnation proceedings in the cause of the City of Canyon vs. F. N. Henderson, et al. said appointment being by virtue of petition filed herein by the said City of Canyon acting by and through its duly elected mayor and city Commissioners in compliance with a resolution of the said Mayor and said Commissioners of the said City of Canyon passed on the 3rd day of February, A. D. 1930, as follows:

To alter 23rd street in said City by widening the said street from its beginning at the south corporate limits of the said City of Canyon to the intersection of said street with 10th Avenue in said city according to the map or plat of the said city and streets therein, on file and of record in the office of the County Clerk of Randall County, Texas, to the width of 100 feet, and we the above named and undersigned commissioners having been duly sworn as the law directs to assess the damages to the owners of the property herein sought to be condemned fairly and impartially and in accordance with the law, do hereby appoint, as the time and place for hearing said petitioners and said claimants and all matters hereto pertaining, the office of the said G. G. Foster in Canyon, Texas, on the 17th day of April, A. D. 1930.

And we do hereby notify F. N. Henderson, Otto White, John Fry, Geo. Mason, Jacob Speckinger, R. W. Brown, D. F. Merrell, Sarah Mason and P. E. Yordy, and any and all persons holding or claiming any right, title, interest, lien or claim in or to said land or any part thereof, to-wit: The East 25 feet of each of the following lots, to-wit:

Lot	Block	Addition
21	21	Normal
8	21	Normal
1	22	Normal
3	22	Normal
1	29	Normal
8	29	Normal
1	30	Normal

That we will on the 17th day of April, A. D. 1930 at 10 o'clock A. M. at the office of the said G. G. Foster of Canyon, Texas, proceed to assess said damages fairly and impartially in accordance with the law.

Witness our hand this the 19th day of March, A. D. 1930.
G. G. FOSTER

GRADY OLDHAM

Relieve that Pain

DOES pain ruin your temper, spoil your looks, interfere with your business or pleasure? Millions of sufferers from Neuralgic Pains, Functional Pains, Ordinary Headache, Simple Neuralgia have found relief by using DR. MILES' Anti-Pain Pills

Why don't you try them? At all drug stores. 25 for 25 cents. 125 for \$1.00.

YOU'LL GET RELIEF—OR YOUR MONEY BACK

ture along with three other things that everyone should know. Everyone should know and understand the interdependence of peoples and nations; one should know that we have the machinery to settle international disputes at the present time. Miss Jones stated that there is a disposition on the part of the people to study for facts alone. The Chinese are accustomed to study and meditate, while most people merely study.

Miss Jones' visit here was primarily to see that the club was functioning, and to offer aid and suggestions.

P.P.H.S. Banquet to Have Hand Blocked Programs This Year

The annual meeting of the Palmetto-Plains Historical Society always has several special features, and this year there will be one of more than usual interest for the folders which enclose the programs will be hand blocked.

The wood blocks which are used were made by Miss Isabel Robinson, head of the art department of the West Texas State Teachers College, and the printing was done by her with the assistance of Miss Hattie M. Anderson.

The caption beneath the woodcut is "Pioneer Plainsman" but those who knew him will instantly recognize the figure of Colonel C. C. Goodnight on his favorite horse.

These programs will be used as place cards at the banquet and will be souvenirs of the occasion.

Now that kitchen utensils are being manufactured in colors, the pot probably calls the kettle jade green.

SHERWIN-WILLIAMS PAINT HEADQUARTERS

Specify S-W Enameloid and engage a good painter

Enameloid makes worn surfaces look like new

Dries rapidly without sacrifice of quality or beauty

Do you realize that you can bring the modern beauty of color into every room in your home at a few dollars' cost? S-W Enameloid, the new rapid-drying enamel, makes this possible. Here

is a decorative enamel of proved quality. A remarkably hard, smooth, long-wearing finish. Rapid drying that robs neither quality nor beauty nor durability. Brings the sparkling life and charm of color to furniture, woodwork, toys, porch furniture, walls—covers drab, worn, as well as new surfaces. Brushes easily to a satiny porcelain-like finish. Come in and see the wide range of rich, true colors in which this superb modern enamel can be obtained.

FRIDAY AND SATURDAY SUGGESTIONS

S-W Enameloid

The rapid-drying decorative enamel. The world's finest decorative enamel. Dries rapidly without sacrificing beauty or durability. Ideal for use on woodwork, furniture, toys, porch and lawn furniture and all similar wood or metal surfaces around the home.

S-W Semi-Lustre

An interior paint with the hard-drying and washable qualities of enamel. Dries with half-enamel gloss.

S-W Floor Enamel

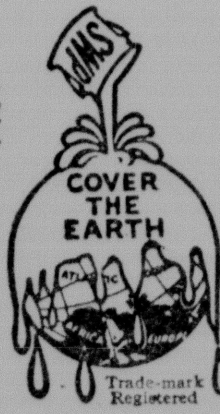

A beautiful enamel finish for wood, concrete or linoleum floors. Withstands daily scrubbing and tramping heels.

S-W Porch and Deck Paint

Especially prepared to withstand outside exposure and hard wear on porch floors, steps, decks of boats, etc.

S-W Flat-Tone

A washable flat wall paint for interior decorations. Produces beautiful velvet finish on plaster or wallboard.

BUFFALO CAGE RECORD VALUED BY N. Y. TIMES

STORY ON NINE YEAR AVERAGE IS RUN ON SPORTS PAGE; HAZLEWOOD SENDS STORY.

Much interest and enthusiasm was created in W. T. last week by the receipt of a sports page from the Sunday, March 9, New York Times, in which appeared a story on the W. T. Buffaloes basketball record, under the head: "Quintet Has Winning Avg. of .837 for Nine Year Period." Emmett Hazelwood, an ex-student now in Ithaca, N. Y., sent the paper, accompanied by a letter, from which we quote the following: "The Times rarely publishes anything in the way of sports from the Southwest, having flatly refused to

publish accounts of even the biggest Texas football games last fall.

"I got to see only one of the so-called 'big league' basketball games here, one in which Cornell defeated the strong Yale team. I do not know enough about basketball to speak authoritatively on the relative merits of the teams, but so far as I could tell neither of them had a well-planned and strong offense. Apparently, the main idea of each team was to keep the other team from scoring, and then trust to luck to garner a few lucky points for itself. After seeing that game, which by the way was considered a good one, I have consistently maintained that the Buffaloes could lick the tar out of any bunch in this neck of the woods, unless it might be Columbia and Syracuse, neither of which have I seen in action.

"By the way, another case of West Texas news getting scattered in foreign parts is the rumor that Preach Fuller knocked down a full fifteen hours course last fall for slightly better than a 'C' average, in addition to displaying his athletic ability on the gridiron. If this is true, please pass on to him my heartfelt congratulations.

"Ann joins me in expressing the hope that all of your teams in the future may, as they have in the past, be such as will excite the admiration and respect of all incoming students as they have ours in the past."

Osgoods and Brown Will Tour Europe For Summer Months

One of the most interesting of the many European tours being planned by W. T. faculty members for the coming summer is the literary and dramatic pilgrimage to be made by Mr. and Mrs. Osgood, Miss Mary Morgan Brown, and Miss Sarah M. Ellwood of Great Falls, Montana, a friend of the Osgoods.

The party will leave New Orleans June 4, sailing to New York, where they expect to enjoy the summer theater, and do their final shopping preparatory to leaving for Europe on the twelfth of that month. They will sail on the "Minnequa" for Copenhagen, Denmark.

While in Copenhagen, they plan to visit Elsinor Castle, see the grave of Hamlet, and attend performances at the celebrated "Pantomime Theater."

From Copenhagen the party will sail to Amsterdam, Holland; and from there to many of the other important centers of literary and dramatic culture in England, Wales, Scotland, France, Germany and, if time permits, Switzerland and Italy.

The group will return in time for Mr. Osgood and Miss Brown to resume their teaching duties at the beginning of the fall quarter.

"In our diet we need copper as well as iron," says a hemoglobin expert. Why not zinc and lead also? Enough people already have plenty of brass.

The modern kitchen has had its face lifted, its hair curled and its position established as one of the most charming rooms in the house.

JONES TALKS ON RELATIONS CLUB WORK

NOW OVER 190 CLUBS ORGANIZED IN NATION; SPEAKER COMPLIMENTS WORK HERE.

Those who were fortunate enough to hear Miss Amy Hemmway Jones speak on "The Work of International Relations Clubs in Colleges and Universities," at 3:30 o'clock last Thursday afternoon received much benefit from her lecture.

Miss Jones stated that there are now in existence one hundred and ninety clubs scattered over the United States from Florida to Maine and from Texas to Canada. These clubs are not only located in the United States but are to be found all over the world. The club is one whose chief purpose is to promote the understanding and the study of international affairs and conditions.

Miss Jones said many complimentary things concerning the work of the club here. She expressed her pleasure upon finding so many interested in the work in this college, and stated that the group here was much larger than in some colleges of much larger enrollment.

The need for an understanding of foreign affairs and relations was stressed in the course of the lecture.

THE STATE OF TEXAS.
County of Randall.
The City of Canyon vs. F. N. Henderson, et al. Condemnation Proceedings before the County Judge of Randall County, Texas.

We, G. G. Foster, W. G. Black and Grady Oldham, of Randall County, Texas, as special commissioners so appointed by B. F. Fronabarger, County Judge of Randall County, Texas, on the 19th day of March, A. D. 1930, to hear the petitioners and claimants in the matter of the condemnation proceedings in the cause of the City of Canyon vs. F. N. Henderson, et al. said appointment being by virtue of petition filed herein by the said City of Canyon acting by and through its duly elected mayor and city Commissioners in compliance with a resolution of the said Mayor and said Commissioners of the said City of Canyon passed on the 3rd day of February, A. D. 1930, as follows:

To alter 23rd street in said City by widening the said street from its beginning at the south corporate limits of the said City of Canyon to the intersection of said street with 10th Avenue in said city according to the map or plat of the said city and streets therein, on file and of record in the office of the County Clerk of Randall County, Texas, to the width of 100 feet, and we the above named and undersigned commissioners having been duly sworn as the law directs to assess the damages to the owners of the property herein sought to be condemned fairly and impartially and in accordance with the law, do hereby appoint, as the time and place for hearing said petitioners and said claimants and all matters hereto pertaining, the office of the said G. G. Foster in Canyon, Texas, on the 17th day of April, A. D. 1930.

And we do hereby notify F. N. Henderson, Otto White, John Fry, Geo. Mason, Jacob Specktinger, R. W. Brown, D. F. Merrell, Sarah Mason and P. E. Yordy, and any and all persons holding or claiming any right, title, interest, lien or claim in or to said land or any part thereof, to-wit: The East 25 feet of each of the following lots, to-wit:

Lot	Block	Addition
1	21	Normal
8	21	Normal
1	22	Normal
8	22	Normal
1	29	Normal
8	29	Normal
1	30	Normal

That we will on the 17th day of April, A. D. 1930 at 10 o'clock A. M. at the office of the said G. G. Foster of Canyon, Texas, proceed to assess said damages fairly and impartially in accordance with the law.

Witness our hand this the 19th day of March, A. D. 1930.

G. G. FOSTER
W. G. BLACK
GRADY OLDHAM.

Relieve that Pain

DOES pain ruin your temper, spoil your looks, interfere with your business or pleasure? Millions of sufferers from

ture along with three other things that everyone should know. Everyone should know and understand the interdependence of peoples and nations; one should know that we have the machinery to settle international disputes at the present time. Miss Jones stated that there is a disposition on the part of the people to study for facts alone. The Chinese are accustomed to study and meditate, while most people merely study.

Miss Jones' visit here was primarily to see that the club was functioning, and to offer aid and suggestions.

P.P.H.S. Banquet to Have Hand Blocked Programs This Year

The annual meeting of the Palmetto-Plains Historical Society always has several special features, and this year there will be one of more than usual interest for the folders which enclose the programs will be hand blocked.

The wood blocks which are used were made by Miss Isabel Robinson, head of the art department of the West Texas State Teachers College, and the printing was done by her with the assistance of Miss Hattie M. Anderson.

The caption beneath the woodcut is "Pioneer Plainsman" but those who knew him will instantly recognize the figure of Colonel C. C. Goodnight on his favorite horse.

These programs will be used as place cards at the banquet and will be souvenirs of the occasion.

Now that kitchen utensils are being manufactured in colors, the pot probably calls the kettle jade green.

SHERWIN-WILLIAMS PAINT HEADQUARTERS

Specify S.W. Enameloid and engage a good painter

Enameloid makes worn surfaces look like new

Dries rapidly without sacrifice of quality or beauty

Do you realize that you can bring the modern beauty of color into every room in your home at a few dollars' cost? S-W Enameloid, the new rapid-drying enamel, makes this possible. Here

is a decorative enamel of proved quality. A remarkably hard, smooth, long-wearing finish. Rapid drying that robs neither quality nor beauty nor durability. Brings the sparkling life and charm of color to furniture, woodwork, toys, porch furniture, walls—covers drab, worn, as well as new surfaces. Brushes easily to a satiny porcelain-like finish. Come in and see the wide range of rich, true colors in which this superb modern enamel can be obtained.

FRIDAY AND SATURDAY SUGGESTIONS

S-W Enameloid

The rapid-drying decorative enamel. The world's finest decorative enamel. Dries rapidly without sacrificing beauty or durability. Ideal for use on woodwork, furniture, toys, porch and lawn furniture and all similar wood or metal surfaces around the home.

S-W Semi-Lustre

An interior paint with the hard-drying and washable qualities of enamel. Dries with half-enamel gloss.

S-W Floor Enamel

A beautiful enamel finish for wood, concrete or linoleum floors. Withstands daily scrubbing and tramping heels.

S-W Porch and Deck Paint

Especially prepared to withstand outside exposure and hard wear on porch floors, steps, decks of boats, etc.

S-W Flat-Tone

A washable flat wall paint for interior decorations. Produces beautiful velvet finish on plaster, or wallboard.

KEEP THE CHICKENS OUT WE'VE GOT THE WIRE—GARDEN TOOLS Too.

Miss Madeline Kyle and Jasper Atkins are Wed at Clovis

An event of widespread interest among local people and quite a surprise to a number of Canyonites, was the announcement of the marriage of Miss Madeline Kyle and Jasper Atkins, both of this city, which was solemnized at Clovis, N. M., Friday, April 4.

The bride is the accomplished daughter of Mr. and Mrs. H. C. Kyle of Canyon and is well known here. She is an ex-student of Canyon high school and was numbered among the schools' celebrities in her senior year in that institution. Following her graduation from high school she studied art in the West Texas State Teachers College.

Mr. Atkins is the son of Mrs. R.

W. Ratcliff of this city, and is a popular member of the younger set. He graduated from high school here and was a student in the West Texas State Teachers College at the time of his marriage. Mr. Atkins has been associated with the Foxworth-Galbraith Lumber company, in the position of bookkeeper, for the past two years.

The couple will make their home in Canyon temporarily.

CLASS ENTERTAINS

The King's Daughters Sunday school class of the Baptist church entertained their husbands with a social last Thursday evening at the home of Mrs. Harry Burtz.

After the devotional and a short business meeting, the social committee took charge of the program. Bible contests, spelling bees, mock debates, and like contests characterized the evening's entertainment.

Delectable refreshments were served to 29 guests and class members.

MISS FOSTER IS HOSTESS

Miss Lenna Foster entertained a few of her intimate friends with a dinner party at her home Sunday evening.

The guests arrived at 7 o'clock and enjoyed a delicious repast prepared by the hostess. After dinner, radio music furnished the entertainment for the evening.

Guests present for this delightful affair included: Miss Lola Pinson, Miss Ruth Wiseman, Miss Ruth McGowan, and George Murphy, Delbert Lowes, Julian Glenn, and Otis Burk.

PARTY AT INGHAM HOME

Mrs. S. L. Ingham and Mrs. D. A. Shirley were charming hostesses Thursday evening when they entertained a number of their friends with bridge at the home of Mr. and Mrs. Ingham, 1204 Fifth avenue.

Orange calendulas and white daffodils were lovely decorations in the entertaining suite, where eight tables were arranged for the guests. An Easter motif was followed in the delicious refreshment plate and favors of tiny chicks were presented each guest.

AMERICAN LEGION PARTY

Mrs. R. E. Harter, Mrs. Tom Knighton, and Mrs. R. E. Ball were hostesses to the members of the local American Legion post and the Auxiliary at the Legion hall Tuesday evening.

Bridge was the chosen diversion, and eight tables were arranged for the players. The Easter motif was carried out in the decorations and the delicious refreshment plate served at the conclusion of the games.

HUSBANDS ARE ENTERTAINED

Members of the Blue Bonnet Needle club entertained their husbands with a bountiful and delicious chicken dinner at the home of Mr. and Mrs. W. H. Upchurch, Friday evening. Each lady prepared a special dish and the beautifully appointed table was laden with delectable viands.

"Forty-two" was the chosen diversion for the evening. Twenty-seven guests were present at this enjoyable affair.

W. M. S. ENTERTAINED

Mrs. Clyde McElroy, Mrs. W. H. Stroud, and Mrs. M. B. Orton were hostesses to the members of the Methodist Women's Missionary society at the home of Mrs. McElroy Tuesday afternoon.

The guests assembled at 3 o'clock. An interesting program was given under the direction of Mrs. Marian Witt, Mrs. M. C. DeGraffenreid, and Mrs. McElroy. Miss Oressa Hastings and Miss Elizabeth Paulkner favored the club with special violin selections. Delectable refreshments were served by the hostesses at the conclusion of the program.

The society will meet Tuesday, April 15, at 3 o'clock in the ladies' parlor of the Methodist church. The lesson study for the day will be "Industrialism," and each member is asked to respond to roll call with a current event.

MRS. KING IS SHOWED

Mrs. J. M. King entertained the members of the Blue Bonnet Needle club and several special guests at her home Thursday afternoon. Members responded to roll call by giving the county and state in which each was born.

The feature of the afternoon was the surprise miscellaneous shower given Mrs. King by the members in celebration of her birthday anniversary.

Refreshments were served to 18, including the following special guests: Mrs. Walker, Mrs. Lowes, Mrs. Rhodes, and Mrs. Woods.

LOYAL DOZEN MEET

Members of the Loyal Dozen Needle club met Friday afternoon with Mrs. Bill Simmons as hostess. A pleasant afternoon was spent in needle work. Delicious refreshments of angel food cake and pineapple sherbet were served to the following:

Mrs. Clifton Duke, Mrs. J. Prichard, Mrs. Johnnie Gazaway, Mrs. Felix Pierce, Mrs. Victor Steen, Mrs. N. T. Dickerson, Mrs. Ed Phillips, and Mrs. Harry Inman.

Mrs. Victor Steen will entertain the club members at the next meeting, Friday, April 11.

AFFAIR AT LEGION HALL

One of the largest and most entertaining affairs of the spring season took place at the American Legion hall Wednesday evening when Mrs. Travis Shaw, Mrs. J. W. Kleinschmidt, Mrs. Guy Harp and Mrs. Tom Knighton entertained with 20 tables of bridge.

Ferns and spring flowers were arranged as decorations in the hall. At the conclusion of the play, delectable refreshments were served by the hostesses.

MRS. FOSTER IS HOSTESS

Mrs. Lee Foster was hostess to the members of the Las Senoras Nuevas bridge club and a number of special guests at her home Wednesday afternoon. The Easter motif was featured in the accessories of the five tables arranged for the players. Easter colors were repeated in the delicious refreshment plate of pressed chicken, salad, sandwiches, cake, fruit whip, mints and punch served at the conclusion of the games.

Special guests included: Mrs. Oscar

Gano, Mrs. Etta Henderson, Mrs. Dewey Foster, Mrs. George Allen Farlow, Mrs. Frank Hicks, Mrs. Jim Green, Mrs. S. B. Lowder, Mrs. J. J. Walker, and Mrs. Everett Lemons of Lubbock.

McCLURES TO AUSTIN

Mr. and Mrs. S. B. McClure, accompanied by their daughter, Miss Iona Pearl, and Mr. and Mrs. Hobart McManigal and daughter Doris Jean of Happy, left Thursday morning for Austin, where they will attend the round-up of Texas Exes and the events of Dad's and Mother's Day. The party will also visit with Boone McClure, who is a student in the university.

STORK SPECIALS

Mr. and Mrs. C. L. Gordon Cumming announce the arrival of a granddaughter, born Monday, April 7, to Mr. and Mrs. C. C. Herrington, 310 Alabama street, Amarillo, Texas. The little miss has been christened Phyllis Rae.

Born, to Mr. and Mrs. Clinton Carter, a 9-pound girl, Wednesday, April 9.

"UNCLE DAVID" IMPROVING

"Uncle David" Thomas, who has been confined to his bed at his home in the south part of town for the past two months, is reported to be in an improved condition. "Uncle David" is one of the city's pioneers, and many wishes are expressed for his complete recovery.

Konjola Only Medicine That Did Any Good

New Medicine Banished Kidney and Stomach Ailments After Others Failed.

MR. M. D. ABBOTT

"I suffered for two years with kidney trouble," said Mr. M. D. Abbott, 600 East Hattie Street, Fort Worth. "I have scarcely been able to do any work. Lifting, or turning my body was the signal for severe back pains. Night risings were frequent. My stomach, too, added to my misery. Anything I ate caused gas and a severe pain in the pit of my stomach."

"Konjola is the only medicine that did me any good. I now feel better than I have for many a day. I can eat what I wish without suffering and the pains in my back are gone. My kidneys now are functioning normally. Konjola has gone right to the spot in my case and I praise this wonderful medicine for what it has done for me. A medicine that did all Konjola did for me can help others and I am recommending it to a lot of my friends who are suffering as I did."

Konjola is not a "cure-all." There is no such thing. But when taken for from six to eight weeks, Konjola will produce amazing results. The countless thousands of endorsements of Konjola have proven that it makes good, even in the most stubborn cases.

Konjola is sold in Canyon at the Jarrett Drug store, and by all the best druggists in all towns throughout this entire section.

Konjola Only Medicine That Did Any Good

New Medicine Banished Kidney and Stomach Ailments After Others Failed.

MR. M. D. ABBOTT

"I suffered for two years with kidney trouble," said Mr. M. D. Abbott, 600 East Hattie Street, Fort Worth. "I have scarcely been able to do any work. Lifting, or turning my body was the signal for severe back pains. Night risings were frequent. My stomach, too, added to my misery. Anything I ate caused gas and a severe pain in the pit of my stomach."

"Konjola is the only medicine that did me any good. I now feel better than I have for many a day. I can eat what I wish without suffering and the pains in my back are gone. My kidneys now are functioning normally. Konjola has gone right to the spot in my case and I praise this wonderful medicine for what it has done for me. A medicine that did all Konjola did for me can help others and I am recommending it to a lot of my friends who are suffering as I did."

Konjola is not a "cure-all." There is no such thing. But when taken for from six to eight weeks, Konjola will produce amazing results. The countless thousands of endorsements of Konjola have proven that it makes good, even in the most stubborn cases.

Konjola is sold in Canyon at the Jarrett Drug store, and by all the best druggists in all towns throughout this entire section.

The Houston-Love-Jennings Feud

By M. K. WYATT

(Copyright, 1930, by the Home Color Print Co.)

AN '89er who pioneered into Indian Territory when it was a frontiersman's country and later held high office in the State of Oklahoma was Jack Love, a Texan six feet and six inches tall. He first saw the light of day beneath a Virginia sky, his family being the Love family who figured prominently in Revolutionary and Colonial history of Virginia and the Carolinas. When Jack was but a small child the family immigrated to the western plains of Texas, where he grew to manhood.

Love's father died when he was a boy and the care of his mother fell upon his youthful shoulders. On this account he was eighteen years old before he had obtained much education. But this did not discourage young Jack, for he soon made up the lost time and became a school teacher.

Possessed with a background of admirable traits and stamina characteristic of the Oklahoma pioneer, it was no wonder that Love was picked by President Cleveland for the appointment of Deputy United States marshal.

Stakes a Claim

Before this appointment Love had moved to Oklahoma City and opened a furniture store. But when the Cherokee Strip "run" was made on September 16, 1893, he decided "to be on hand." The "Strip" was part of old Indian Territory, once the abode of the Cherokee Indian. This was a narrow strip, fifty miles wide, reserved across the northern edge of what is now Oklahoma in order that the Cherokee Indians might have a free passage to the buffalo hunting grounds. Thus it became known as the "Cherokee Strip." When the government decided to open the strip to white settlement \$8,000,000 was paid to the Cherokees to relinquish title thereto.

On that momentous day, when men gathered along the boundaries of the former Indian country, awaiting the firing of the shot which would announce the moment when homesteaders were allowed to go in and choose their sites, Love was ready with a light camping outfit, a covered wagon, a riding horse and plenty of food. Coming in fast with the leaders, he staked a claim on which he filed near Sharon, in what is today

Woodward county, northwestern Oklahoma. He built a two-room shack on his claim and lived in this little rude hut, typical of the time and place, with a negro man to cook and to look after things generally. He stocked the claim with cattle and horses and, with the thriftiness characteristic of his ancestors, came to be worth "quite a sum."

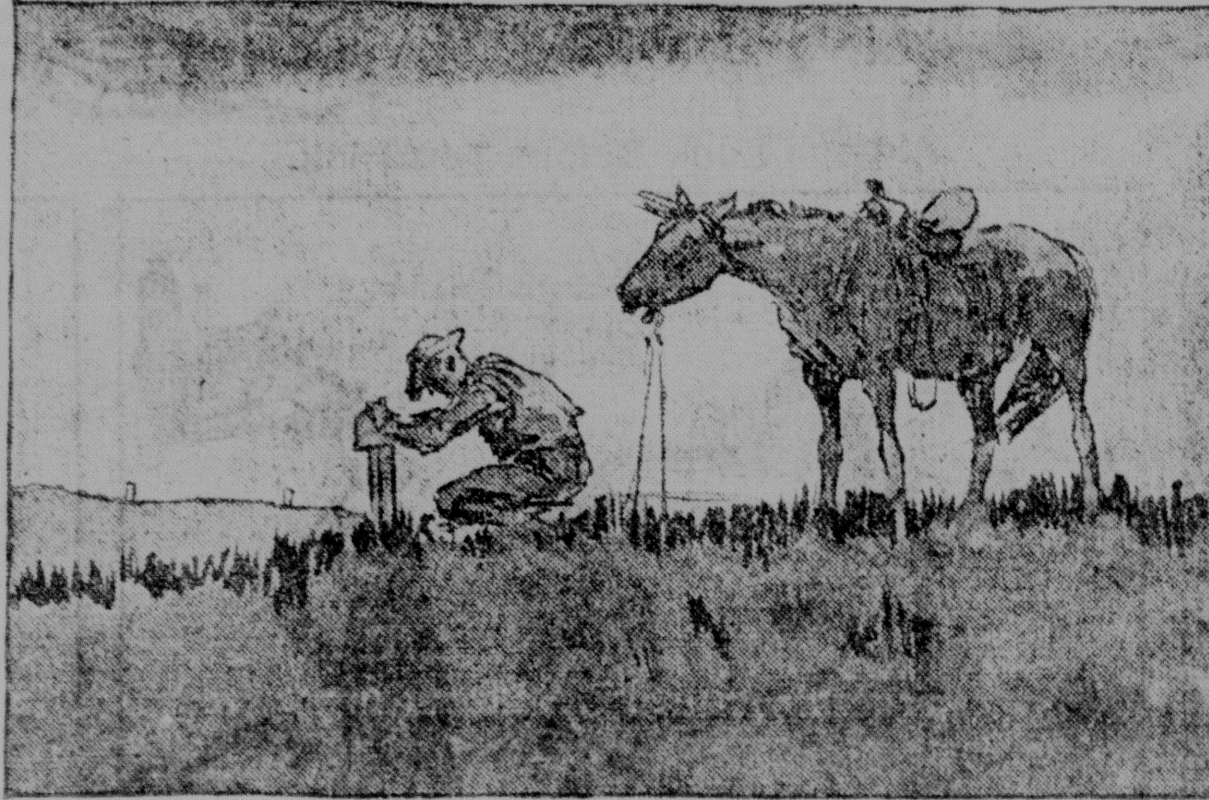

As deputy United States marshal, his district included all of "N" county which afterwards was cut up into Woodward and other Oklahoma counties. The United States marshals at that time were causing the settlers a great deal of trouble. The country was raw land, no part of which was under cultivation. Living neighbor to Love were many settlers who had no money with which to get a start in the new country. Therefore, they resorted to cutting cedar posts on government land, which was a violation of the law.

Early Day Hardships

In many instances those who had staked claims were truly to be pitied. They raised poor crops of kafir corn. Some of this they ground through coffee mills, using the flour to make bread. Love had seen many of his neighbors in this plight, had watched them gather cattle bones and buffalo bones, walking over land for days at a time, until their wagons, loaded with bones, would be driven the 50-mile round trip to Woodward and back again, where the bleaching bones were sold for \$20 per ton. A full wagon load only meant a few dollars, as dry bones are light in weight. He had seen them haul stove wood and cedar posts the same distance, getting one and one-half cents each for the posts and small sums for the wood. He had also seen his neighbors haul a load of wheat 100 miles to El Reno, where a part was

ground into flour and the rest sold for what it would bring and the money used to buy a few necessities.

Under these conditions it was but natural that such a character as Jack Love would be interested and tolerant of his less fortunate neighbor settlers, who underwent all these hardships of true pioneering, driving miles to the canyons in order to cut cedar posts, in defiance of the law, that they might have the barest necessities with which to live. Therefore it was no wonder the settlers had a better chance to get a foothold in the new country after Jack Love's appointment.

"Coming in fast with the leaders, he staked a claim near Sharon"

It was during his years as deputy United States marshal that Love came to know and to be a close friend of Temple Houston, son of the illustrious Texan, Sam Houston, President of the Republic of Texas and first Governor of the State of Texas. Young Houston was a brilliant lawyer and his law office was in Woodward. Unfortunately, while practicing law in Woodward, he and Love became involved in a shooting scrape.

Jennings Family Moves In

About this time the Jennings family moved to Woodward from southern Oklahoma. The father was probate judge and Ed and John Jennings practiced in

their father's court. Houston, for some reason, could never win a case before Judge Jennings. This state of affairs continued until at last friends of Houston began to resent the attitude of the judge toward the young lawyer and one day when Houston, who felt sure he could not win his case in Judge Jennings' court, asked for a change of venue, matters came to a head and Houston and the two Jennings brothers quarreled and drew their guns in open court. This was no surprise, for all men "toted" guns in those days.

There were then thirteen open saloons in Woodward. The night following the day when guns had been drawn in open court, thereby declaring war between the Jennings and Houston factions, Ed and John Jennings were in the "Cabinet" saloon. Later, Jack Love and Temple Houston walked into the same saloon, not knowing the Jennings brothers were there. They passed from the saloon into a gambling room, directly in the rear, and there they saw Ed Jennings seated behind a long table engaged in a game of craps. John Jennings was standing across the room. It was said that Al Jennings had come home that day and that Frank Jennings also was somewhere about.

Trouble Brewing

Temple Houston had been told by friends that trouble was brewing and they also told him that it was wiser to settle this trouble and make friends with the Jennings rather than to allow the matter to run on and eventually result in a tragedy. So, when Houston saw Ed Jennings sitting at the table, he walked across the room, approached Jennings and said: "Ed, we ought to settle this matter." Afterwards at the

court trial Houston was undecided about having used the word "settle," but said if he did use it he meant it in an amicable and peaceable manner.

Be that as it may, testimony was offered in court to the effect that Jennings whipped out his revolver and replied, "We'll settle it right now." When Houston saw the shining barrel of Jennings' gun being lifted from its holster, he pulled his own gun and fired. It was never decided who fired the first shot, as a regular barrage of shots seemed to come from all directions. John Jennings, it is reported, fired at Houston and Love drew his gun and fired at Frank Jennings; then some one shot out the lights. After the shooting the body of Ed Jennings lay dead on the floor, while Love and Houston were unharmed.

Jennings' Do Not Appear at Trial

Immediately following the gun battle the Jennings family moved from Woodward and did not appear to offer evidence at the trial of Houston. Love, who was tried at the same time, stood by his friend despite the fact that Houston confessed to firing the shot that killed Ed Jennings. John Jennings was wounded in the shoulder but recovered.

With the coming of Statehood to Oklahoma, Jack Love was elected corporation commissioner and held the office until he died. He was well known and popular throughout the State and was urged by his friends to run for Governor. Just about the time he had made up his mind to do this, Al Jennings' story, entitled, "Beating Back," began publication in the Saturday Evening Post. Many new people had moved into the new State of Oklahoma, they knew little about the pioneering spirit or the code of the western gun, therefore their hands were raised in horror at the thought of a man who had possibly killed another trying to occupy the highest office within the gift of the people. Jennings' narrative, "Beating Back," gave a different version of the killing of his brother, a version, it seems, that somewhat involved Love.

When Love realized the position in which he was placed before the people through the printed story of Jennings, he refused to allow his name to be used in the campaign and continued in the capacity of corporation commissioner.

The Fiesta de San Jacinto

By FLORENCE E. SHELBY

(Copyright, 1929, by the Home Color Print Co.)

THE Fiesta de San Jacinto and Battle of Flowers, held annually at San Antonio the week beginning April 21st, commemorates the fall of the Alamo and final victory of the Texans over the Mexicans at the Battle of San Jacinto.

Its main purpose is to perpetuate in the hearts of all Texans the memory of those gallant men who fell in the siege of the Alamo as well as the men who fought and won the independence of Texas at the Battle of San Jacinto.

The celebration this year will be the 39th of this picturesque festival. The first celebration was arranged in honor of ex-President Harrison, who visited San Antonio in April, 1891.

The original idea of the Battle of Flowers was to use only wild flowers, native to South Texas. The choice of flowers in place of more deadly weapons, symbolizes peace and is indeed fitting in a land where flowers bloom the year round—from bluebonnets in the spring to poinsettias in the fall.

Perhaps the idea was borrowed indirectly from Aztec rites and customs, for the picturesque flower carnivals of Old Mexico are far-famed and most lovely. At any rate, upon the two hundredth anniversary of the founding of San Antonio was held the first of these unique entertainments, now grown to a full week of pageants, fancy balls, parades and street carnivals—a week graded by many notable social functions.

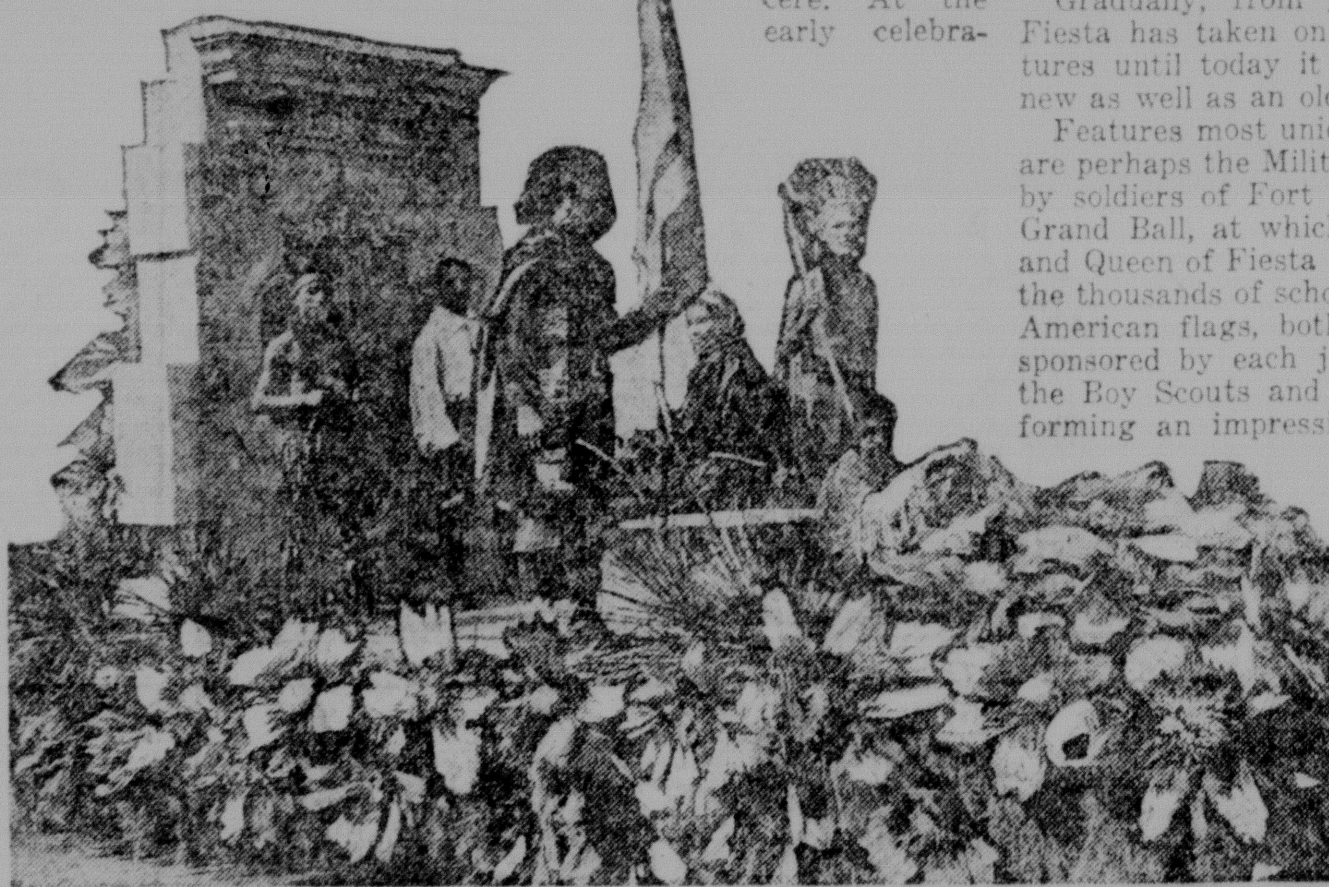

Official Recognition

In 1896 the Governor of the State gave the event official recognition; and, since that time, it has become customary for the Governor to address in person the throngs gathered before the Alamo preceding the Battle of Flowers. During this ceremony, the gay masquerading and merriment are laid aside, while Texans pause to honor the memory of those who laid the foundation of the State, however, not without heroic struggle and self-sacrifice.

It is therefore fitting, that in San Antonio, of all points in Texas, the memory of early pioneer struggles and privations should be preserved in these mystic rites, where love and loyalty are the fragrant spices and peace the winding sheet. Here, also, are the old missions founded by the

Catholic Fathers, quaint reminders of the first civilization in Texas.

The earlier celebrations of Fiesta de San Jacinto were less elaborate than those of today, though none the less fervid and sincere. At the early celebra-

A float in the parade symbolizing early Spanish exploration in Texas.

tions there would occasionally appear a survivor of the Battle of San Jacinto. But the last survivor, Capt. W. T. Zuber, of Austin, Texas, died Sept. 22, 1913,

age 93.

The first parades were made up of flower-trimmed carriages and scores of gaily decorated bicycles, which are now replaced by floral-wreathed automobiles and auto trucks.

Gradually, from year to year, the Fiesta has taken on more modern features until today it is symbolical of a new as well as an old culture.

Features most unique and permanent are perhaps the Military Review, put on by soldiers of Fort Sam Houston; the Grand Ball, at which the chosen King and Queen of Fiesta Week are crowned; the thousands of school children bearing American flags, both large and small, sponsored by each junior high school; the Boy Scouts and Girl Reserves—all forming an impressive spectacle—witnessed by an immense concourse of people from far and near.

Marvels of Artistic Design

The Red Cross, women's clubs, and civic organizations of all kinds vie with merchants and manufacturers

to make "Fiesta Week" a huge success. Each succeeding year rivals its predecessor in beauty and originality. The decorated floats are marvels of artistic

design and ingenuity.

It is said that one of the most impressive parades during any celebration of the Battle of Flowers was in 1917—the year war was declared by the United States against Germany and her allies. Many of the citizens of San Antonio were in favor of cancelling the event, but since preparations were already well under way, it was decided to go ahead with the program. General Pershing led the parade. At this time the Court of Butterflies was inaugurated. It was a gay and gorgeous spectacle—with a Duchess to preside over each "float," who was chosen from among the prominent society girls.

In 1918, however, the Battle of Flowers Association was devoting both energy and resources to "help win the war," and the only recognition given the historic fete (April 21) was a sombre march by hundreds of women in Red Cross uniforms, through the main thoroughfares of the city to the classic Alamo, where the Battle of Flowers was solemnized by raising a great mound of purple laurel blooms on this consecrated spot in honor of OUR BOYS OVER THERE.

It was the women of San Antonio who raised \$19,800 to endow beds, thirty-two of them, in the first A. R. C. Hospital in France. Then in 1919 an almost endless Victory Parade was participated in by thousands of school children and citizens, as well as military corps stationed at Ft. Sam Houston. A bronze tablet to the memory of the men of Bexar county was unveiled on this occasion.

Texas Has Given Away Millions of Acres of Land

By L. A. WILKE

(Copyright, 1930, by the Home Color Print Co.)

RECORDS of the General Land office at Austin show that Texas has given away millions of acres of land. Some of the land was covered with virgin pine and hard wood; some of it rich in mineral deposits.

When Texas won her independence at the Battle of San Jacinto, April 21, 1836, there was at her command a vast domain of public lands totaling 242,594,560 acres.

Much of the land was given away for educational and industrial purposes. The University of Texas, one of the leaders,

in development of the study of petroleum and metallic mineral geology for the State, was given an even million acres of land. Today some of this land is covered with oil wells, and the university has been paid to date over \$10,000,000 in oil royalties from land that was an original gift.

Railroads Given 32,400,000 Acres

Next to educational gifts were gifts to railroads, amounting to 32,400,000 acres of land. From the time of the building of the first railroad in 1851 until 1869, when land grants to railroads were cut off by statute, Texas followed

the policy of granting four sections for each mile of line constructed after a total of five miles had been completed, the law being amended in 1854 to grant six sections per mile of track constructed after any railroad had completed as much as thirty-five miles. The impetus this sort of legislation gave railroad building is shown by the fact that this law caused the organization of about forty companies, nine of which constructed during subsequent years sufficient mileage to receive the grants. From 1869 to 1876 no grants were made to railroads, but after the adoption of the present State Constitution in the

latter year grants were made at the rate of sixteen sections to the mile, contingent upon the railroad's disposing of the lands within specified time.

Half of Domain to Schools

In the adoption of the Constitution of 1876, Texas provided that half of the public domain of that date should be reserved for the public school fund, while the remaining half was held in reserve for other purposes. Of this land reserved by the State for its future needs, the University of Texas received 1,000,000 acres; there was set apart for building the State Capitol at Austin 3,-

050,000 acres, 1,169,132 acres were given to the veterans of the Texas Revolutionary War, and 1,979,852 to disabled ex-Confederates. In addition 1,550,936 acres were sold to pay off a public debt and 1,439,100 acres were granted to counties for school purposes in addition to what they had already received. About 52,000,000 acres of Texas domain, first and last, were appropriated for school purposes. At the present time the State of Texas holds some hundreds of thousands of acres of school lands lying mostly in sections not exceptionally well suited to agriculture. A

John Jennings, it is reported, fired at Houston and Love drew his gun and fired at Frank Jennings; then some one shot out the lights. After the shooting the body of Ed Jennings lay dead on the floor, while Love and Houston were unharmed.

Jennings' Do Not Appear at Trial

Immediately following the gun battle the Jennings family moved from Woodward and did not appear to offer evidence at the trial of Houston. Love, who was tried at the same time, stood by his friend despite the fact that Houston confessed to firing the shot that killed Ed Jennings. John Jennings was wounded in the shoulder but recovered.

With the coming of Statehood to Oklahoma, Jack Love was elected corporation commissioner and held the office until he died. He was well known and popular throughout the State and was urged by his friends to run for Governor. Just about the time he had made up his mind to do this, Al Jennings' story, entitled, "Beating Back," began publication in the Saturday Evening Post. Many new people had moved into the new State of Oklahoma, they knew little about the pioneering spirit or the code of the western gun, therefore their hands were raised in horror at the thought of a man who had possibly killed another trying to occupy the highest office within the gift of the people. Jennings' narrative, "Beating Back," gave a different version of the killing of his brother, a version, it seems, that somewhat involved Love.

When Love realized the position in which he was placed before the people through the printed story of Jennings, he refused to allow his name to be used in the campaign and continued in the capacity of corporation commissioner.

The Fiesta de San Jacinto

By FLORENCE E. SHELBY

(Copyright, 1930, by the Home Color Print Co.)

THE Fiesta de San Jacinto and Battle of Flowers, held annually at San Antonio the week beginning April 21st, commemorates the Fall of the Alamo and final victory of the Texans over the Mexicans at the Battle of San Jacinto.

Its main purpose is to perpetuate in the hearts of all Texans the memory of those gallant men who fell in the siege of the Alamo as well as the men who fought and won the independence of Texas at the Battle of San Jacinto.

The celebration this year will be the 39th of this picturesque festival. The first celebration was arranged in honor of ex-President Harrison, who visited San Antonio in April, 1891.

The original idea of the Battle of Flowers was to use only wild flowers, native to South Texas. The choice of flowers in place of more deadly weapons, symbolizes peace and is indeed fitting in a land where flowers bloom the year round—from bluebonnets in the spring to poinsettias in the fall.

Perhaps the idea was borrowed indirectly from Aztec rites and customs, for the picturesque flower carnivals of Old Mexico are far-famed and most lovely. At any rate, upon the two hundredth anniversary of the founding of San Antonio was held the first of these unique entertainments, now grown to a full week of pageants, fancy balls, parades and street carnivals—a week graced by many notable social functions.

Official Recognition

In 1896 the Governor of the State gave the event official recognition; and, since that time, it has become customary for the Governor to address in person the throngs gathered before the Alamo preceding the Battle of Flowers. During this ceremony, the gay masquerading and merriment are laid aside, while Texans pause to honor the memory of those who laid the foundation of the State, however, not without heroic struggle and self-sacrifice.

It is therefore fitting, that in San Antonio, of all points in Texas, the memory of early pioneer struggles and privations should be preserved in these mystic rites, where love and loyalty are the fragrant spices and peace the winding sheet. Here, also, are the old missions founded by the

Catholic Fathers, quaint reminders of the first civilization in Texas.

The earlier celebrations of Fiesta de San Jacinto were less elaborate than those of today, though none the less fervid and sincere. At the early celebra-

A float in the parade symbolizing early Spanish exploration in Texas.

tions there would occasionally appear a survivor of the Battle of San Jacinto. But the last survivor, Capt. W. T. Zuber, of Austin, Texas, died Sept. 22, 1913,

age 93.

The first parades were made up of flower-trimmed carriages and scores of gaily decorated bicycles, which are now replaced by floral-wreathed automobiles and auto trucks.

Gradually, from year to year, the Fiesta has taken on more modern features until today it is symbolical of a new as well as an old culture.

Features most unique and permanent are perhaps the Military Review, put on by soldiers of Fort Sam Houston; the Grand Ball, at which the chosen King and Queen of Fiesta Week are crowned; the thousands of school children bearing American flags, both large and small, sponsored by each junior high school; the Boy Scouts and Girl Reserves—all forming an impressive spectacle—witnessed by an immense concourse of people from far and near.

Marvels of Artistic Design

The Red Cross, women's clubs, and civic organizations of all kinds vie with merchants and manufacturers

to make "Fiesta Week" a huge success. Each succeeding year rivals its predecessor in beauty and originality. The decorated floats are marvels of artistic

design and ingenuity.

It is said that one of the most impressive parades during any celebration of the Battle of Flowers was in 1917—the year war was declared by the United States against Germany and her allies. Many of the citizens of San Antonio were in favor of cancelling the event, but since preparations were already well under way, it was decided to go ahead with the program. General Pershing led the parade. At this time the Court of Butterflies was inaugurated. It was a gay and gorgeous spectacle—with a Duchess to preside over each "float," who was chosen from among the prominent society girls.

In 1918, however, the Battle of Flowers Association was devoting both energy and resources to "help win the war," and the only recognition given the historic fete (April 21) was a sombre march by hundreds of women in Red Cross uniforms, through the main thoroughfares of the city to the classic Alamo, where the Battle of Flowers was solemnized by raising a great mound of purple laurel blooms on this consecrated spot in honor of OUR BOYS OVER THERE.

It was the women of San Antonio who raised \$19,800 to endow beds, thirty-two of them, in the first A. R. C. Hospital in France. Then in 1919 an almost endless Victory Parade was participated in by thousands of school children and citizens, as well as military corps stationed at Ft. Sam Houston. A bronze tablet to the memory of the men of Bexar county was unveiled on this occasion.

Texas Has Given Away Millions of Acres of Land

By L. A. WILKE

(Copyright, 1930, by the Home Color Print Co.)

RECORDS of the General Land office at Austin show that Texas has given away millions of acres of land. Some of the land was covered with virgin pine and hard wood; some of it rich in mineral deposits.

When Texas won her independence at the Battle of San Jacinto, April 21, 1836, there was at her command a vast domain of public lands totaling 242,594,560 acres.

Much of the land was given away for educational and industrial purposes. The University of Texas, one of the leaders,

in development of the study of petroleum and metallic mineral geology for the State, was given an even million acres of land. Today some of this land is covered with oil wells, and the university has been paid to date over \$10,000,000 in oil royalties from land that was an original gift.

Railroads Given 32,400,000 Acres

Next to educational gifts were gifts to railroads, amounting to 32,400,000 acres of land. From the time of the building of the first railroad in 1851 until 1869, when land grants to railroads were cut off by statute, Texas followed

the policy of granting four sections for each mile of line constructed after a total of five miles had been completed, the law being amended in 1854 to grant six sections per mile of track constructed after any railroad had completed as much as thirty-five miles. The impetus this sort of legislation gave railroad building is shown by the fact that this law caused the organization of about forty companies, nine of which constructed during subsequent years sufficient mileage to receive the grants. From 1869 to 1876 no grants were made to railroads, but after the adoption of the present State Constitution in the

latter year grants were made at the rate of sixteen sections to the mile, contingent upon the railroad's disposing of the lands within specified time.

Half of Domain to Schools

In the adoption of the Constitution of 1876, Texas provided that half of the public domain of that date should be reserved for the public school fund, while the remaining half was held in reserve for other purposes. Of this land reserved by the State for its future needs, the University of Texas received 1,000,000 acres; there was set apart for building the State Capitol at Austin 3,

050,000 acres, 1,169,132 acres were given to the veterans of the Texas Revolutionary War, and 1,979,852 to disabled ex-Confederates. In addition 1,550,936 acres were sold to pay off a public debt and 1,439,100 acres were granted to counties for school purposes in addition to what they had already received. About 52,000,000 acres of Texas domain, first and last, were appropriated for school purposes. At the present time the State of Texas holds some hundreds of thousands of acres of school lands lying mostly in sections not exceptionally well suited to agriculture. A

CURRENT COMMENT

By J. H. (JIM) LOWRY
(Copyright, 1930, by the Home Color Print Co.)

April

"All day the low-hung clouds have dropped
Their garnered fullness down;
All day that soft, gray mist hath wrapped
Hill, valley, grove and town.

The very earth, the steamy air
Is all with fragrance rife;
And grace and beauty everywhere
Are flushing into life.

SO wrote Mrs. Southey of "April Days." The sections which have too much moisture already sincerely hope that we will not have a Southey April this year, but the dry sections are depending upon April to lift them out of the drouth, and the Southey poem sounds good to them.

History tells us that April took its name from Aperire, which means to open, that the Anglo-Saxons called it Ooster and the Dutch "grass month." Mythology, which most people prefer to history, says April got its name from Venus, the most beautiful woman that ever lived. The ancients called April the loveliest of months. They did this doubtless to please Venus, for April is as far below May in true loveliness as a satyr is inferior to Hyperion. Venus had lots of good sense, however, and deserved all the worship she received. She could have married the best-looking man of her time, but she passed up all the Apollos and the white-collared dudes and married Vulcan, the ugliest man in that section. She was a very practical and philosophical woman and contended that beautiful women ought to marry ugly men in order to raise the average of beauty. Not only was Venus beautiful and sensible, but she was also useful. She could have married a handsome rich man and spent her days playing bridge and breaking the Volstead law, but she did nothing of the kind. She married a poor blacksmith and helped him pay off the installment notes on the furniture by holding the soldering iron in his shop while he fixed the plows and the carts. Hurrah for Venus.

The Hen Aint What She Used to Be

A friend of mine advertises for a gentle hen that is ready and willing to raise a family. He won't find her; times have changed.

In the good old days of yore the average hen was domestic in her tastes and patriotic in all her acts. When the snows of winter had melted and Boreal winds had given way to spring zephyrs, she sought out a nest in some secluded spot. In this she deposited every day a snow-white egg, always rejoicing over her contribution to the world's supply of food-stuffs. And when the nest was full of the oblong treasures she lost all interest in worldly pleasures and became a recluse, sacrificing all that she might obey the Scriptural injunction to multiply and replenish the earth. For three long weeks she sat as silent and as frowny as the Egyptian sphinx, and woe be unto the man or

beast that dared to disturb her meditations. All her thoughts were concentrated upon bringing a family into the world. If half her eggs were stolen she sat upon the remainder. If all were taken away she gathered under her wings a door knob. Run a river over the nest and she would perch upon the nearest goods box or horse trough. And when her brood was finally hatched she was prouder than a well-dressed woman on Easter morn, leaner than a defeated candidate and busier than a preacher at a woman's missionary society.

But alas and alack! Tempori parem! This is the day of the new hen, with all its concomitant evils. The new hen is busy with social functions and has no time for home duties! Every day there is a scratch party in some neighbor's garden and she must make one in Old Domineck's harem. Speak to her about raising a family and she will refer you to an incubator. She is not going to ruin her feathers sitting on dirty eggs nor spend all the summer clucking to squalling chicks. Verily, we have fallen upon evil times. I hope my friend will find a hen that is willing to raise a family, but I fear he will not. Family hens are well-nigh extinct.

Don't Move Your Stove

Spring, glorious, lovely Spring, has come again and is seen in every person, place and thing. We see it in the swelling buds and in the sarsaparilla advertisements on the fence. The bobolink bobs her bobbiest bob, and the chickadee chicks its chickiest chick. The hyacinth waves its banners of purple, white and pink at the warming sun; the bull calf points its tail at the ethereal regions and bellows a paean of joy. The wandering negro minstrel croons his melodies on your front porch at night and the feline meow soprano chants in high C on the backyard fence. Lovely millinery dusts her carpets and dreams of wifery stores; lazy man eats bacon and spits grease. These are unmistakable signs of spring and stoves will come down in many an office and home. A little later on cusses will come down upon the devoted head of the weather man. Be not deceived; Boreas is only resting.

The Deadly Microbe

Many years ago the bacteriologists placed the ban on kissing, and now they assert that hand-shaking is positively deadly. What are the scientists bringing us to, any way? What will life be worth when lips are quarantined against love and tender farewells must be spoken over the telephone? If death lurks in the kiss and hides in the handshake, I am indeed sorry the doctors found it out. The human race had better have its ranks thinned by the destroyer, and the average age be materially shortened, than have Cupid fly from the world because courtship is infested with mi-

crobes and his best arrows winged with pestilence. Let us be sick more and die earlier rather than hang the yellow flag on the sweetest and most healthful passion of this sordid world and sow distrust and suspicion between the good right hands of men.

A New Office

This is political year, and of course all parties and factions of parties are laying plans to increase the number of their adherents. I am not permitted to discuss political issues or candidates but I am taking the liberty of pointing out to the parties and factions a plan that would prove a winner in capturing the colored vote. My plan is to enact a law creating the office of watermelon inspector, making only negroes eligible to the position, they being fitted by birth and instinct to discharge the duties of the office. The duties of this position should be so simple that they could be discharged by any colored person in the enjoyment of health. There should be one or more inspectors in each town, and when a load of watermelons is driven upon the square or street the inspector makes a selection from the lot, cuts it open and eats it in the presence of the public to show that it contains no poison or substance deleterious to health. I am ready to guarantee the party or faction sponsoring such a law 99 per cent of the colored vote.

Yes, I am a gardner once more, and I am pretty sure you are, also. I swore I would never plant another seed or move another shovel of dirt last year when the lady-bugs devoured my potatoes, the cut-worms felled my cabbages, and the August sun blistered my tomatoes. But my garden is planted, and planted according to the moon. Why this change in the spirit of the dreams of those who swore off from gardening last year? It's all because of the seed dealers and the packers. I had no notion of planting another garden until one unlucky afternoon when I passed my grocer's place of business and witnessed his display of garden seeds. On the packages, more beautifully printed and alluring than ever before, I saw pictures of long, green cucumbers, of solid heads of lettuce and cabbage, of big blood-red tomatoes, and radishes as smooth and symmetrical as a lady's fingers. The trick was turned. In spite of former failures I was sure that from those seeds the kind of cucumbers, cabbages, tomatoes, lettuce and radishes I saw on the packages would grow. The colored man has done his work and been paid, and already I am gathering rocks and bats to throw at my neighbors' chickens. In the interest of suffering humanity seed dealers should be required to print on the seed packages they offer for sale pictures of the stubby cucumbers, the sun-burned tomatoes and the worm-eaten cabbages that actually grow in-

stead of the impossible specimens created by artists who never hoed a row of cabbages, nursed a dying tomato vine or rocked a neighbor's rooster to death.

This writer has been away from the farm many years, but in spite of the fact that he hasn't been closely associated with the plow and hoe for some time he ventures this prediction: when there are three chicken houses and four good Jersey cows to every garage throughout the South the country will quit crying out for farm relief.

Enthusiasm is the finest thing in the world so long as a fellow keeps it a few yards in the rear of common sense, but when enthusiasm breaks away and beats old gray matter's time, look out for a turn turtle.

I am told that there is an epidemic of itch in a certain Texas city, and am amazed at the statement of a leading physician that the itch hurts nobody seriously. It does. The itch will ruin the business of the manicurists wherever it appears. During itch epidemics people need all the finger nails they have, and the longer the nails are the better.

A Chicago physician says high heels are as bad as booze and ought to be prohibited. I confess that I can't pass on this matter intelligently, since I have paid very little attention to shoe heels. Every man of lofty aspirations ought to look higher than heels.

A Southern editor says there is no sense in married women crying as much as they do. This editor doesn't know women. Much good sense is displayed in a married woman crying. The woman knows very well that so long as she is crying her husband will gladly bring in the wood and do the other out-door chores. Just anything to keep way from the house.

There are two ways to keep from being led into temptation. One way is pull back on the rope, just as a bull yearling does when an attempt is made to lead him from the pasture. The best way, however, is to flee from temptation, just as the divine writer tells you to do. And don't delay flight as long as a friend of mine did recently. New Year's day this friend swore off from strong drink. Ten days later he was in Dallas, and while he was there temptation came. He met a friend who told him if he would remain in the hotel lobby a little while he believed he could get him a drink. This was about 10 o'clock in the morning. Our hero took a seat in the lobby and waited patiently until 5 o'clock in the afternoon. His friend not having shown up at that time he got right up and ran away from temptation.

Latter day surgeons have made won-

derful discoveries and performed marvelous operations. They have found that a person can live without a stomach, and several stomachless men are now earning their daily bread. They have shown that a hole in the heart need not cause death if it is given proper attention. Time and again it has been shown that a broken neck does not necessarily mean the death of its owner, there being several men in the United States with broken necks who are enjoying fair health. But when you ask the most skilled physician what the vermiform appendix is good for, or what will cure or prevent a common cold, he always runs.

There are those who believe the world can be reformed by the suppression of news. They urge the papers not to print accounts of murders, hold-ups, kidnappings, or sensational news of any character. When the papers adopt such a policy newspaper reading will soon become a lost practice, and this the publishers well know. Having printed papers for more than forty years, I know pretty well what the people read and what they pass up. Print the grandest sermon that ever fell from human lips and not 20 per cent of even the professedly pious will read it; print a detailed account of some female bunco game, or a sensational divorce suit in high life, and 99 per cent of the people will take a dive for the paper before breakfast. Of course they will wonder "what the world is coming to," but they'll read the sensational stuff every time. The dry goods stores, drug stores and groceries carry what the people want, not what they feel the people ought to have. And newspapers must do likewise or fall into the hands of the sheriff and the bankrupt court.

With a tax of four cents on gasoline, a stiff license fee and a heavy property tax on automobiles, we are doing fairly well toward making the saucy cushionites pay the expenses of the government. But we are not socking it to them hard enough yet. Our great army of poor but honest footpadders will not be satisfied until in addition to the gasoline tax, the license fees and property tax the saucy cushionites are taxed at least two bits a honk.

The April rains have filled the creeks and lakes; the rose bushes have come into the glory of full flower; the Southern zephyrs have coaxed the bloom into the dogwood trees, and the angle worms are crawling near the surface of the earth and daring men to dig them out. The report comes that the goggle-eyed perch are frisky and so hungry that they jump out on the land and steal the bait from lazy fishermen. You are wondering why I don't go ahead and catch a mess of the speckled beauties; and so am I. Fact of the business is I am on my way.

Courtships Not Up to Plans and Specifications

By JOE SAPPINGTON

(Copyright, 1930, by the Home Color Print Co.)

SOME of the most successful courtships I ever conducted when a boy were those in which I acted natural and tried no new stunts.

I had been courting Mary Tuttle, a flaxen-haired lassie of some sixteen summers for more than a year and was holding my own against all rivals, but I was ambitious to have the field all to myself and therefore decided to court her in a strictly formal way, never before attempted at any time or place outside a dime novel.

Departing from my usual custom of dropping in on Mary without a moment's warning, now that I was changing my style of wooing, I decided to send her a note by courier. My youngest brother was the courier and he charged me a hard-earned dime for the service. My note requested the pleasure of her company the following Sunday afternoon. Mary not having any writing material at hand, simply told my brother to tell me to come ahead.

I put in four hard days training on what was to be the first formal courtship ever attempted in the Cave Creek community, which embraced everything from reciting poetry to making a set speech and dramatically rolling my eyes like a dying calf.

Long before the appointed hour I donned my new \$9 suit of clothes, poured about a nickel's worth of loud-smelling perfume over my person, pulled my hat rakishly to one side, mounted my

pony and went under whip and spur to fill my engagement. It was my intention to come dashing up to old man Tuttle's house, leap from my pony, rush into Mary's room, grab her around the waist, kiss her a few times and then proceed to court her according to my well-planned schedule.

With Fear And Trembling

Everything was okeh until I came in sight of the Tuttle home and then I began to lose courage, and when I tied my pony and started down the path something happened to my legs and I wobbled as I walked. No, I didn't grab Mary around the waist and kiss her as per schedule, but sat down in the first chair I came to and began wiping sweat

and hair oil out of my eyes. I must have looked funny to Mary from the way she giggled and peeped at me through her fingers. I did all I could to make my brain work and think of some of the things I had memorized for the occasion, but couldn't remember a darn thing. I'll bet I crossed and recrossed my legs fifty times before I thought to speak of the weather as a starter.

"It's sho—sho—shore a pretty day," I finally blurted out, which wise observation made her giggle and twist more than ever. It seemed to me I sat there a week trying to think of something else to say, but I was hopelessly stuck. Oh, how I would have welcomed a cyclone or earthquake, anything to break that awful spell I was under. But at last a hen came from under the house spreading the glad tidings to the world

that she had laid another egg. The cackling of that hen loosened up my brain, if I had any, and I said: "Ain't hens fun—fun—funny things, with feathers on their backs and stomachs and legs, which wise-crack caused Mary to hide her head behind a curtain and laugh long and loud. By this time I was desperate and continued to talk about the hen from every angle in an effort to start some sort of conversation.

Mary Bolts From the Room

"Wouldn't you hate to be a hen, Mary, and have to lay eggs, hatch chickens and be caught by a hawk and"—but just then Mary bolted from the room and I made a run for my pony, vaulted into the saddle and left in great haste.

The trouble with me I was trying to do something out of the ordinary and took stage fright.

All my life I have been a flat failure at memorizing things and trying to spring them on the impulse of the moment. As an example of this, take the time I called on old man Huggins to ask for the hand of his daughter, Sallie. Before calling on him I had memorized a speech that I thought was flawless. The speech ran something like this: "Mr. Huggins, doubtless you are aware of the undying love that exists between me and Sallie and we want your consent to marry if you will give it, but if not we are going to be wed if we have to elope. At the present time, as you well know, Mr. Huggins, I am a poor boy, but am full of ambition and high hopes and expect to climb higher the ladder of fame and I know the time will come when you will be proud of me as a son-in-law. What is your answer, Mr. Huggins?"

That speech in theory seemed letter perfect and not a loophole in it, but it ended more disastrously than the romantic call I made that Sunday on Mary

Tuttle. Sallie's pa was nailing planks on a hog pen when I suddenly appeared before him to spring the sweet "story" of love. Then an unfortunate thing happened. He struck his thumb with the hammer, and was still "cussing" as I timidly drew nigh unto him. "Mr. Hug—Hug—Huggins, I have come to ask you"—"Go get any d—n thing you want," he cut in on me, "but don't bother me while I'm nailing these planks. Can't you see I've mashed a thumb-nail nearly off. Whatever it is you want to borrow, go to the house and ask the old woman or Sallie where to find it and don't bother me while I'm trying to fix this dern hog pen."

Such is life—and how strange are the decrees of fate and how little we know what the future holds in store. Had I not tried to court Mary Tuttle in an unnatural way we may have gone down life's highway hand-in-hand to a ripe old age as man and wife, and if old man Huggins hadn't hit his thumb with a hammer at such an inopportune moment Sallie and I, in all probability, would have entered the holy bonds of matrimony, reared a large and interesting family and lived happily ever afterward.

MEMORIAL GATEWAY FOR CAMERON PARK

Work is now under construction on a memorial gateway at the entrance of Cameron Park, Waco. The gateway is being constructed of Texas limestone, used in the old Waco city hall, and which has stood the ravages of time for more than half a century. It is hoped to have the memorial archway completed by May 27, on which date the twenty-fifth anniversary of Cameron Park will be observed. This park, which now consists of 500 acres, was given to Waco by Mrs. Flora B. Cameron and her three children. The value of the park is estimated at \$650,000.

HISTORIC VIOLIN

A. J. Broderick and George Calvert, oil operators of Fort Worth, own a very historic and ancient violin, known as the "White House" violin. It is said that President Abraham Lincoln attempted to play this old instrument, but making poor success, abandoned his ambition to become a violinist. The former owner of the instrument, Colonel William H. Crook, once played the violin for the entertainment of President Roosevelt.

The violin has stamped on it the date 1606, and there is a tag showing it was repaired in 1620. Colonel Crook, who was commissary at the White House for thirty years, kept the violin until his death in 1915. At the recent anniversary of President Lincoln's birth, a talented violinist played the old instrument for a radio program.

TUNG OIL TREES FOR LIBERTY LAND

Business men of Cleveland are planning the planting of tung oil trees on cut-over land in Liberty county. The decision to plant these trees was reached after a conference with the agricultural agent of the Southern Pacific Railway Company. Lands in portions of the county are very cheap and appear to be suited for the growth of tung oil trees. Tung oil trees originally came from China and are an important source of a water-resistant varnish in great demand in many parts of the world.

NEW DORMITORY FOR TRINITY UNIVERSITY

Plans have been completed for a new dormitory for men at Trinity University, Waxahatchie. The structure would cost about \$100,000 and would have approximately 100 rooms. It would replace Beeson Hall, which was destroyed by fire last October.

April

"All day the low-hung clouds have dropped
Their garnered fullness down;
All day that soft, gray mist hath wrapped
Hill, valley, grove and town.

The very earth, the steamy air
Is all with fragrance rife;
And grace and beauty everywhere
Are flushing into life.

O wrote Mrs. Southey of "April Days." The sections which have too much moisture already sincerely hope that we will not have a Southey April this year, but the dry sections are depending upon April to lift them out of the drouth, and the Southey poem sounds good to them.

History tells us that April took its name from Aperire, which means to open, that the Anglo-Saxons called it Ooster and the Dutch "grass month." Mythology, which most people prefer to history, says April got its name from Venus, the most beautiful woman that ever lived. The ancients called April the loveliest of months. They did this doubtless to please Venus, for April is as far below May in true loveliness as a satyr is inferior to Hyperion. Venus had lots of good sense, however, and deserved all the worship she received. She could have married the best-looking man of her time, but she passed up all the Apollos and the white-collared dudes and married Vulcan, the ugliest man in that section. She was a very practical and philosophical woman and contended that beautiful women ought to marry ugly men in order to raise the average of beauty. Not only was Venus beautiful and sensible, but she was also useful. She could have married a handsome rich man and spent her days playing bridge and breaking the Volstead law, but she did nothing of the kind. She married a poor blacksmith and helped him pay off the installment notes on the furniture by holding the soldering iron in his shop while he fixed the plows and the carts. Hurrah for Venus.

The Hen Aint What She Used to Be

A friend of mine advertises for a gentle hen that is ready and willing to raise a family. He won't find her; times have changed.

In the good old days of yore the average hen was domestic in her tastes and patriotic in all her acts. When the snows of winter had melted and Boreal winds had given way to spring zephyrs, she sought out a nest in some secluded spot. In this she deposited every day a snow-white egg, always rejoicing over her contribution to the world's supply of food-stuffs. And when the nest was full of the oblong treasures she lost all interest in worldly pleasures and became a recluse, sacrificing all that she might obey the Scriptural injunction to multiply and replenish the earth. For three long weeks she sat as silent and as frowny as the Egyptian sphinx, and woe be unto the man or

beast that dared to disturb her meditations. All her thoughts were concentrated upon bringing a family into the world. If half her eggs were stolen she sat upon the remainder. If all were taken away she gathered under her wings a door knob. Run a river over the nest and she would perch upon the nearest goods box or horse trough. And when her brood was finally hatched she was prouder than a well-dressed woman on Easter morn, leaner than a defeated candidate and busier than a preacher at a woman's missionary society.

But alas and alack! Tempori parendum! This is the day of the new hen, with all its concomitant evils. The new hen is busy with social functions and has no time for home duties! Every day there is a scratch party in some neighbor's garden and she must make one in Old Domineck's harem. Speak to her about raising a family and she will refer you to an incubator. She is not going to ruin her feathers sitting on dirty eggs nor spend all the summer clucking to squalling chicks. Verily, we have fallen upon evil times. I hope my friend will find a hen that is willing to raise a family, but I fear he will not. Family hens are well-nigh extinct.

Don't Move Your Stove

Spring, glorious, lovely Spring, has come again and is seen in every person, place and thing. We see it in the swelling buds and in the sarsaparilla advertisements on the fence. The bobolink bobs her bobbiest bob, and the chickadee chicks his chickiest chick. The hyacinth waves its banners of purple, white and pink at the warming sun; the bull calf points its tail at the ethereal regions and bellows a paean of joy. The wandering negro minstrel croons his melodies on your front porch at night and the feline mezzo soprano chants in high C on the backyard fence. Lovely woman dusts her carpets and dreams of millinery stores; lazy man eats bacon and spits grease. These are unmistakable signs of spring and stoves will come down in many an office and home. A little later on cusses will come down upon the devoted head of the weather man. Be not deceived; Boreas is only resting.

The Deadly Microbe

Many years ago the bacteriologists placed the ban on kissing, and now they assert that hand-shaking is positively deadly. What are the scientists bringing us to, any way? What will life be worth when lips are quarantined against love and tender farewells must be spoken over the telephone? If death lurks in the kiss and hides in the handshake, I am indeed sorry the doctors found it out. The human race had better have its ranks thinned by the destroyer, and the average age be materially shortened, than have Cupid fly from the world because courtship is infested with mi-

crobes and his best arrows winged with pestilence. Let us be sick more and die earlier rather than hang the yellow flag on the sweetest and most healthful passion of this sordid world and sow distrust and suspicion between the good right hands of men.

A New Office

This is political year, and of course all parties and factions of parties are laying plans to increase the number of their adherents. I am not permitted to discuss political issues or candidates but I am taking the liberty of pointing out to the parties and factions a plan that would prove a winner in capturing the colored vote. My plan is to enact a law creating the office of watermelon inspector, making only negroes eligible to the position, they being fitted by birth and instinct to discharge the duties of the office. The duties of this position should be so simple that they could be discharged by any colored person in the enjoyment of health. There should be one or more inspectors in each town, and when a load of watermelons is driven upon the square or street the inspector makes a selection from the lot, cuts it open and eats it in the presence of the public to show that it contains no poison or substance deleterious to health. I am ready to guarantee the party or faction sponsoring such a law 99 per cent of the colored vote.

Yes, I am a gardener once more, and I am pretty sure you are, also. I swore I would never plant another seed or move another shovel of dirt last year when the lady-bugs devoured my potatoes, the cut-worms felled my cabbages and the August sun blistered my tomatoes. But my garden is planted, and planted according to the moon. Why this change in the spirit of the dreams of those who swore off from gardening last year? It's all because of the seed dealers and the packers. I had no notion of planting another garden until one unlucky afternoon when I passed my grocer's place of business and witnessed his display of garden seeds. On the packages, more beautifully printed and alluring than ever before, I saw pictures of long, green cucumbers, of solid heads of lettuce and cabbage, of big blood-red tomatoes, and radishes as smooth and symmetrical as a lady's fingers. The trick was turned. In spite of former failures I was sure that from those seeds the kind of cucumbers, cabbages, tomatoes, lettuce and radishes I saw on the packages would grow. The colored man has done his work and been paid, and already I am gathering rocks and bats to throw at my neighbors' chickens. In the interest of suffering humanity seed dealers should be required to print on the seed packages they offer for sale pictures of the stubby cucumbers, the sun-burned tomatoes and the worm-eaten cabbages that actually grow in-

stead of the impossible specimens created by artists who never hoed a row of cabbages, nursed a dying tomato vine or rocked a neighbor's rooster to death.

This writer has been away from the farm many years, but in spite of the fact that he hasn't been closely associated with the plow and hoe for some time he ventures this prediction: when there are three chicken houses and four good Jersey cows to every garage throughout the South the country will quit crying out for farm relief.

Enthusiasm is the finest thing in the world so long as a fellow keeps it a few yards in the rear of common sense, but when enthusiasm breaks away and beats old gray matter's time, look out for a turn turtle.

I am told that there is an epidemic of itch in a certain Texas city, and am amazed at the statement of a leading physician that the itch hurts nobody seriously. It does. The itch will ruin the business of the manicurists wherever it appears. During itch epidemics people need all the finger nails they have, and the longer the nails are the better.

A Chicago physician says high heels are as bad as booze and ought to be prohibited. I confess that I can't pass on this matter intelligently, since I have paid very little attention to shoe heels. Every man of lofty aspirations ought to look higher than heels.

A Southern editor says there is no sense in married women crying as much as they do. This editor doesn't know women. Much good sense is displayed in a married woman crying. The woman knows very well that so long as she is crying her husband will gladly bring in the wood and do the other out-doors chores. Just anything to keep way from the house.

There are two ways to keep from being led into temptation. One way is pull back on the rope, just as a bull yearling does when an attempt is made to lead him from the pasture. The best way, however, is to flee from temptation, just as the divine writer tells you to do. And don't delay flight as long as a friend of mine did recently. New Year's day this friend swore off from strong drink. Ten days later he was in Dallas, and while he was there temptation came. He met a friend who told him if he would remain in the hotel lobby a little while he believed he could get him a drink. This was about 10 o'clock in the morning. Our hero took a seat in the lobby and waited patiently until 5 o'clock in the afternoon. His friend not having shown up at that time he got right up and ran away from temptation.

Latter day surgeons have made won-

derful discoveries and performed marvelous operations. They have found that a person can live without a stomach, and several stomachless men are now earning their daily bread. They have shown that a hole in the heart need not cause death if it is given proper attention. Time and again it has been shown that a broken neck does not necessarily mean the death of its owner, there being several men in the United States with broken necks who are enjoying fair health. But when you ask the most skilled physician what the vermiform appendix is good for, or what will cure or prevent a common cold, he always runs.

There are those who believe the world can be reformed by the suppression of news. They urge the papers not to print accounts of murders, hold-ups, kidnappings, or sensational news of any character. When the papers adopt such a policy newspaper reading will soon become a lost practice, and this the publishers well know. Having printed papers for more than forty years, I know pretty well what the people read and what they pass up. Print the grandest sermon that ever fell from human lips and not 20 per cent of even the professedly pious will read it; print a detailed account of some female bunco game, or a sensational divorce suit in high life, and 99 per cent of the people will take a dive for the paper before breakfast. Of course they will wonder "what the world is coming to," but they'll read the sensational stuff every time. The dry goods stores, drug stores and groceries carry what the people want, not what they feel the people ought to have. And newspapers must do likewise or fall into the hands of the sheriff and the bankrupt court.

With a tax of four cents on gasoline, a stiff license fee and a heavy property tax on automobiles, we are doing fairly well toward making the saucy cushionites pay the expenses of the government. But we are not socking it to them hard enough yet. Our great army of poor but honest footpadders will not be satisfied until in addition to the gasoline tax, the license fees and property tax the saucy cushionites are taxed at least two bits a honk.

The April rains have filled the creeks and lakes; the rose bushes have come into the glory of full flower; the Southern zephyrs have coaxed the bloom into the dogwood trees, and the angle worms are crawling near the surface of the earth and daring men to dig them out. The report comes that the goggle-eyed perch are frisky and so hungry that they jump out on the land and steal the bait from lazy fishermen. You are wondering why I don't go ahead and catch a mess of the speckled beauties; and so am I. Fact of the business is I am on my way.

Courtships Not Up to Plans and Specifications

By JOE SAPPINGTON

(Copyright, 1930, by the Home Color Print Co.)

SOME of the most successful courtships I ever conducted when a boy were those in which I acted natural and tried no new stunts. I had been courting Mary Tuttle, a flaxen-haired lassie of some sixteen summers for more than a year and was holding my own against all rivals, but I was ambitious to have the field all to myself and therefore decided to court her in a strictly formal way, never before attempted at any time or place outside a dime novel.

Departing from my usual custom of dropping in on Mary without a moment's warning, now that I was changing my style of wooing, I decided to send her a note by courier. My youngest brother was the courier and he charged me a hard-earned dime for the service. My note requested the pleasure of her company the following Sunday afternoon. Mary not having any writing material at hand, simply told my brother to tell me to come ahead.

I put in four hard days training on what was to be the first formal courtship ever attempted in the Cave Creek community, which embraced everything from reciting poetry to making a set speech and dramatically rolling my eyes like a dying calf.

Long before the appointed hour I donned my new \$9 suit of clothes, poured about a nickel's worth of loud-smelling perfume over my person, pulled my hat rakishly to one side, mounted my

pony and went under whip and spur to fill my engagement. It was my intention to come dashing up to old man Tuttle's house, leap from my pony, rush into Mary's room, grab her around the waist, kiss her a few times and then proceed to court her according to my well-planned schedule.

With Fear And Trembling

Everything was okeh until I came in sight of the Tuttle home and then I began to lose courage, and when I tied my pony and started down the path something happened to my legs and I wobbled as I walked. No, I didn't grab Mary around the waist and kiss her as per schedule, but sat down in the first chair I came to and began wiping sweat

and hair oil out of my eyes. I must have looked funny to Mary from the way she giggled and peeped at me through her fingers. I did all I could to make my brain work and think of some of the things I had memorized for the occasion, but couldn't remember a darn thing. I'll bet I crossed and recrossed my legs fifty times before I thought to speak of the weather as a starter.

"It's sho—sho—shore a pretty day," I finally blurted out, which wise observation made her giggle and twist more than ever. It seemed to me I sat there a week trying to think of something else to say, but I was hopelessly stuck. Oh, how I would have welcomed a cyclone or earthquake, anything to break that awful spell I was under. But at last a hen came from under the house spreading the glad tidings to the world

that she had laid another egg. The cackling of that hen loosened up my brain, if I had any, and I said: "Ain't hens fu—fun—funny things, with feathers on their backs and stomachs and legs, which wise-crack caused Mary to hide her head behind a curtain and laugh long and loud. By this time I was desperate and continued to talk about the hen from every angle in an effort to start some sort of conversation.

Mary Bolts From the Room

"Wouldn't you hate to be a hen, Mary, and have to lay eggs, hatch chickens and be caught by a hawk and"—but just then Mary bolted from the room and I made a run for my pony, vaulted into the saddle and left in great haste.

The trouble with me I was trying to do something out of the ordinary and took stage fright.

All my life I have been a flat failure at memorizing things and trying to spring them on the impulse of the moment. As an example of this, take the time I called on old man Huggins to ask for the hand of his daughter, Sallie. Before calling on him I had memorized a speech that I thought was flawless. The speech ran something like this: "Mr. Huggins, doubtless you are aware of the undying love that exists between me and Sallie and we want your consent to marry if you will give it, but if not we are going to be wed if we have to elope. At the present time, as you well know, Mr. Huggins, I am a poor boy, but am full of ambition and high hopes and expect to climb higher the ladder of fame and I know the time will come when you will be proud of me as a son-in-law. What is your answer, Mr. Huggins?"

That speech in theory seemed letter perfect and not a loophole in it, but it ended more disastrously than the romantic call I made that Sunday on Mary

Tuttle. Sallie's pa was nailing planks on a hog pen when I suddenly appeared before him to spring the sweet "story" of love. Then an unfortunate thing happened. He struck his thumb with the hammer, and was still "cussing" as I timidly drew nigh unto him. "Mr. Hug—Hug—Hug—Huggins, I have come to ask you"—"Go get any d—n thing you want," he cut in on me, "but don't bother me while I'm nailing these planks. Can't you see I've mashed a thumb-nail nearly off. Whatever it is you want to borrow, go to the house and ask the old woman or Sallie where to find it and don't bother me while I'm trying to fix this dern hog pen."

Such is life—and how strange are the decrees of fate and how little we know what the future holds in store. Had I not tried to court Mary Tuttle in an unnatural way we may have gone down life's highway hand-in-hand to a ripe old age as man and wife, and if old man Huggins hadn't hit his thumb with a hammer at such an inopportune moment Sallie and I, in all probability, would have entered the holy bonds of matrimony, reared a large and interesting family and lived happily ever afterward.

MEMORIAL GATEWAY FOR CAMERON PARK

Work is now under construction on a memorial gateway at the entrance of Cameron Park, Waco. The gateway is being constructed of Texas limestone, used in the old Waco city hall, and which has stood the ravages of time for more than half a century. It is hoped to have the memorial archway completed by May 27, on which date the twenty-fifth anniversary of Cameron Park will be observed. This park, which now consists of 500 acres, was given to Waco by Mrs. Flora B. Cameron and her three children. The value of the park is estimated at \$650,000.

HISTORIC VIOLIN

A. J. Broderick and George Calvert, oil operators of Fort Worth, own a very historic and ancient violin, known as the "White House" violin. It is said that President Abraham Lincoln attempted to play this old instrument, but making poor success, abandoned his ambition to become a violinist. The former owner of the instrument, Colonel William H. Crook, once played the violin for the entertainment of President Roosevelt.

The violin has stamped on it the date 1606, and there is a tag showing it was repaired in 1620. Colonel Crook, who was commissary at the White House for thirty years, kept the violin until his death in 1915. At the recent anniversary of President Lincoln's birth, a talented violinist played the old instrument for a radio program.

TUNG OIL TREES FOR LIBERTY LAND

Business men of Cleveland are planning the planting of tung oil trees on cut-over land in Liberty county. The decision to plant these trees was reached after a conference with the agricultural agent of the Southern Pacific Railway Company. Lands in portions of the county are very cheap and appear to be suited for the growth of tung oil trees. Tung oil trees originally came from China and are an important source of a water-resistant varnish in great demand in many parts of the world.

NEW DORMITORY FOR TRINITY UNIVERSITY

Plans have been completed for a new dormitory for men at Trinity University, Waxahachie. The structure would cost about \$100,000 and would have approximately 100 rooms. It would replace Beeson Hall, which was destroyed by fire last October.

"I must have looked funny to Mary"

MILK PLANT NEARS COMPLETION

Work on the Texas Milk Products plant in Mount Pleasant is nearing completion, and the plant will be finished some time during the present spring. This plant will cost \$200,000.

HEAVY CORDWOOD SHIPMENTS

During 1929, Edgewood, Van Zandt county, shipped more than 1,000 carloads of cordwood. Other stations near also made heavy shipments. Most of the wood was shipped to western Texas.

ASK PERMIT TO BUILD CAUSEWAY

An application has been filed with the U. S. army district engineer for authority to build a causeway from Point Isabel to Padre Island. Provision would be made for two boat passages. The cost is estimated at about \$1,000,000.

LARGEST INLAND POSTOFFICE

Canton, Van Zandt county, Texas, is the largest postoffice in the United States not on a railway line. The office's receipts in 1929 exceeded \$7,000. The office has a double daily mail service from Edgewood, ten miles away, and five rural mail routes lead out of the town.

POWDERED MILK PLANT AT LAMESA

The powdered milk plant at Lamesa, the cost of which will be about \$200,000, nears completion. A recent survey shows that there are 10,000 milk cows in Dawson county, a large number of which were shipped in since plans were announced for the erection of the Lamesa powdered milk plant.

SECOND PRESIDENT OF A. & M. COLLEGE DEAD

John Garland James, who was the second president of Texas A. & M. College, died in Dallas recently, death following a long illness. Mr. James was elected president of the college in 1857, the second year after it was founded. He served as president three years.

TEACHERS' COLLEGE LIBRARY OPENED

The Sam Houston State Teachers' College at Huntsville has a beautiful new library building, known as the Estlin Library. This magnificent new building was formally opened a few weeks ago, with impressive ceremonies. The principal address was delivered at the opening by Dr. T. H. Shelby, of the University of Texas.

SHIPPED \$50,000 WORTH OF FURS

The fur industry is an important one in Liberty and Chambers counties. A recent check of the fur-buyers records show that last season furs shipped from these counties totaled more than \$50,000 in value. The price of furs dropped 50 percent in the latter part of the season on account of the overloaded market, reducing the total value of the pelts trapped.

SNOW IN MAY, 1857

On the eleventh day of May, 1857, snow fell throughout North Texas to a depth of twelve inches and all vegetation was destroyed. Forest trees were stripped of their foliage, wheat, corn and oats and all farm and garden crops were as completely destroyed as if the entire country had been swept by fire. On the eighth day of May, in 1877, the cold was nearly as intense, but there was no snow.

FORT WORTH HAS WOMEN ON POLICE FORCE

Fort Worth now has four women members of her police force. Dance halls, night clubs and similar places of amusement constitute the beat of the police women. They also look in on the movies and theaters and question girls on the street who may seem in need of advice or the guiding hand of a policeman.

Whether policewoman use physical force when persuasion fails is up to the policewoman and depends on her physique as compared with the brawn of the troublesome prisoner.

MULES TRADED ON TRACTORS

A news note from Miles says about 2,500 mules were shipped out of Runnels county during the year 1929. Most of these mules were taken in by local agencies on tractors. Others were sold direct to shippers by the farmers. A number of horses were also shipped from the county. The mule and horse population of the county is rapidly decreasing and tractors are taking their places on the farms. There are now more than 1,000 tractors in use in the county, whereas four years ago the number was less than 100. When tractors were first sold to farmers it was the rule for them to retain at least one span of horses or mules with which odd jobs about the farm were done, but since tractors have come into more general use, many farmers have dispensed with work stock entirely, doing all their farm work with tractors.

MINISTER AND WIFE MARRIED SIXTY YEARS

One of the oldest ministers in the State, now in active service, is Rev. G. M. Hall, of the Copeville community, Collin county. A few weeks ago Rev. Mr. Hall and his good wife celebrated their sixtieth wedding anniversary. Mr. Hall served three years in the Confederate army under Generals Forest, Johnston and Bragg. He has been a Presbyterian minister since 1880, and has served many churches.

NEW RAIL PROJECTS SOUGHT

Under the auspices of the Chamber of Commerce of Stamford, a meeting was recently held, the object of which was to give impetus to a movement to have towns in western Texas and eastern New Mexico interest the Burlington Railway system in undertaking a large building program in the sections named.

The proposal would seek the building of four different sections of railroad, involving over 500 miles of new construction. Included in the program sought are an extension of the Burlington line now terminating at Dimmitt northeastward to Tucumcari, N. M.; another extension from Plainview southwestward to Roswell, N. M.; extension of the Wichita Valley northwestward from Spur, its present terminus, to Plainview, and the building of a new line from Stamford, directly east, to Fort Worth.

TEXAS' BOY GIANT

The largest boy Texas has produced was named Dewey Ashcraft. Dewey was born in Fannin county, Texas, and died about two months before he would have reached the age of sixteen. He passed away in March, 1914. A few days before his death he weighed 605 pounds.

Very early in life the boy showed abnormal growth. At four years of age he was heavier than boys ten years his senior, and every year added largely to his weight. His mother was a small woman and his father weighed about 170 pounds.

The coffin in which the boy was buried was the largest ever seen in the section in which he had lived. There was no casket large enough in the undertaking establishments and one had to be made by the neighbors. The coffin was six and one-half feet long, three feet, four inches wide, and two feet, five inches deep. In order to remove the body from the house it was necessary to tear out one end of the building, as the coffin would not pass through the door. It required the strength of several men, with handspikes, to carry the coffin, and the coffin and body were interred with great difficulty.

LIFE INSURANCE IN TEXAS NEARLY THREE BILLION

Life insurance in force in Texas amounted to \$2,877,525,174, according to the recent annual report of the Board of Insurance Commissioners. These figures are for the close of the year 1928, the latest definite figures available and include the business of legal reserves and fraternal companies. This total would be increased somewhat by the addition of the figures of assessment associations.

The report shows that the legal reserve companies had in force 1,143,420 policies for a total of \$1,032,742,479. There were twenty-eight Texas companies. One hundred and four out-of-State companies operating in Texas had in this State 863,946 policies for a total of \$1,404,329,169. Seventeen Texas fraternal organizations had 170,149 certificates in force for a total of \$125,092,091, while fifty out-of-State fraternal organizations doing business in Texas had in this State 282,525 certificates in force, amounting to \$315,361,495.

The amount of insurance in Texas has grown phenomenally. The report of the Insurance Commission of 1893 showed that there was \$107,590,986 in insurance in force in this State.

STAPLE COTTON GROWERS RECEIVED GOOD PREMIUMS

That the growing of staple cotton in Texas pays is evidenced by the figures submitted by farmers of McLennan county, near Waco. Premiums of as high as 142 points on October were obtained on forty-six bales of Lankhart cotton by one farmer, on ninety-five bales by another and on 130 bales by another. Average street cotton, 16-16ths and below, sold at that time on the Waco market from 36 to 60 points off on October. The premium on the longer staple cotton therefore amounted to from 170 to 200 points, or \$8.85 to \$10 a bale.

The best showing was made on September 14 when a lot of 394 bales of long-staple cotton were sold by the three farmers and brought premiums ranging from \$9.75 to \$11 a bale above street prices. Some of the cotton brought a much larger premium.

THIRTY-FIVE YEARS AGO (April, 1895)

The Cubans were waging a fight against Spain for independence. The Cubans, under General Maceo, had just defeated a Spanish army and captured 500 prisoners.

Porfirio Diaz had been endorsed for re-election to the presidency of Mexico. Frank P. Holland, editor of the Farm and Ranch, had been elected mayor of Dallas.

The first horseless carriage had been built in France and patented. It was constructed of tubes, which were encased in light frame work and not visible. The tubes formed the tank to supply water to the cylinders. The water was conducted into two small tubes with closed ends over petroleum-lighted wicks, no larger than those of a Duplex lamp. These supplied steam for the cylinders sufficient to drive a carriage weighing thirteen hundred pounds at the rate of fifteen miles an hour over level ground and three or four miles an hour up grades. This vehicle was the forerunner of the automobiles of today.

A bill had been passed by the Texas Legislature and signed by Governor Culberson, giving the State control of primary elections of political parties.

William J. Bryan had retired from Congress to become editor-in-chief of the Omaha (Neb.) World-Herald.

The United States Supreme Court had passed on the income tax law, holding most of it valid, but declaring unconstitutional the section levying an income tax on rents and State and municipal bonds.

China and Japan, after a long war, had signed articles of peace. China granted the independence of Korea. Japan retained all the territory it had conquered, and China agreed to pay Japan an indemnity of \$100,000,000.

Blind Tom, the negro musical wonder of the world, was making a tour of Texas, giving recitals.

Middling cotton was selling at six cents a pound, the first time the price had been that high during the marketing of the 1894 crop.

NEW RAILWAY LINE TO OPERATE BY JULY 11

The new line of the Rock Island Railway Company, connecting Dalhart, Texas, with Morse, Texas, will be in operation by July 1, according to announcement of officials of the company. The sixty-mile line will connect the trunk line of the Rock Island at Dalhart with the Amarillo-Liberal (Kan.) line, intersecting the latter just north of the Canadian river. The new line will give Moore county, Texas, its first railroad.

AUSTRALIANS STUDYING CACTUS PLANT

Australian scientists, who had for some time been studying the cactus plant in Texas, with the hope of learning how to combat it, have temporarily transferred their base of study from Southwest Texas to the State of Oaxaca, Mexico. Their headquarters in Texas were at Uvalde, where they worked nearly eight years, spending \$36,000 annually gathering parasitic insects and conducting experiments. Thousands of more than fifty species of insects have been sent to Australia in a campaign to kill cactus there. They report partial success.

TEXAS FURNISHED ONE-FIFTH OF OIL SUPPLY

In the year 1929 Texas produced 298,441,000 barrels of crude oil. This was 29.6 per cent of the oil produced in the United States and 20 per cent of the world production, which made 1,488,604,000 barrels. It is worthy of note that these percentage figures are almost the same as those representing the Texas contribution to national and world cotton production, using an average of the last few years. In 1929, however, which was a short cotton year in Texas, this State did not occupy relatively as strong a position in cotton as it did in petroleum.

Texas led the States in petroleum production in 1929, with California second and Oklahoma third. The three States produced above 84 per cent of the national production, and about 57 per cent of the world output.

Even with very poor markets for both cotton and petroleum, these two products in crude form brought the State close to three-quarters of a billion dollars. With good market conditions, and with average production as indicated the last few years, cotton and petroleum alone would bring Texas a billion dollars annually. This figures out at more than \$2,700,000 daily, not excluding Sundays and holidays.

DAUGHTERS OF REPUBLIC TO HAVE GOOD MUSEUM

The State Museum of the Daughters of the Republic, which is housed in an ancient building in a corner of the Capitol grounds at Austin, contains many treasured relics of early Texas history as well as hundreds of mementoes of the Indian, Mexican,

Civil, Spanish-American and World wars. The building, which was erected seventy-five years ago, resembles an old feudal castle. It has turrets on each corner, and its windows are protected by iron shutters and doors. The custodian is H. C. Wright, who is ninety years old, an ex-Confederate, who has a clear memory of early Texas history, and especially of incidents of the Civil war period. The building is decorated with bullet-riddled flags of the Republic of Texas and many relics of the battles of the Alamo and San Jacinto. There is also a piano which was used by the daughter of Jefferson Davis when he was president of the Southern Confederacy. The collection of Indian weapons of war is said to be the best in existence and there is also a complete collection of Confederate money. There is also a large collection of household articles of the days when Texas was a republic, such as spinning wheels, reels, looms, etc.

ROCK ISLAND PROPOSES NEW LINE

The Rock Island Railway Company has applied to the Interstate Commerce Commission for authority to construct seventy-six miles of railroad, fifty miles of which would be in Texas. The new line would begin at Vega, Oldham county, on the Rock Island's Tucumcari branch, extending southwest through Deaf Smith county, and into New Mexico, ending at the line between Curry and Quay counties, that State.

The line would develop an agricultural section now without railroads. The estimated cost of the new line is in the neighborhood of \$2,250,000. It will connect with the Memphis-California line of the Rock Island about eighty miles east of Tucumcari. The territory to be served by the new line is nearly all under cultivation.

HEN ADOPTED PUPPIES

Many strange stories are told of animals of one species adopting and rearing the young of another. This writer once saw a mamma cat with a litter of young squirrels, which she nursed and cared for as tenderly as if they had been kittens, and the baby squirrels bestowed all the affection and trust upon the mamma cat that kittens could have done. The mother cat had lost her own babies, and about that time a boy captured four young squirrels in the woods and turned them over to the love and care of the feline. One of the strangest stories of this nature comes from Arlington, Texas. A farmer near that town has a hen he tried to break from setting, but without success, even though her nest was filled with old tin cans and other rubbish. Determined to play the role of mother, the hen finally adopted three small puppies for her own and proceeded to mother them. She covered the puppies under her wings and fought so fiercely that the mother dog could not come near her babies, thus causing the puppies to almost starve to death before the hen's feat was discovered by the farmer. The domestic troubles between the two mothers were finally settled by taking the pups away from the hen at meal time and returning them to her after lunch.

MEMORIAL TO FAMED STAGE LINE

Daughters of the American Revolution recently dedicated a monument as a memorial to John Butterfield's famed stage and mail line from St. Louis to Los Angeles. The memorial stands about twelve miles west of Abilene, at a point where the Bankhead highway crosses the Butterfield route. The dedication was witnessed by more than 500 residents of West Texas.

Butterfield's project, generally known as the Overland Mail, was created when Congress let a contract in July, 1857, to meet the need of communication between California and the eastern section of the United States. The contract with Butterfield called for payment of \$600,000 a year for a period of four years in return for a semi-weekly mail service. This mail route, which was 2,800 miles long, was operated continuously from 1859 to 1861. At the time of its establishment there was no one living on the section where the memorial was erected except two men and a negro cook who occupied a little stage stand fourteen miles west. At this stand fresh teams were kept to replace those tired out by the long journey.

The trip from St. Louis to Los Angeles required from 23 to 26 days of hard travel, and the passenger fare was \$200. In emergencies the mail was forwarded on horseback and by foot-passenger.

Texas Has Given Away Millions of Acres of Land

(Continued From Page 2)

considerable amount of the land set aside for the county funds is still held by counties.

Heads of Families Granted 4,428 Acres

Heads of families of those in the Republic of Texas at the time independence was declared, were granted 4,428 acres. Single men under the same classification received 1,476 acres.

Other grants were made for persons coming to Texas after the Declaration of Independence, amounting to approximately two sections of land per person.

A donation of 640 acres also was made to each of those who participated in the Battle of San Jacinto, that historic battle near Houston, that wrote the finale of our war with Mexico.

The development of Texas lands and land grants is one of the most interesting stories in Texas history. Texas, at one time was owned by Spain, later by Mexico, for 10 years was a republic, and finally, in 1846, ten years after having won independence from Mexico, was annexed to the United States. The setting aside of 52,000,000 acres of public domain land for school purposes has formed the basis of our present free public school system, including our State-owned colleges and universities.

DAIRY FACTS

By J. S. DAVIES

Manager Cream Purchasing, Mistletoe Creameries, Inc.

Marketing of Better Cream Necessary

For more than ten years dairying has been the most prosperous branch of American agriculture, this because the price of dairy products has on a whole been profitable. For years dairying has been the mainstay of both agriculture and business in many States, providing a steady all-year cash income for our dairy farmers, enabling them to pay their grocery bills from month to month. This is likewise the situation in the South, to a more moderate degree however, because the development of the dairy industry in this part of the country only commenced to gather impetus a few years ago. However, the industry is developing rapidly in many directions as indicated by the establishment not only of an increased number of creameries, but also a few cheese factories and milk power plants.

In the latter part of 1929 prices of dairy products took a sudden and sharp slump, and have remained at a low figure up to two or three weeks ago when there seems to have come about a turn in the market for betterment. Especially is this the case with reference to that part of the production diverted to butter plants. The cause of this slump was not over-production of butterfat or dairy cows, but an under-consumption of butter and an increased use of butter substitutes. The National Dairy Council, the various State dairy departments and agricultural colleges, and many other agencies are co-operating in a great campaign to increase the consumption of butter in the United States by reducing the use of butter substitutes. All our people, farmers and business men alike, are urged to heartily support this movement.

One cause of a development of the situation referred to above came about because of there being a very large amount of under-grade or low grade butter manufactured in the plants of the United States that was slow to market, and on passing into storage hands led to the greatest amount of butter being in storage last

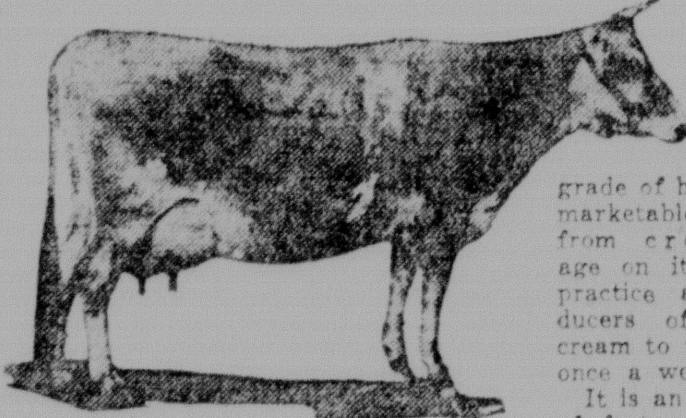

storage season that has ever existed in the United States. The manufacturers in the United States therefore realize the necessity of working in the direction of improving the quality of butter manufactured, and there arises the situation that their efforts in this direction must be toward improving the quality of the raw material from first, or producer's hands. It is impractical to believe a high grade of butter that is easily marketable can be made from cream carrying age on it, there being the practice among many producers of delivering their cream to the purchasers but once a week.

It is an established matter of fact and knowledge that some plan must be worked out and devised whereby the producer will market his cream oftener, and likewise use every precaution and care in handling the product during the time of accumulation. Age is a definite factor in bringing about the deterioration of all dairy products, and there is coming about a wider understanding of this matter and a conclusion that the purchase of the raw material from first hands must have environments thrown around such purchase that will bring about an improvement in the quality of the raw material, and consequently a like improvement in the finished product. Upon this accomplishment depends to a material result the future of the industry, and the continuation of normal prices and a profitable return to dairying.

Every producer should realize and co-operate with their creamery outlets, and deliver their raw material for manufacture as often and as regularly as possible, with preferably deliveries twice and three times a week. A full co-operation between the manufacturers and the producers will effect a result of stabilizing the dairy industry and likewise the manufacturing end of the industry; however, both industries must co-operate if they expect a continuation of that prosperity which dairying deserves.

Every producer should realize and co-operate with their creamery outlets, and deliver their raw material for manufacture as often and as regularly as possible, with preferably deliveries twice and three times a week. A full co-operation between the manufacturers and the producers will effect a result of stabilizing the dairy industry and likewise the manufacturing end of the industry; however, both industries must co-operate if they expect a continuation of that prosperity which dairying deserves.

(Any subscriber of this newspaper who has a question to ask about his dairy cattle should write Mr. J. W. Ridgeway and he will be glad to answer it free of cost. Address Box 1012, Fort Worth, Texas.)

MILK PLANT NEARS
COMPLETION

Work on the Texas Milk Products plant in Mount Pleasant is nearing completion, and the plant will be finished some time during the present spring. This plant will cost \$200,000.

HEAVY CORDWOOD SHIPMENTS

During 1929, Edgewood, Van Zandt county, shipped more than 1,000 carloads of cordwood. Other stations near also made heavy shipments. Most of the wood was shipped to western Texas.

ASK PERMIT TO BUILD CAUSEWAY

An application has been filed with the U. S. army district engineer for authority to build a causeway from Point Isabel to Padre Island. Provision would be made for two boat passages. The cost is estimated at about \$1,000,000.

LARGEST INLAND POSTOFFICE

Canton, Van Zandt county, Texas, is the largest postoffice in the United States not on a railway line. The office's receipts in 1929 exceeded \$7,000. The office has a double daily mail service from Edgewood, ten miles away, and five rural mail routes lead out of the town.

POWDERED MILK PLANT AT
LAMESA

The powdered milk plant at Lamesa, the cost of which will be about \$200,000, nears completion. A recent survey shows that there are 10,000 milk cows in Dawson county, a large number of which were shipped in since plans were announced for the erection of the Lamesa powdered milk plant.

SECOND PRESIDENT OF A. & M.
COLLEGE DEAD

John Garland James, who was the second president of Texas A. & M. College, died in Dallas recently, death following a long illness. Mr. James was elected president of the college in 1857, the second year after it was founded. He served as president three years.

TEACHERS' COLLEGE LIBRARY
OPENED

The Sam Houston State Teachers' College at Huntsville has a beautiful new library building, known as the Estill Library. This magnificent new building was formally opened a few weeks ago, with impressive ceremonies. The principal address was delivered at the opening by Dr. T. H. Shelby, of the University of Texas.

SHIPPED \$50,000 WORTH OF FURS

The fur industry is an important one in Liberty and Chambers counties. A recent check of the fur-buyers records show that last season furs shipped from these counties totaled more than \$50,000 in value. The price of furs dropped 50 per cent in the latter part of the season on account of the overloaded market, reducing the total value of the pelts trapped.

SNOW IN MAY, 1857

On the eleventh day of May, 1857, snow fell throughout North Texas to a depth of twelve inches and all vegetation was destroyed. Forest trees were stripped of their foliage, wheat, corn and oats and all farm and garden crops were as completely destroyed as if the entire country had been swept by fire. On the eighth day of May, in 1877, the cold was nearly as intense, but there was no snow.

FORT WORTH HAS WOMEN ON
POLICE FORCE

Fort Worth now has four women members of her police force. Dance halls, night clubs and similar places of amusement constitute the beat of the police women. They also look in on the movies and theaters and question girls on the street who may seem in need of advice or the guiding hand of a policeman.

Whether policewoman use physical force when persuasion fails is up to the policewoman and depends on her physique as compared with the brawn of the troublesome prisoner.

MULES TRADED ON TRACTORS

A news note from Miles says about 2,500 mules were shipped out of Runnels county during the year 1929. Most of these mules were taken in by local agencies on tractors. Others were sold direct to shippers by the farmers. A number of horses were also shipped from the county. The mule and horse population of the county is rapidly decreasing and tractors are taking their places on the farms. There are now more than 1,000 tractors in use in the county, whereas four years ago the number was less than 100. When tractors were first sold to farmers it was the rule for them to retain at least one span of horses or mules with which odd jobs about the farm were done, but since tractors have come into more general use, many farmers have dispensed with work stock entirely, doing all their farm work with tractor.

MINISTER AND WIFE MARRIED
SIXTY YEARS

One of the oldest ministers in the State, now in active service, is Rev. G. M. Hall, of the Copeville community, Collin county. A few weeks ago Rev. Mr. Hall and his good wife celebrated their sixtieth wedding anniversary. Mr. Hall served three years in the Confederate army under Generals Forest, Johnston and Bragg. He has been a Presbyterian minister since 1880, and has served many churches.

NEW RAIL PROJECTS SOUGHT

Under the auspices of the Chamber of Commerce of Stamford, a meeting was recently held, the object of which was to give impetus to a movement to have towns in western Texas and eastern New Mexico interest the Burlington Railway system in undertaking a large building program in the sections named.

The proposal would seek the building of four different sections of railroad, involving over 500 miles of new construction. Included in the program sought are an extension of the Burlington line now terminating at Dimmitt northeastward to Tucumcari, N. M.; another extension from Plainview southwestward to Roswell, N. M.; extension of the Wichita Valley northwestward from Spur, its present terminus, to Plainview, and the building of a new line from Stamford, directly east, to Fort Worth.

TEXAS' BOY GIANT

The largest boy Texas has produced was named Dewey Ashcraft. Dewey was born in Fannin county, Texas, and died about two months before he would have reached the age of sixteen. He passed away in March, 1914. A few days before his death he weighed 605 pounds.

Very early in life the boy showed abnormal growth. At four years of age he was heavier than boys ten years his senior, and every year added largely to his weight. His mother was a small woman and his father weighed about 170 pounds.

The coffin in which the boy was buried was the largest ever seen in the section in which he had lived. There was no casket large enough in the undertaking establishments and one had to be made by the neighbors. The coffin was six and one-half feet long, three feet, four inches wide, and two feet, five inches deep. In order to remove the body from the house it was necessary to tear out one end of the building, as the coffin would not pass through the door. It required the strength of several men, with handspikes, to carry the coffin, and the coffin and body were interred with great difficulty.

LIFE INSURANCE IN TEXAS
NEARLY THREE BILLION

Life insurance in force in Texas amounted to \$2,877,525,174, according to the recent annual report of the Board of Insurance Commissioners. These figures are for the close of the year 1928, the latest definite figures available and include the business of legal reserves and fraternal companies. This total would be increased somewhat by the addition of the figures of assessment associations.

The report shows that the legal reserve companies had in force 1,143,420 policies for a total of \$1,032,742,479. There were twenty-eight Texas companies. One hundred and four out-of-State companies operating in Texas had in this State 863,946 policies for a total of \$1,404,329,169. Seventeen Texas fraternal organizations had 170,149 certificates in force for a total of \$125,092,091, while fifty out-of-State fraternal organizations doing business in Texas had in this State 282,525 certificates in force, amounting to \$315,361,495.

The amount of insurance in Texas has grown phenomenally. The report of the Insurance Commission of 1893 showed that there was \$107,590,986 in insurance in force in this State.

STAPLE COTTON GROWERS RE-
CEIVED GOOD PREMIUMS

That the growing of staple cotton in Texas pays is evidenced by the figures submitted by farmers of McLennan county, near Waco. Premiums of as high as 142 points on October were obtained on forty-six bales of Lankhart cotton by one farmer, on ninety-five bales by another and on 130 bales by another. Average street cotton, 16-16ths and below, sold at that time on the Waco market from 36 to 60 points off on October. The premium on the longer staple cotton therefore amounted to from 170 to 200 points, or \$8.85 to \$10 a bale.

The best showing was made on September 14 when a lot of 394 bales of long-staple cotton were sold by the three farmers and brought premiums ranging from \$9.75 to \$11 a bale above street prices. Some of the cotton brought a much larger premium.

THIRTY-FIVE YEARS AGO
(April, 1895)

The Cubans were waging a fight against Spain for independence. The Cubans, under General Maceo, had just defeated a Spanish army and captured 500 prisoners.

Porfirio Diaz had been endorsed for re-election to the presidency of Mexico. Frank P. Holland, editor of the Farm and Ranch, had been elected mayor of Dallas.

The first horseless carriage had been built in France and patented. It was constructed of tubes, which were encased in light frame work and not visible. The tubes formed the tank to supply water to the cylinders. The water was conducted into two small tubes with closed ends over petroleum-lighted wicks, no larger than those of a Duplex lamp. These supplied steam for the cylinders sufficient to drive a carriage weighing thirteen hundred pounds at the rate of fifteen miles an hour over level ground and three or four miles an hour up grades. This vehicle was the forerunner of the automobiles of today.

A bill had been passed by the Texas Legislature and signed by Governor Culberson, giving the State control of primary elections of political parties.

William J. Bryan had retired from Congress to become editor-in-chief of the Omaha (Neb.) World-Herald.

The United States Supreme Court had passed on the income tax law, holding most of it valid, but declaring unconstitutional the section levying an income tax on rents and State and municipal bonds.

China and Japan, after a long war, had signed articles of peace. China granted the independence of Korea. Japan retained all the territory it had conquered, and China agreed to pay Japan an indemnity of \$100,000,000.

Blind Tom, the negro musical wonder of the world, was making a tour of Texas, giving recitals.

Middling cotton was selling at six cents a pound, the first time the price had been that high during the marketing of the 1894 crop.

DAIRY FACTS

Marketing of Better Cream Necessary

For more than ten years dairying has been the most prosperous branch of American agriculture, this because the price of dairy products has on a whole been profitable. For years dairying has been the mainstay of both agriculture and business in many States, providing a steady all-year cash income for our dairy farmers, enabling them to pay their grocery bills from month to month. This is likewise the situation in the South, to a more moderate degree however, because the development of the dairy industry in this part of the country only commenced to gather impetus a few years ago. However, the industry is developing rapidly in many directions as indicated by the establishment not only of an increased number of creameries, but also a few cheese factories and milk power plants.

In the latter part of 1929 prices of dairy products took a sudden and sharp slump, and have remained at a low figure up to two or three weeks ago when there seems to have come about a turn in the market for betterment. Especially is this the case with reference to that part of the production diverted to butter plants. The cause of this slump was not over-production of butterfat or dairy cows, but an under-consumption of butter and an increased use of butter substitutes. The National Dairy Council, the various State dairy departments and agricultural colleges, and many other agencies are co-operating in a great campaign to increase the consumption of butter in the United States by reducing the use of butter substitutes. All our people, farmers and business men alike, are urged to heartily support this movement.

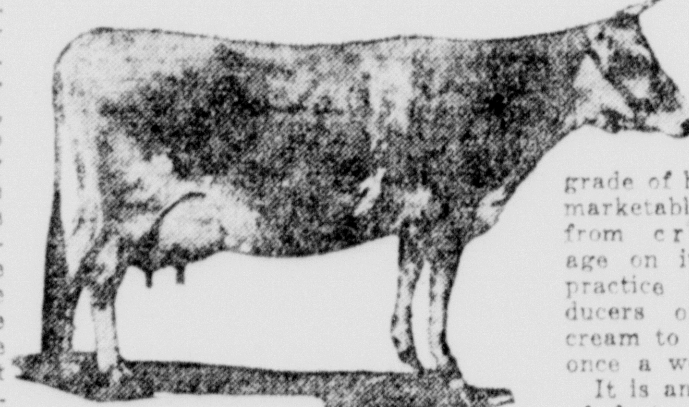

One cause of a development of the situation referred to above came about because of there being a very large amount of under-grade or low grade butter manufactured in the plants of the United States that was slow to market, and on passing into storage hands led to the greatest amount of butter being in storage last

storage season that has ever existed in the United States. The manufacturers in the United States therefore realize the necessity of working in the direction of improving the quality of butter manufactured, and there arises the situation that their efforts in this direction must be toward improving the quality of the raw material from first, or producer's hands. It is impractical to believe a high grade of butter that is easily marketable can be made from cream carrying age on it, there being the practice among many producers of delivering their cream to the purchasers but once a week.

It is an established matter of fact and knowledge that some plan must be worked out and devised whereby the producer will market his cream oftener, and likewise use every precaution and care in handling the product during the time of accumulation. Age is a definite factor in bringing about the deterioration of all dairy products, and there is coming about a wider understanding of this matter and a conclusion that the purchase of the raw material from first hands must have environments thrown around such purchase that will bring about an improvement in the quality of the raw material, and consequently a like improvement in the finished product. Upon this accomplishment depends to a material result the future of the industry, and the continuation of normal prices and a profitable return to dairymen.

Every producer should realize and co-operate with their creamery outlets, and deliver their raw material for manufacture as often and as regularly as possible, with preferably deliveries twice and three times a week. A full co-operation between the manufacturers and the producers will effect a result of stabilizing the dairy industry and likewise the manufacturing end of the industry; however, both industries must co-operate if they expect a continuation of that prosperity which dairymen deserves.

(Any subscriber of this newspaper who has a question to ask about his dairy cattle should write Mr. J. W. Ridgway and he will be glad to answer it free of cost. Address Box 1012, Fort Worth, Texas.)

NEW RAILWAY LINE TO OPERATE
BY JULY 11

The new line of the Rock Island Railway Company, connecting Dalhart, Texas, with Morse, Texas, will be in operation by July 1, according to announcement of officials of the company. The sixty-mile line will connect the trunk line of the Rock Island at Dalhart with the Amarillo-Liberal (Kan.) line, intersecting the latter just north of the Canadian river. The new line will give Moore county, Texas, its first railroad.

AUSTRALIANS STUDYING CACTUS
PLANT

Australian scientists, who had for some time been studying the cactus plant in Texas, with the hope of learning how to combat it, have temporarily transferred their base of study from Southwest Texas to the State of Oaxaca, Mexico. Their headquarters in Texas were at Uvalde, where they worked nearly eight years, spending \$36,000 annually gathering parasitic insects and conducting experiments. Thousands of more than fifty species of insects have been sent to Australia in a campaign to kill cactus there. They report partial success.

TEXAS FURNISHED ONE-FIFTH OF
OIL SUPPLY

In the year 1929 Texas produced 298,441,000 barrels of crude oil. This was 29.6 per cent of the oil produced in the United States and 20 per cent of the world production, which made 1,488,604,000 barrels. It is worthy of note that these percentage figures are almost the same as those representing the Texas contribution to national and world cotton production, using an average of the last few years. In 1929, however, which was a short cotton year in Texas, this State did not occupy relatively as strong a position in cotton as it did in petroleum.

Texas led the States in petroleum production in 1929, with California second and Oklahoma third. The three States produced above 84 per cent of the national production, and about 57 per cent of the world output.

Even with very poor markets for both cotton and petroleum, these two products in crude form brought the State close to three-quarters of a billion dollars. With good market conditions, and with average production as indicated the last few years, cotton and petroleum alone would bring Texas a billion dollars annually. This figures out at more than \$2,700,000 daily, not excluding Sundays and holidays.

DAUGHTERS OF REPUBLIC TO
HAVE GOOD MUSEUM

The State Museum of the Daughters of the Republic, which is housed in an ancient building in a corner of the Capitol grounds at Austin, contains many treasured relics of early Texas history as well as hundreds of mementoes of the Indian, Mexican, Civil, Spanish-American and World wars. The building, which was erected seventy-five years ago, resembles an old feudal castle. It has turrets on each corner, and its windows are protected by iron shutters and doors.

The custodian is H. C. Wright, who is ninety years old, an ex-Confederate, who has a clear memory of early Texas history, and especially of incidents of the Civil war period. The building is decorated with bullet-riddled flags of the Republic of Texas and many relics of the battles of the Alamo and San Jacinto. There is also a piano which was used by the daughter of Jefferson Davis when he was president of the Southern Confederacy. The collection of Indian weapons of war is said to be the best in existence and there is also a complete collection of Confederate money. There is also a large collection of household articles of the days when Texas was a republic, such as spinning wheels, reels, looms, etc.

ROCK ISLAND PROPOSES NEW
LINE

The Rock Island Railway Company has applied to the Interstate Commerce Commission for authority to construct seventy-six miles of railroad, fifty miles of which would be in Texas. The new line would begin at Vega, Oldham county, on the Rock Island's Tucumcari branch, extending southwest through Deaf Smith county, and into New Mexico, ending at the line between Curry and Quay counties, that State.

The line would develop an agricultural section now without railroads. The estimated cost of the new line is in the neighborhood of \$2,250,000. It will connect with the Memphis-California line of the Rock Island about eighty miles east of Tucumcari. The territory to be served by the new line is nearly all under cultivation.

HEN ADOPTED PUPPIES

Many strange stories are told of animals of one species adopting and rearing the young of another. This writer once saw a mamma cat with a litter of young squirrels, which she nursed and cared for as tenderly as if they had been kittens, and the baby squirrels bestowed all the affection and trust upon the mamma cat that kittens could have done. The mother cat had lost her own babies, and about that time a boy captured four young squirrels in the woods and turned them over to the love and care of the feline. One of the strangest stories of this nature comes from Arlington, Texas. A farmer near that town has a hen he tried to break from setting, but without success, even though her nest was filled with old tin cans and other rubbish. Determined to play the role of mother, the hen finally adopted three small puppies for her own and proceeded to mother them. She covered the puppies under her wings and fought so fiercely that the mother dog could not come near her babies, thus causing the puppies to almost starve to death before the hen's feat was discovered by the farmer. The domestic troubles between the two mothers were finally settled by taking the pups away from the hen at meal time and returning them to her after lunch.

MEMORIAL TO FAMED STAGE
LINE

Daughters of the American Revolution recently dedicated a monument as a memorial to John Butterfield's famed stage and mail line from St. Louis to Los Angeles. The memorial stands about twelve miles west of Abilene, at a point where the Bankhead highway crosses the Butterfield route. The dedication was witnessed by more than 500 residents of West Texas.

Butterfield's project, generally known as the Overland Mail, was created when Congress let a contract in July, 1857, to meet the need of communication between California and the eastern section of the United States. The contract with Butterfield called for payment of \$600,000 a year for a period of four years in return for a semi-weekly mail service. This mail route, which was 2,800 miles long, was operated continuously from 1859 to 1861. At the time of its establishment there was no one living on the section where the memorial was erected except two men and a negro cook who occupied a little stage stand fourteen miles west. At this stand fresh teams were kept to replace those tired out by the long journey.

The trip from St. Louis to Los Angeles required from 23 to 26 days of hard travel, and the passenger fare was \$200. In emergencies the mail was forwarded on horseback and by foot-passenger.

Texas Has Given Away Mil-
lions of Acres of Land

(Continued From Page 2)

considerable amount of the land set aside for the county funds is still held by counties.

Heads of Families Granted 4,428 Acres

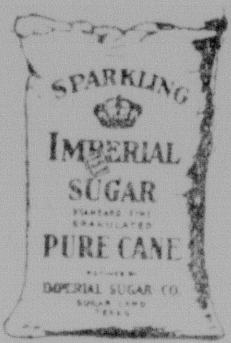

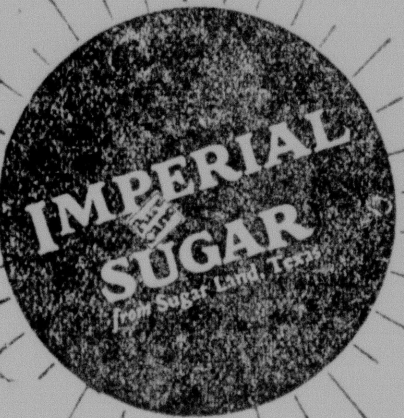

Heads of families of those in the Republic of Texas at the time independence was declared, were granted 4,428 acres. Single men under the same classification received 1,476 acres.

Other grants were made for persons coming to Texas after the Declaration of Independence, amounting to approximately two sections of land per person.

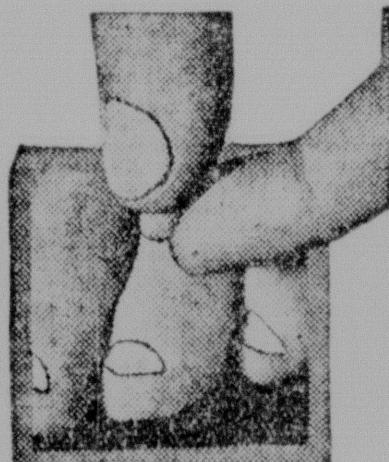

A donation of 640 acres also was made to each of those who participated in the Battle of San Jacinto, that historic battle near Houston, that wrote the finale of our war with Mexico.

The development of Texas lands and land grants is one of the most interesting stories in Texas history. Texas, at one time was owned by Spain, later by Mexico, for 10 years was a republic, and finally, in 1846, ten years after having won independence from Mexico, was annexed to the United States. The setting aside of 52,000,000 acres of public domain land for school purposes has formed the basis of our present free public school system, including our State-owned colleges and universities.

A LITTLE FUN Jokes to Make You Laugh

Questionable Compliment

Maggie—"Tom called me his darling little Easter egg last night. What do you suppose he meant by that?"
Susie—"Well, maybe he said that because you were all painted up and have a habit of getting hard-boiled."

Then He Explained

Fair Motorist (driving into garage): "Something is the matter with this car."
Mechanic (listening to the motor): "Your engine is missing."
Fair Motorist—"Why, that's funny. It certainly was in there when I started out."

A Twister

A city visitor, from one of the wind swept States, gazed intently at the spiral fire escape that wound its way down the rear of a thirty-story building.
"Gosh!" he exclaimed. "That must have been a danged long ladder before the cyclone hit it."

An Age of Miracles

An exchange says a wagon maker who had been dumb for years picked up a hub and spoke. Yes, and a blind carpenter on the same day reached out for a plane and saw; a deaf sheep ranchman went out with his dog and herd, a noseless fisherman caught a barrel of herring and smelt; a forty-ton elephant inserted his trunk into grate and flue.

No Free Calls

The telephone operator had been dozing in church and woke up just as the minister exhorted loudly:
"Call on Heaven when you are in trouble, brethren, call on Heaven."
"Drop your nickel, please," sweetly advised the young lady who was not fully aroused.

A Matter of Pedigree

A Scotchman and an Irishman were arguing as to the merits of their families. The Scotchman had the floor first.
"I tell ye laddie, I'm sprung from the best stock in the world—from the stock of the kings of Scotland. I've got royal blood in my veins. An' what stock are you sprung from?"
"I come from the Caseys," said the Irishman simply. "They niver sprung from nobody—they sprung at 'em!"

All in the Family

An artist who occupied a studio on the top floor of a large building was disposed to be pleasant to the janitress.
"How many children have you, Mrs. O'Flaherty," he asked her one morning as she was polishing the doorknob.
"It's seven I have, sir," she replied, "an' lucky I am. Bless 'em. Four by the third wife of me second husband, three by the second wife of me first."

Diary of a Girl Sailing to France

Monday—Awfully slow. Walked around deck. Wish I was over there.
Tuesday—Ditto.
Wednesday—Saw a good-looking officer on board.
Thursday—Am beginning to enjoy the water. Met officer at dance.
Friday—Walked all afternoon with officer. What a shame the trip will soon be over.
Saturday—Officer kissed me and I slapped him. Told me that if I did not act nice to him he'd blow up the ship and kill 250 people.
Sunday—Saved the ship and 250 people!

Borrowed the \$3,000

He had gone into the library to put the thing up to her father and she was anxiously waiting on the front porch.
"Well," said the prospective groom when he returned, "He asked me how I was fixed and I told him I had \$3,000 in the bank."
"And what did he say to that?"
"He borrowed it."

Of Course Not

A League for the Protection of Henpecked Husbands was once formed in a small Kansas town, and at the first meeting a chap named George Jones was elected president. George had just taken the chair and whacked the table for order with his gavel, when a tall, gaunt, rawboned woman burst into the hall, rushed at George, and seized him by the collar.
"You come home!" she shouted, shaking him. "What business have you got in a league of this kind? You ain't henpecked!"

Dentist—"So you've broken off a tooth, have you?"
Tough Youngster—"Yes, sir."
Dentist—"How did you do it?"
Tough Youngster—"Shifting gears on a lollipop."

Wish It Could Be Done

A group of traveling men were swapping lies about their radios in a Smith Center drug store. An old man had been listening silently.
"Got a radio, old man?" asked one of the drummers.
"Yeah," replied the old fellow. "I got a little two-tube affair. It's a pretty good one, though."
"Can you tune out these little stations with it?"
"Well, I was listening to a quartet the other night, and I didn't like the tenor, so I just tuned him out and listened to the three of 'em."

Johnny Was Observant

Small Johnny from the city was visiting his uncle on the farm for the first time and was very much interested in the procedure of milking.
"Now you know how uncle gets the milk, don't you?" his aunt asked.
"Sure," replied Johnny, "he gives the cow some breakfast food, then a drink of water and then drains her crankcase."

City Girl—What darling, fluffy chicks. Are they weaned yet?
Farmer Boy—Weaned? Naw, you don't hafta wean incubator chicks. They is born weaned.

The Red-Head and the Janitor

A red-headed boy once applied for a position in a messenger office. The manager after hiring him sent him on an errand in one of the most fashionable districts. Half an hour later the manager was called to the phone and the following conversation took place:
"Have you a red-headed boy working for you?"
"Yes."
"Well, this is the janitor at the Oakland apartments, where your boy came to deliver a message. He insisted on coming in the front way and was so persistent that I was forced to draw a gun."
"Good heavens! You didn't shoot him, did you?"
"No, but I want my gun back," said the janitor.

POULTRY FACTS

By F. W. KAZMEIER
Poultry Breeder, Bryan, Texas.

Brooding and Care of Baby Chicks

At this season of the year, one of many poultry problems is raising the baby chicks. It may seem like a great economical waste to tell you, that less than 50 per cent of the chicks hatched in Texas each year are raised. Millions are killed each year by improper care and feeding. This great waste can and should be prevented. A study of a few facts and principles, will help prevent this great mortality.
Chicks that are properly hatched can only be killed by improper brooding and wrong feeding. Strong chicks are not easily killed, and it is a pleasure to raise them. Many thousands of baby chicks come from weak parent stock, and are improperly hatched. Such chicks are handicapped from the very start.
Community hatcheries or custom hatching plants are rapidly being placed in all communities. Such plants when operated by experts may be depended upon to produce strong, vigorous and healthy chicks. Our story, however, has more to do with the chicks after it is hatched.

Crowding

One thing that nearly every human will want to do, is to overcrowd the chicks in the house or under the hover. Crowding will positively cause a great mortality and many stunted chicks. Give them plenty of room and they will do much better. A house 12x12 feet square will take care of 250 chicks 10 to 12 weeks old, when the cockerels may be culled out and sold as broilers. We can not devote much space at this time to the description of a good

brooder house; let it be sufficient to remember these facts, a good floor is necessary to prevent dampness, disease and trouble from vermin. A wood or concrete floor is preferred. There must be no floor drafts in the house. It must provide fresh air without subjecting the chicks to direct drafts. We will be glad to furnish free of charge blue prints showing the construction of a good brooder house.

A house 14x14 will accommodate 350 chicks up to 12 weeks old. Many more than this should not be brooded together at one time.

The brooder or hover should be a good one. A cheap brooder is like everything else that is cheap, a very poor and expensive investment after all. Practically all kerosene heated brooders are over-rated about 50 per cent. A hover that is 42 inches in diameter will brood 500 chicks and other sizes proportionately.

First Feeding

In years gone by we recommended not to feed chicks until they are 72 hours old. Recent experiences and experiments have proven this to be absolutely wrong. We are convinced this starvation process of chicks after being hatched was all wrong and did some harm. We recommend feeding the chicks just as soon as they are strong enough to move to the brooder. They may rarely be fed when 24 to 48 hours old. We feed our chicks when 38 to 48 hours old, and have had wonderful success in raising them. We recommend the feeding of a good commercial baby chick starter—feeding it dry just as it comes out of the sack—and keeping it before the chicks all the time. Provide plenty of feed dishes so they do not have to crowd at feeding time. Don't forget to give the chicks plenty of milk to drink—any kind of milk—right from the start. The more milk you give the chicks the better.

In Every Town In Texas

There is a Man Who Can Increase His Income by Becoming a Representative of The Great National Life—

Sell the New FAMILY POLICY

The Great National's Family Policy has been the talk of the insurance world in Texas ever since its introduction a few months ago. Insurance men realize its quick-selling power the minute they learn about it. Heads of families buy it on sight, and it often leads to larger business.

Never before has there been offered, for just a few dollars a year, a policy that pays death claims upon any (or all) members of the family. No examinations are required.

We will tell you all about the Family Policy when you mail the coupon.

We want a man of good standing to represent the Great National in his own community.

A man who can sell, not through "smartness" but through his ability to build confidence.

A man who will work shoulder to shoulder with the executives of this company in making the name "Great National" respected wherever it is heard.

The Great National has an almost unprecedented record of growth and progress during the last two years, but we are only beginning.

Men who become our agents now will not only make good immediate incomes, but will lay the foundation for steadily increasing future earnings.

To such men The Great National Life will give a contract that should be worth from \$1800 to \$6000 the first year, depending on the time a man devotes to it.

To look into this you need only mail the coupon. We will write you fully. Do it today!

WHAT A DIFFERENCE 90 DAYS MAKE!

TODAY a toddling chick...in 90 days a proud pullet about to lay. There's something to think about! Tiny bones and little muscles have grown several times in size...a delicate fuzz has sprouted into hundreds of feathers...a chick weighing grams has grown into a pullet weighing pounds...all in 90 short days!

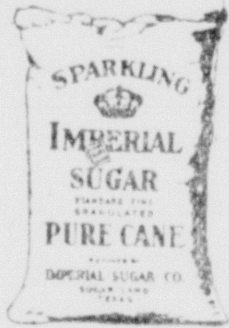

A wonderful change...and only one thing can do it...good feed! Pullets are made of feed. What they are...what they do for you...depends on what you feed from the time they're a few hours old. This year consider either Purina Startena Chow (mash) and Purina Chick Chow (scratch)...or Purina Startena Chow (all mash) for the first six weeks...and then Purina Growena Chow (mash) and Purina Intermediate Hen Chow (scratch) until your pullets are laying at 16 weeks.

Put these Chows before your chicks. In Startena Chow and in Growena Chow are all the needed ingredients mixed in just the right proportion to tell you a wonderful story in 90 days! You will see pullets that are built right...pullets that will lay eggs aplenty in fall and winter when eggs are always worth good money. Let Purina Poultry Chows build your pullets...they'll build up the dollars and cents in your bank account every time!

A LITTLE FUN Jokes to Make You Laugh

Questionable Compliment

Maggie—"Tom called me his darling little Easter egg last night. What do you suppose he meant by that?"
Susie—"Well, maybe he said that because you were all painted up and have a habit of getting hard-boiled."

Then He Explained

Fair Motorist (driving into garage) "Something is the matter with this car."
Mechanic (listening to the motor)—"Your engine is missing."
Fair Motorist—"Why, that's funny. It certainly was in there when I started out."

A Twister

A city visitor, from one of the wind swept States, gazed intently at the spiral fire escape that wound its way down the rear of a thirty-story building.
"Gosh!" he exclaimed. "That must have been a danged long ladder before the cyclone hit it."

An Age of Miracles

An exchange says a wagon maker who had been dumb for years picked up a hub and spoke. Yes, and a blind carpenter on the same day reached out for a plane and saw; a deaf sheep ranchman went out with his dog and herd, a noseless fisherman caught a barrel of her-ring and smelt; a forty-ton elephant inserted his trunk into grate and flue.

No Free Calls

The telephone operator had been dozing in church and woke up just as the minister exhorted loudly:
"Call on Heaven when you are in trouble, brethren, call on Heaven."

"Drop your nickel, please," sweetly advised the young lady who was not fully aroused.

A Matter of Pedigree

A Scotchman and an Irishman were arguing as to the merits of their families. The Scotchman had the floor first.
"I tell ye laddie, I'm sprung from the best stock in the world—from the stock of the kings of Scotland. I've got royal blood in my veins. An' what stock are you sprung from?"

"I come from the Caseys," said the Irishman simply. "They never sprung from nobody—they sprung at 'em!"

All in the Family

An artist who occupied a studio on the top floor of a large building was disposed to be pleasant to the janitress.
"How many children have you, Mrs. O'Flaherty," he asked her one morning as she was polishing the doorknob.

"It's seven I have, sir," she replied, "an' lucky I am. Bless 'em. Four by the third wife of me second husband, three by the second wife of me first."

Diary of a Girl Sailing to France

Monday—Awfully slow. Walked around deck. Wish I was over there.

Tuesday—Ditto.

Wednesday—Saw a good-looking officer on board.

Thursday—Am beginning to enjoy the water. Met officer at dance.

Friday—Walked all afternoon with officer. What a shame the trip will soon be over.

Saturday—Officer kissed me and I slapped him. Told me that if I did not act nice to him he'd blow up the ship and kill 250 people.

Sunday—Saved the ship and 250 people!

Borrowed the \$3,000

He had gone into the library to put the thing up to her father and she was anxiously waiting on the front porch.

"Well," said the prospective groom when he returned. "He asked me how I was fixed and I told him I had \$3,000 in the bank."

"And what did he say to that?"
"He borrowed it."

Of Course Not

A League for the Protection of Hen-pecked Husbands was once formed in a small Kansas town, and at the first meeting a chap named George Jones was elected president. George had just taken the chair and whacked the table for order with his gavel, when a tall, gaunt, rawboned woman burst into the hall, rushed at George, and seized him by the collar.

"You come home!" she shouted, shaking him. "What business have you got in a league of this kind? You ain't henpecked!"

Dentist—"So you've broken off a tooth, have you?"

Tough Youngster—"Yes, sir."

Dentist—"How did you do it?"

Tough Youngster—"Shifting gears on a lollipop."

Wish It Could Be Done

A group of traveling men were swapping lies about their radios in a Smith Center drug store. An old man had been listening silently.

"Got a radio, old man?" asked one of the drummers.

"Yeah," replied the old fellow. "I got a little two-tube affair. It's a pretty good one, though."

"Can you tune out these little stations with it?"

"Well, I was listening to a quartet the other night, and I didn't like the tenor, so I just tuned him out and listened to the three of 'em."

Johnny Was Observant

Small Johnny from the city was visiting his uncle on the farm for the first time and was very much interested in the procedure of milking.

"Now you know how uncle gets the milk, don't you?" his aunt asked.

"Sure," replied Johnny. "He gives the cow some breakfast food, then a drink of water and then drains her crank-case."

City Girl—What darling, fluffy chicks. Are they weaned yet?

Farmer Boy—Weaned? Naw, you don't hafta wean incubator chicks. They is born weaned.

The Red-Head and the Janitor

A red-headed boy once applied for a position in a messenger office. The manager after hiring him sent him on an errand in one of the most fashionable districts. Half an hour later the manager was called to the phone and the following conversation took place:

"Have you a red-headed boy working for you?"

"Yes."

"Well, this is the janitor at the Oakland apartments, where your boy came to deliver a message. He insisted on coming in the front way and was so persistent that I was forced to draw a gun."

"Good heavens! You didn't shoot him, did you?"

"No, but I want my gun back," said the janitor.

POULTRY FACTS

By F. W. KAZMEIER
Poultry Breeder, Bryan, Texas.

Brooding and Care of Baby Chicks

At this season of the year, one of many poultry problems is raising the baby chicks. It may seem like a great economical waste to tell you, that less than 50 per cent of the chicks hatched in Texas each year are raised. Millions are killed each year by improper care and feeding. This great waste can and should be prevented. A study of a few facts and principles, will help prevent this great mortality.

Chicks that are properly hatched can only be killed by improper brooding and wrong feeding. Strong chicks are not easily killed, and it is a pleasure to raise them. Many thousands of baby chicks come from weak parent stock, and are improperly hatched. Such chicks are handicapped from the very start.

Community hatcheries or custom hatching plants are rapidly being placed in all communities. Such plants when operated by experts may be depended upon to produce strong, vigorous and healthy chicks. Our story, however, has more to do with the chicks after it is hatched.

Crowding

One thing that nearly every human will want to do, is to overcrowd the chicks in the house or under the hover. Crowding will positively cause a great mortality and many stunted chicks. Give them plenty of room and they will do much better. A house 12x12 feet square will take care of 250 chicks 10 to 12 weeks old, when the cockerels may be culled out and sold as broilers. We can not devote much space at this time to the description of a good

brooder house; let it be sufficient to remember these facts, a good floor is necessary to prevent dampness, disease and trouble from vermin. A wood or concrete floor is preferred. There must be no floor drafts in the house. It must provide fresh air without subjecting the chicks to direct drafts. We will be glad to furnish free of charge blue prints showing the construction of a good brooder house.

A house 14x14 will accommodate 350 chicks up to 12 weeks old. Many more than this should not be brooded together at one time.

The brooder or hover should be a good one. A cheap brooder is like everything else that is cheap, a very poor and expensive investment after all. Practically all kerosene heated brooders are over-rated about 50 per cent. A hover that is 42 inches in diameter will brood 500 chicks and other sizes proportionately.

First Feeding

In years gone by we recommended not to feed chicks until they are 72 hours old. Recent experiences and experiments have proven this to be absolutely wrong. We are convinced this starvation process of chicks after being hatched was all wrong and did some harm. We recommend feeding the chicks just as soon as they are strong enough to move to the brooder. They may rarely be fed when 24 to 48 hours old. We feed our chicks when 36 to 48 hours old, and have had wonderful success in raising them. We recommend the feeding of a good commercial baby chick starter—feeding it dry just as it comes out of the sack—and keeping it before the chicks all the time. Provide plenty of feed dishes so they do not have to crowd at feeding time. Don't forget to give the chicks plenty of milk to drink—any kind of milk—right from the start. The more milk you give the chicks the better.

TEXAS FARM NEWS

An authority on birds and insects says the Golden Winged Flicker, which is common to many sections of the State, is very efficient in the destruction of insects, and therefore very helpful on the farm and around homes where shrubbery and gardens are grown. This bird, it is claimed, spends most of its time on the ground in search of ants, which form the main portion of its food. The Golden Winged Flicker can be distinguished readily from other birds by its size, as it is one of the largest woodpeckers in the State. It has a yellow mottled breast and the balance of its coloring is a grayish brown. The bird will readily occupy any house that may be prepared for it.

According to statistics recently released by the Federal government, Texas has added some 30,000 cows and heifers to its total within the last year, as a result of dairy promotion in the State. The milk cow population of the State on January 1, 1930, was estimated at 974,000, compared with 955,000 head on January 1, 1929. The number of heifers to be kept for milk is 210,000, compared with 200,000 on the same date last year. There was a 6 per cent increase in the number of dairy cows in the United States during the last year, which is a considerable increase for one year for the country as a whole. Since last April the consumption of butter has decreased greatly, and on September 1 there was the largest butter stock on hand ever known. By the close of the year the stock on hand had been greatly reduced, but it was still considerably larger than at

the beginning of the previous year. The government has warned farmers that dairying can be overstimulated easily. Only an annual increase of 1 per cent in the number of milk cows in the United States is necessary to keep dairy products in line with consumptive demand. Texas farmers are advised to cull their herds carefully and remove the poor producers, which keeps the profits down, and try to increase the quality of butterfat.

Experiments conducted with fertilizers on the Ruston and Nacogdoches fine sandy loams at Nacogdoches and on the Kirvin fine sandy loam at Troup, in Smith county, indicate that these soils are deficient in nitrogen and phosphoric acid for the production of cotton. Of the ten analysis of fertilizer used at Nacogdoches, the analysis of 4-12-4, 6-12-4, and 8-12-4, applied at the rate of 400 pounds per acre, made the largest and most profitable yields of cotton, each analysis making an average profit of approximately \$10 per acre during the three years, 1927, 1928 and 1929. At Troup the analysis of 4-8-4 and 4-12-4 produced the largest average yield of cotton, although the 4-5-4 fertilizer returned the largest profit, \$6.70 per acre. In the application of the 4-12-4 fertilizer the use of 200 pounds per acre increased the yield of cotton 71 pounds of lint per acre, as compared with increases of 92, 104 and 96 per acre produced by the rates of 400, 600 and 800 pounds respectively. The use of 200 pounds made a profit of \$9.65 per acre above the cost of the fertilizer, while 400 pounds gave a profit of \$10.15 per

acre. The application of 200 pounds per acre made an average of \$3.75 for each dollar invested over a period of three years, as compared with \$2.47 and \$1.85 for the application of 400 pounds and 600 pounds respectively.

H. C. Myrick, of McKinney, who is engaged in the grocery business in town, has been growing onions in a small way for a number of years. He kept a record of each year's sales and finds that for a period of several years his onions averaged him 75 cents per bushel. One year during the period he sold for only 25 cents per bushel, while others years he received as high as \$1.25 per bushel. He says a farmer can make some money on onions at 75 cents per bushel in Collin county, and is of the opinion that a small onion acreage, that a farmer can handle himself, will pay about as well as any crop he can plant, take it one year with another.

In Europe many families earn their living from very small parcels of land. In sections families live upon two or three acres, and occasionally one acre provides a living for a family. In Texas large farms are the rule, but already a change is being worked, and the day of the small farm seems near. D. S. Stephens, who lives near San Benito, Texas, claims to make a living off of fewer acres than any man in Texas, or at least in his section of Texas. Mr. Stephens fertilizes liberally, diversifies and keeps a close check on his farm activities, expenditures and receipts. He earns a good living for his family on six acres of land.

The world's champion laying hen is a Canadian, "Lady Victorene," a Barred Plymouth Rock pullet owned by the University of Saskatchewan. This wonderful laying hen laid 358 eggs in one year, beating Mazie, the former champion, by seven eggs. The White Leghorn owned by the University of British Columbia won the previous international record by laying 351 days in 365 days.

A balanced commercial fertilizer of 4-8-4 analysis, applied at the rate of one pound for each year of the tree's age, up to six years, gives good results on peach trees, according to C. O. Rawlings, horticulturist for the Cotton Belt railway. Clean cultivation, with a green cover crop of rye and a summer crop of peas is recommended. Mr. Rawlings says trees already partly killed by San Jose scale, and badly infected ones, should be uprooted and carried out of the orchard. By properly spraying with oil emulsion, the scale can be kept under control if treatment is started before heavy infestation.

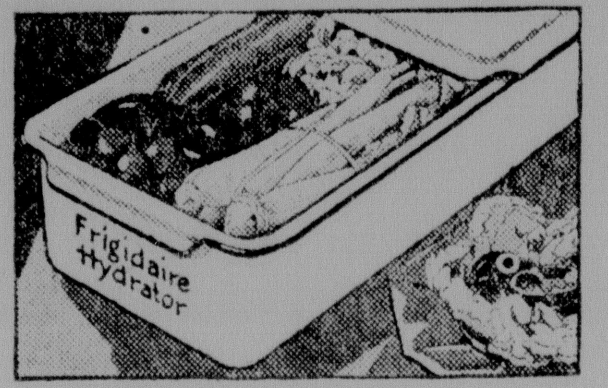

The president of the American Mohair Producers Co-operative Marketing Association has announced that the organization has been completed and is ready in relief matters in accordance with the plans of the Federation Farm Board. A credit of \$1,000,000 in the form of pre-sharing advances of 50 cents per head on sheep and goats which have a six-months growth of wool and mohair, and one dollar per head for animals through the National Credit Corporation, a government agency, for distribution among members. This, it is hoped, will eventually do much toward stabilizing wool and mohair prices.

When cut worms are troublesome in the garden in early spring there is likely to be a renewal of activity by the next generation later in the summer. A poisoned bait is an effective control when scattered about the infested area. It may be made, says an agricultural journal, by mixing an ounce of Paris Green or white arsenic with one and a quarter pounds of dry bran. To this is added a liquid composed of four fluid ounces of molasses or syrup and a half pint of water.

Don't forget your milk cows need much water. As milk is about 87 per cent water, good dairy cows require a great deal more to drink than cattle not producing milk. Range cattle and dry stock in summer and winter can get along on one drink daily, but this is not enough for dairy cows. The cow consumes a large amount of food that is mostly roughage, so must have water in order for the food to be properly assimilated and digested.

J. W. Watson, of Randall county, has established a splendid record with his dairy herd. He has a herd of 10 cows and young heifers which averaged a production of 286.8 pounds of butterfat over a period of eight months. The feed cost to produce the butterfat was 14.6 cents per pound for the entire herd. Mr. Watson kept a detailed record on the production of his cows and found that the five highest producers netted him a total profit of \$962.67 in eight months. The highest producing cow in the herd produced 370.4 pounds of butterfat in the same length of time. The cost on this cow was 11.2 cents per pound of butterfat. Principal feeds were ground heagra bundles and ground oats, supplemented with 34 per cent protein commercial dairy feed, fed at the rate of one pound to every 12 pounds of butterfat produced. For roughage the cows fed on sudan and other pasture.

Here's a new way to keep your vegetables fresh and full-flavored

Now Frigidaire is equipped with a special compartment for freshening vegetables—the Hydrator. Celery comes out of the Hydrator crisp and brittle. Lettuce takes on a dew-drenched freshness. Tomatoes become firmer. Parsley, cress and other garnishes seem almost to grow again! Let us demonstrate the Hydrator, the "Cold Control" and the many other Frigidaire features that save time, work and trouble. Call at our display room.

Yielding 642.81 pounds of butterfat and 13,803 pounds of milk in an official production test of 305 days, Jolly's 649 pounds of milk.

Benedictine May, a purebred Jersey cow, owned by N. A. Cropp, of Brownwood, Texas, recently won both a gold and silver medal award from the American Jersey Cattle Club and the State age class championship for Junior 4-year-old Jersey cows. For eight months of this test Jolly's Benedictine May produced more than 60 pounds of butterfat per month, and during her best month yielded 68.12 pounds of butterfat. In winning the State-age class championship Jolly's Benedictine May fully superseded Mon Plaisir's May. His latest purchase was Melrose, tested by Ed C. Lasater, owner of the world's largest purebred Jersey herd at Falfurrias, Texas. This for-

mer champion held the honor with a record of 576.52 pounds of butterfat and 10,000 pounds of milk. Mr. Ray Lum, of Vicksburg, Miss., one of the leading stockmen of his State, has been enthusiastic over Texas white-faced cattle. With a love and the State age class championship for Junior 4-year-old Jersey cows. For eight months of this test Jolly's Benedictine May produced more than 60 pounds of butterfat per month, and during her best month yielded 68.12 pounds of butterfat. TEXAS FARM NEWS

An authority on birds and insects says the Golden Winged Flicker, which is common to many sections of the State, is very efficient in the destruction of insects, and therefore very helpful on the farm and around homes where shrubbery and gardens are grown. This bird, it is claimed, spends most of its time on the ground in search of ants, which form the main portion of its food. The Golden Winged Flicker can be distinguished readily from other birds by its size, as it is one of the largest woodpeckers in the State. It has a yellow mottled breast and the balance of its coloring is a grayish brown. The bird will readily occupy any house that may be prepared for it.

According to statistics recently released by the Federal government, Texas has added some 30,000 cows and heifers to its total within the last year, as a result of dairy promotion in the State. The milk cow population of the State on January 1, 1930, was estimated at 974,000, compared with 955,000 head on January 1, 1929. The number of heifers to be kept for milk is 210,000, compared with 200,000 on the same date last year. There was a 6 per cent increase in the number of dairy cows in the United States during the last year, which is a considerable increase for one year for the country as a whole. Since last April the consumption of butter has decreased greatly, and on September 1 there was the largest butter stock on hand ever known. By the close of the year the stock on hand had been greatly reduced, but it was still considerably larger than at

the beginning of the previous year. The government has warned farmers that dairying can be overstimulated easily. Only an annual increase of 1 per cent in the number of milk cows in the United States is necessary to keep dairy products in line with consumptive demand. Texas farmers are advised to cull their herds carefully and remove the poor producers, which keeps the profits down, and try to increase the quality of butterfat.

Experiments conducted with fertilizers on the Ruston and Nacogdoches fine sandy loams at Nacogdoches and on the Kirvin fine sandy loam at Troup, in Smith county, indicate that these soils are deficient in nitrogen and phosphoric acid for the production of cotton. Of the ten analysis of fertilizer used at Nacogdoches, the analysis of 4-12-4, 6-12-4, and 8-12-4, applied at the rate of 400 pounds per acre, made the largest and most profitable yields of cotton, each analysis making an average profit of approximately \$10 per acre during the three years, 1927, 1928 and 1929. At Troup the analysis of 4-8-4 and 4-12-4 produced the largest average yield of cotton, although the 4-5-4 fertilizer returned the largest profit, \$6.70 per acre. In the application of the 4-12-4 fertilizer the use of 200 pounds per acre increased the yield of cotton 71 pounds of lint per acre, as compared with increases of 92, 104 and 96 per acre produced by the rates of 400, 600 and 800 pounds respectively. The use of 200 pounds made a profit of \$9.65 per acre above the cost of the fertilizer, while 400 pounds gave a profit of \$10.15 per

acre. The application of 200 pounds per acre made an average of \$3.75 for each dollar invested over a period of three years, as compared with \$2.47 and \$1.86 for the application of 400 pounds and 600 pounds respectively.

H. C. Myrick, of McKinney, who is engaged in the grocery business in town, has been growing onions, in a small way for a number of years. He kept a record of each year's sales and finds that for a period of several years his onions averaged him 75 cents per bushel. One year during the period he sold for only 25 cents per bushel, while others years he received as high as \$1.25 per bushel. He says a farmer can make some money on onions at 75 cents per bushel in Collin county, and is of the opinion that a small onion acreage, that a farmer can handle himself, will pay about as well as any crop he can plant, take it one year with another.

In Europe many families earn their living from very small parcels of land. In sections families live upon two or three acres, and occasionally one acre provides a living for a family. In Texas large farms are the rule, but already a change is being worked, and the day of the small farm seems near. D. S. Stephens, who lives near San Benito, Texas, claims to make a living off of fewer acres than any man in Texas, or at least in his section of Texas. Mr. Stephens fertilizes liberally, diversifies and keeps a close check on his farm activities, expenditures and receipts. He earns a good living for his family on six acres of land.

The world's champion laying hen is a Canadian, "Lady Victorene," a Barred Plymouth Rock pullet owned by the University of Saskatchewan. This wonderful laying hen laid 358 eggs in one year, beating Mazie, the former champion, by seven eggs. The White Leghorn owned by the University of British Columbia won the previous international record by laying 351 days in 365 days.

A balanced commercial fertilizer of 4-8-4 analysis, applied at the rate of one pound for each year of the tree's age, up to six years, gives good results on peach trees, according to C. O. Rawlings, horticulturist for the Cotton Belt railway. Clean cultivation, with a green cover crop of rye and a summer crop of peas is recommended. Mr. Rawlings says trees already partly killed by San Jose scale, and badly infected ones, should be uprooted and carried out of the orchard. By properly spraying with oil emulsion, the scale can be kept under control if treatment is started before heavy infestation.

The president of the American Mohair Producers Co-operative Marketing Association has announced that the organization has been completed and is ready in relief matters in accordance with the plans of the Federation Farm Board. A credit of \$1,000,000 in the form of pre-sharing advances of 50 cents per head on sheep and goats which have a six-months growth of wool and mohair, and one dollar per head for animals through the National Credit Corporation, a government agency, for distribution among members. This, it is hoped, will eventually do much toward stabilizing wool and mohair prices.

When cut worms are troublesome in the garden in early spring there is likely to be a renewal of activity by the next generation later in the summer. A poisoned bait is an effective control when scattered about the infested area. It may be made, says an agricultural journal, by mixing an ounce of Paris Green or white arsenic with one and a quarter pounds of dry bran. To this is added a liquid composed of four fluid ounces of molasses or syrup and a half pint of water.

Don't forget your milk cows need much water. As milk is about 87 per cent water, good dairy cows require a great deal more to drink than cattle not producing milk. Range cattle and dry stock in summer and winter can get along on one drink daily, but this is not enough for dairy cows. The cow consumes a large amount of food that is mostly roughage, so must have water in order for the food to be properly assimilated and digested.

J. W. Watson, of Randall county, has established a splendid record with his dairy herd. He has a herd of 10 cows and young heifers which averaged a production of 286.8 pounds of butterfat over a period of eight months. The feed cost to produce the butterfat was 14.6 cents per pound for the entire herd. Mr. Watson kept a detailed record on the production of his cows and found that the five highest producers netted him a total profit of \$962.67 in eight months. The highest producing cow in the herd produced 370.4 pounds of butterfat in the same length of time. The cost on this cow was 11.2 cents per pound of butterfat. Principal feeds were ground hegira bundles and ground oats, supplemented with 34 per cent protein commercial dairy feed, fed at the rate of one pound to every 12 pounds of butterfat produced. For roughage the cows fed on sudan and other pasture.

Here's a new way to keep your vegetables fresh and full-flavored

Now Frigidaire is equipped with a special compartment for freshening vegetables—the Hydrator. Celery comes out of the Hydrator crisp and brittle. Lettuce takes on a dew-drenched freshness. Tomatoes become firmer. Parsley, cress and other garnishes seem almost to grow again!

Let us demonstrate the Hydrator, the "Cold Control" and the many other Frigidaire features that save time, work and trouble. Call at our display room.

Yielding 642.81 pounds of butterfat and 13,803 pounds of milk in an official production test of 305 days, Jolly's Benedictine May, a purebred Jersey cow, owned by N. A. Cropp, of Brownwood, Texas, recently won both a gold and silver medal award from the American Jersey Cattle Club and the State age class championship for Junior 4-year-old Jersey cows. For eight months of this test Jolly's Benedictine May produced more than 60 pounds of butterfat per month, and during her best month yielded 68.12 pounds of butterfat. In winning the State-age class championship she superseded Mon Plaisir's May Melrose, tested by Ed C. Lassiter, owner of the world's largest purebred Jersey herd at Falfurrias, Texas. This former champion held the honor with a record of 576.55 pounds of butterfat and 10,649 pounds of milk.

Mr. Ray Lum, of Vicksburg, Miss., one of the leading stockmen of his State, has become enthusiastic over Texas white-faced cattle. With a love of fine stock that is characteristic of a real Southerner, he has started a crusade to raise the standard of beef production in Mississippi. To this end he has been making frequent visits to the leading registered herds of Texas. On each trip he has been buying a carload or more of carefully selected Hereford cattle. His latest purchase was from the Gill Ranch, Whon, Texas, where he selected a carload of registered double-standard Polled Herefords.

For BOYS and GIRLS

By AUNT MARY

CLEVER STUNT NO. 20

Here you have the longest sentence in this world.

Go to prison for life.

watch them tremble, dance and turn summer-saults in the wind, and I believe they really wink at me. I know they radio messages to me, I caught one this morning, by my sixth sense, and it was one of hope and cheer, with promise of warm, sunny days soon to come. On my south window I have a box of pansies in bloom, on my east window shelf I have a box of petunias, just up. My pansies are the most beautiful I ever saw, and the largest. * * *

How Aunt Susan's letters cheer me and make me resolve to try and do more and more to bring sunshine and happiness into the lives of the unfortunate.

Aunt Susan has sent us another of her wonderfully inspiring poems. I am printing it and hope you all will put it in your scrap book:

SKETCHED RHYMES

Rhymes sketched in moments of idleness, And to kill unemployed time— Time the devil makes use of To find employment for you and me.

My folks, how much joy and laughter We make connection with on Life's Highway! How quickly we forget the clouds and Rain on a bright and sunny day.

Folks—joy and laughter are the Golden badges God loans us for life. They are the best antidotes for strife, Unkindness—and for anger and frown.

When God made the first sweet violet, Its beauty and fragrance pleased Him so; He scattered them all over the earth. That's why we find violets wherever we go.

How pleasant and repellent our faces Look when we are wearing a frown, And our lips disfigured with the Corners of our "mouth turned down."

Folks, at the end of my sketches, This is the advice I feel bound To give—DON'T face the world with "The corners of your mouth turned down."

Aunt Susan also sends in the name of a Shut-In that lives in the same home as Aunt Susan. This member is blind and Aunt Susan will do her writing for her.

SUNSHINE CLUB NEWS

There has been another busy month. There were several new members; new Shut-Ins and letters of interest. I am going to try and print a few of these letters here. I hope all of our members have been busy and have also taken care of their club duties. Don't forget the Shut-In friends that are depending on you for sunshine and happiness. Think how unhappy they will be not to get one single remembrance from a club member. Don't neglect YOUR duty. Don't think, "well I'll do it next day or next month." Do it the very day your home newspaper reaches you; you will find your letter before the name of a Shut-In. Remember the happiness that came to you one time when someone did you a kind and good deed. Were you not very, very happy? Then you must remember that our Shut-Ins will be just as happy. So send them sunshine every time you can.

Here is a letter from a mother of a very young child. I am sure all of you will want to help to brighten this mother's life:

"My little daughter * * * has never talked so you see she is a Shut-In for she can't go to school or have the pleasures of a normal child. I do all I can to brighten her life. I am sending her name to you. A pretty card or a tiny doll or a present from anyone would be appreciated. She has a very good understanding. * * * She has beautiful curly hair, a golden color. * * *

Ruby Williams sends me the information that I have gotten her address, and that of Mrs. Woodward, mixed up. So I have, Ruby dear, for which I am very sorry. I am quite happy to hear you haven't missed a day of school this year.

Lucille Whitley, Forum, Okla., sends the following that I think is very interesting and clever: "I have been silent for some time. I've been going to school. I am twelve years old and in the seventh grade. I like school fine. * * * I am enclosing a little story that tells why the guinea says 'peetrack, peetrack.' "A long time ago an old woman lived by herself. Guinea could talk at that time. This old woman had one for a pet. One day two strangers came by and wanted money. She said the pet guinea was all she had. They said they wanted that. She gave the guinea a sack of peas and told it to drop the peas everywhere they took it. One day the guinea got loose from the strangers and came back by following the trail of peas. When it got to the old woman, she said, 'How did you get back?' The guinea answered, 'peetrack, peetrack,' and this was all it could say as it had forgotten other speech. So to this day that is all the guinea can say." I think Lucille's story is very clever, and I am sure all farm boys and girls can understand it. Somehow, though, it seems to me the guinea says, "look-right, look-right."

Florida Goforth, Perkins, Okla., sends her greetings to the members and Shut-Ins. Also sends in more names for the club. Thanks for the letter, Florida.

Mrs. N. H. Jones, Ford City, Texas, sent us a letter that got here too late to be published last month. She is one of our Shut-Ins. She says she enjoys our little club and the sunshine it has brought her. Her husband passed on to the great promised land about two years ago. Her name was sent in by Mae Randolph, whom she praises very highly. Mae lives across the road from Mrs. Jones. Mrs. Jones says she has received so many sweet letters and would like to answer all of them, but it is very hard for her to write. Mae would please write for her. Let me know if you will, please.

Then, of course, our page hardly would be complete without a word from our darling Aunt Susan. All of you, as well as myself, I am sure, love her very deeply through her wonderful letters so full of sunshine and happiness. Here is her letter this month: "I should like to write you every month, but I'm 'afraid' I would be only a nuisance. Catherine Weathers gave a good thought to me in regard to sending books which, I think, is splendid. Sending a book to a Shut-In would give them a pleasure we could give in no other manner. Magazines are good, too, but they go to only one, while books could go to each one, thus giving all a share of pleasure. Folks, let's give thought to Catherine's suggestion and give books more attention. Treasure Island is flooded with sunshine this morning; first we have had in six days. There is a cottonwood tree near my south window, the leaves are nearly half grown; I love to

For BOYS and GIRLS

By AUNT MARY

CLEVER STUNT NO. 20

Here you have the longest sentence in this world.

Go to prison for life.

watch them tremble, dance and turn summer-saults in the wind, and I believe they really wink at me. I know they radio messages to me, I caught one this morning, by my sixth sense, and it was one of hope and cheer, with promise of warm, sunny days soon to come. On my south window I have a box of pansies in bloom, on my east window shelf I have a box of petunias, just up. My pansies are the most beautiful I ever saw, and the largest. * * *

How Aunt Susan's letters cheer me and make me resolve to try and do more and more to bring sunshine and happiness into the lives of the unfortunate.

Aunt Susan has sent us another of her wonderfully inspiring poems. I am printing it and hope you all will put it in your scrap book:

SKETCHED RHYMES

Rhymes sketched in moments of idleness, And to kill unemployed time— Time the devil makes use of To find employment for you and me.

"April showers bring May flowers" is an old, old saying. How we all welcome the lovely little flowers after the long dreary winter months. How their smiling faces greet us cheerily! How very welcome they are!

God sends his rain that falls upon the brown, soft earth and the pitter-patter whispers to tiny seeds so snugly covered and protected by the earth's warm blanket. Come, little seeds, it is time to wake up! WAKE UP! WAKE UP! The sun is shining! So the little seeds hear the call of the rain; their little hearts begin to swell with pride. "God is calling me, calling me; I must do my work," they say. Then the sun shines and warms the brown earth, and the tiny shoots from the seed's heart pushes its way upward, crying, "Here I am! Here I am!" Bravely its face is lifted to the blue sky and it grows and grows until there is ripened grain in the field. Other tiny seeds make beautiful flowers; others mighty trees and all the growing things upon earth that must come from seeds.

Think, my dear boys and girls, the beautiful lesson of the tiny seed—we are all tiny seeds, to begin with, and each day we should lift our faces to the sky and grow and grow in goodness and in knowledge; then like the tiny seeds some of us will become ripened grain in the field that feeds the world. What a wonderful lesson of development and usefulness are the tiny seeds. Though, like the seed, we will go back to earth yet, in the heart, is the spark of eternal life that goes on and on forever.

SUNSHINE CLUB NEWS

This has been another busy month. There were several new members; new Shut-Ins and letters of interest. I am going to try and print a few of these letters here. I hope all our members have been busy and have also taken care of their club duties. Don't forget the Shut-In friends that are depending on you for sunshine and happiness. Think how unhappy they will be not to get one single remembrance from a club member. Don't neglect YOUR duty. Don't think, "well I'll do it next day or next month." Do it the very day your home newspaper reaches you; you will find your letter before the name of a Shut-In. Remember the happiness that came to you one time when someone did you a kind and good deed. Were you not very, very happy? Then you must remember that our Shut-Ins will be just as happy. So send them sunshine every time you can.

Here is a letter from a mother of a very young child. I am sure all of you will want to help to brighten this mother's life:

"My little daughter * * * has never talked so you see she is a Shut-In for she can't go to school or have the pleasures of a normal child. I do all I can to brighten her life. I am sending her name to you. A pretty card or a tiny doll or a present from anyone would be appreciated. She has a very good understanding. * * * She has beautiful curly hair, a golden color. * * *

Ruby Williams sends me the information that I have gotten her address, and that of Mrs. Woodward, mixed up. So I have, Ruby dear, for which I am very sorry. I am quite happy to hear you haven't missed a day of school this year.

Lucille Whitley, Forum, Okla., sends the following that I think is very interesting and clever: "I have been silent for some time. I've been to school. I am twelve years old and in the seventh grade. I like school fine. * * * I am enclosing a little story that tells why the guinea says 'peetrack, peetrack.' "A long time ago an old woman lived by herself. Guinea could talk at that time. This old woman had one for a pet. One day two strangers came by and wanted money. She said the pet guinea was all she had. They said they wanted that. She gave the guinea a sack of peas and told it to drop the peas everywhere they took it. One day the guinea got loose from the strangers and came back by following the trail of peas. When it got to the old woman, she said, "How did you get back?" The guinea answered, "Peetrack, peetrack," and this was all it could say as it had forgotten other speech. So to this day that is all the guinea can say." I think Lucille's story is very clever, and I am sure all farm boys and girls can understand it. Somehow, though, it seems to me the guinea says, "look-right, look-right."

Florida Goforth, Perkins, Okla., sends her greetings to the members and Shut-Ins. Also sends in more names for the club. Thanks for the letter, Florida.

Mrs. N. H. Jones, Foard City, Texas, sent us a letter that got here too late to be published last month. She is one of our Shut-Ins. She says she enjoys our little club and the sunshine it has brought her. Her husband passed on to the great promised land about two years ago. Her name was sent in by Mae Randolph, whom she praises very highly. Mae lives across the road from Mrs. Jones. Mrs. Jones says she has received so many sweet letters and would like to answer all of them, but it is very hard for her to write. Mae, would you please write for her. Let me know if you will, please.

Then, of course, our page hardly would be complete without a word from our darling Aunt Susan. All of you, as well as myself, I am sure, love her very deeply through her wonderful letters so full of sunshine and happiness. Here is her letter this month: "I should like to write you every month, but I'm 'afraid' I would be only a nuisance. Catherine Weathers gave a good thought to me in regard to sending books which, I think, is splendid. Sending a book to a Shut-In would give them a pleasure we could give in no other manner. Magazines are good, too, but they go to only one, while books could go to each one, thus giving all a share of pleasure. Folks, let's give thought to Catherine's suggestion and give books more attention. Treasure Island is flooded with sunshine this morning; first we have had in six days. There is a cottonwood tree near my south window, the leaves are nearly half grown; I love to

WANT ADVERTISEMENTS

READ THEM --- You May Find What You Want

CLAIMS AND RANCHES

Ask your Druggist for LABLACHE in your favorite shade. 50 cents or \$1.

BEN LEVY CO. BOSTON

Sablacke

Pronounced LABLASH

The Face Powder of Quality

You'll Get Rid of
Blackheads Sure

There is one simple, safe and sure way that never fails to get rid of blackheads: that is to dissolve them.

To do this get two ounces of calomine powder from any drug store—sprinkle a little on a hot, wet cloth—rub over the blackheads briskly—wash the parts and you will be surprised how the blackheads have disappeared. Big blackheads, little blackheads, no matter where they are, simply dissolve and disappear. Blackheads are a mixture of dirt and dirt and secretions that form in the pores of the skin. The calomine powder and the water dissolve the blackheads as they wash right out, leaving the pores free and clean and in their natural condition—Ad.

Perfect dyeing is so easy!

DIAMOND DYES contain the highest quality anilines that money can buy. That's why they give such clear, bright, new-looking colors to dresses, drapes, lingerie.

It's so easy to use Diamond Dyes because they are so rich in pure anilines. That's why they go on smoothly, and evenly; never spot or streak. That's the reason they keep their depth and brilliance through wear and washing.

Diamond Dyes are just 15c at all drug stores. When perfect dyeing costs no more—is so easy to do—why experiment with makeshift methods?

Diamond Dyes
Highest Quality Anilines

Keep "Undies"
New and Fresh

with remarkable New Tints

TAKE only 40 seconds to dissolve New INSTANT RIT in your wash bowl and see latest Parisian shades for your underthings appear as if by magic.

These new tints last through many extra washings. An exclusive German formula makes colors penetrate to every fiber of the material. Mere "surface tinting" can't compare.

All colors are absorbed quickly, evenly. They are clearer, richer... exactly like new.

25 lovely shades for:

- Lingerie Curtains
- Hosiery Children's clothes
- Dresses Scarfs, gloves, etc.

At your druggist or department store. 15c per package.

WHITE RIT—Removes Color

(Harmless as Boiling Water)
Any color, even black, is taken out of all materials completely by WHITE RIT (color remover). Also remarkable in removing spots and stains from white goods—even ink, fruit, perspiration, rust, etc. Brings "yellowed" or "grayed" white goods back to original new whiteness.

INSTANT RIT

Tints or Dyes All fabrics. Any shade

Note: ALL RIT is INSTANT RIT whether so marked on package or not.

Now you can protect her lovely hair!

Millions of men and women know how Danderine helps stop falling hair and dissolves the worst crust of dandruff; how easily it changes dull, lustreless, brittle hair into hair that is soft, sparkling, vigorous.

With Danderine it is so easy to "train" a child's hair; to keep it orderly, sparkling, clean. Danderine accentuates the natural curl of a child's hair. A girl's "waves" look more natural when "set" with it. And they stay in longer.

Use Danderine with children to overcome the evils of frequent washing. It puts back into hair and scalp the natural oils removed by soap and water.

Danderine isn't sticky or oily; doesn't show. It is no trouble to use. Just put a little on the brush each time the hair is arranged. That will keep the scalp healthy and encourage the growth of long, silky and abundant hair. Five million bottles used a year is proof of Danderine's effectiveness.

WAR ON THE DUST MENACE

Three hundred and fifty million million particles of dust in your living room, and what to do about it?

Henry W. Banks, chemist of national reputation, who has just put in six months experimenting with the problems of dust in the home, is authority for these amazing figures.

No wonder the housewife's work is never done! Multiply three hundred and fifty million million particles of dust by the number of rooms in your house, and what have you? A figure incomprehensible!

Wood heating, huge industrial developments, heavy motor traffic—all have complicated the modern housekeeper's problem. As never before, she is aware of the necessity of cleanliness to health. She knows that many of the prevalent diseases are carried through dust-laden atmosphere.

Much dirt seeps in through doors and windows. More dust particles are brought home by members of the family on their clothing and footwear. It is, of course, impossible to keep dust and dirt entirely out of our homes. Much, however, can be done to minimize this very real menace to the family health.

A step toward cleanliness is to equip every window and door with weather stripping. Dust is a formidable enemy that manages to creep in through the smallest cracks. Do not attack dust with a broom. It will merely settle in your lungs, or on the walls and ceiling. A good vacuum cleaner with all its attachments will serve as a permanent trap. Drive dust out of its favorite ambush in radiator with a special brush for that purpose.

The favorite ally of dust is oil, so don't use an oily dustcloth, or an oily polish on the floors, woodwork, or furniture. Oil catches dust and holds it like a fly in a spider's net and must be literally rubbed away. But dust can be flicked off the wax surface with a duster or dry cloth.

Be sure that the wood is thoroughly cleaned, then rub with a prepared wax until there is a soft sating finish. The wax forms a hard polished surface which sheds dust readily. Floors, well waxed, can be kept free of dust by the daily use of a dry dust mop.

After you have used the mop and dry dust cloth, carry them carefully outdoors to be cleaned. Don't shake them where they may make an attack on your neighbor's entrenchments.

Remember that dust is a warrior of the old school of housekeeping. He thrived and prospered under the regime of the rug-beating and broom whisking days. You can rout him only with modern methods and modern equipments.

Refinishing Old Furniture

In refinishing old furniture do not forget that wax-polishing is not only the easiest, but also one of the oldest and best methods of finishing. It is customary to wax wood that has not been filled, but to which a coat or two of thin shellac has been applied to set the stain. Filled woods do not show the polish so advantageously. The wax finish will not show scratches to such an extent as varnish or French finish, and may be renewed in the simplest manner.

PUTTING FUN IN HOUSEKEEPING

Housekeeping today is not what grandmother found it to be. Then she not only had to struggle with brooms and mops but kitchen utensils generally were just as clumsy and hard to use. She could rise at four o'clock and slave until nine that night and still her work wasn't finished. She had no time for study or play with her family. Today daughter has at her command thousands of handy useful household devices that are inexpensive and easy to use. They leave the mother and wife time to improve mind and body and to play with the family while they are young and all together. These useful housekeeping devices also help in entertainment of guests. Following are a few suggestions both in things you should have in your kitchen equipment and ideas for parties:

Where it is possible, there should be electricity in the home, whether from the power plant at home or commercial lines. Electricity is the giant that has emancipated woman from slavery. Electricity properly placed and handled can do more for you than a dozen hired servants at less than one-tenth the cost.

Electric refrigeration has done away with the mess of ice delivery, spoiling of foods and unnecessary worry. The newest refrigerators are equipped with handy devices for labor saving, and for quick healthful meals. It is a good investment for any home, large or small. Electricity makes quick heat in winter and arctic breezes in torrid summer. It does the grinding, chopping, sweeping and cooking as well. There could hardly be a more faithful servant—ready day and night to do your bidding—never tired—never "ready to quit." If you do not now have this servant in your home—plan to have it as soon as possible.

Electric sweepers have been so materially improved the last few years you scarcely recognize them. Many say they cannot afford or do not want the many attachments that go with the electric sweeper; this is a mistaken idea because, if used at the proper moment, they make cleaning easier and more profitable. The old-fashioned method, broom and mop, is as out of date as the horse and buggy.

There are toasters that will deliver into your hand bread toasted to the "just right" shade on both sides. Irons that can be set to just the right heat for the material you are ironing. Automatic egg-boilers that will give each person the kind of egg they like. Then there are electric stoves in which one may put the whole dinner, set the dial as to temperatures, set the clock as to time, and go to a bridge party, club meeting, school course for adults, etc., with peace of mind, because there is no need to hurry home to cook dinner, no need to worry that you are depriving your family of healthful foods by your outside interests, because they are all there (the proper menu, well balanced) the stove, well-cooked and piping hot; the electric refrigerator, crisp and delicious. Isn't it all just that much fun? Aladdin's dream come true for his lady love! Woman using her head as well as her feet and hands. What fun it is to surprise your family or friends with a new recipe concocted by yourself or one suggested by the lecture at the club. What new thrills can be put into the old drudgery of household routine. What surprises and pleasure in store for all the family. What health for the family and new interest.

I know a woman who is one of the most popular of hostesses and is never left off the guest list. Her specialty is "after-theater and after-church" parties. They are the most successful I have ever attended and the freest from any suggestion of "hoohoo," garbling or rowdiness. To a few of her friends on each occasion she will say "Why not go home with

me and have a bite to eat?" Her most sought-after invitation is the after-evening church supper; they are an inspiration to us all. These parties just lend themselves to all that is lovely. She has no servants, but her parties are more successful than others I have attended where there were three or four servants. This woman has a grown son and daughter and often friends of the son and daughter join the mother's guests. I am told her home is the most popular place in the community.

This is the way she entertains: When friends get to the house they are invited to leave their wraps on a long lounge in the front room. Each one helps himself. If there is some new guest that has not been there before she shows this one special attention. We are all the invited into the large roomy kitchen (queer place to entertain, you say), yes and no is the answer, but if you could see HER kitchen you wouldn't wonder why she can entertain there. It is a work of art. The furnishings are simple, but they are lovely and airy (the old-fashioned kind); all cooking utensils, all serving dishes have a definite color scheme, as well as the rest of the room. Of course, you may have guessed by now that each person is a "helpful-selves" unit. Our hostess goes to work at once. Each guest is given something to do. What fun we have. Some one is making a crisp salad out of the lovely fruits and vegetables, kept so well in an electric refrigerator. Another is making waffles on the newest electric grill, while some one starts the radio in the front room, tuning it down to just the right clearness. Over there is someone toasting sandwiches on the electric toaster, while two other guests prepare them for serving. Scrambled eggs are cooked in the electric chafing dish. While all this is going on our hostess is general manager and also busies herself seeing that there are plenty of dishes and silver for the number of guests present. Everyone brings his or her offering to the long table where the dishes are. Then we form a line and serve ourselves, cafeteria style, with the hostess at the table urging us to take more. For those that want it, there is steaming coffee in a percolator, or iced water on tap at the refrigerator. Each one finds a place to sit and if you don't think it tastes good—just try it yourself. I forgot to tell you that after the guests remove their wraps each one is presented with an oilcloth apron that protects clothing and somehow magically breaks the formal ice and makes everybody "just kids again." Only where there are conveniences of modern design are such parties huge successes. They are easy to give, pleasure to attend and create a warm spirit of love and friendship. Try to have your old or new home the kind that will make your children anxious to bring their friends there.

Scientists Perfect Vegetable Reviver

The hydrator, which has the power to revive wilted vegetables and keep fresh ones in prime condition for many days at a time, is the latest achievement of scientists of the electrical refrigeration industry. It is a moist air compartment and makes it possible for the housewife to have two kinds of cold in her electrical refrigerator—moist, reviving cold for vegetables and the like, and dry cold for meats and similar perishables. Suspended from a refrigerator shelf, the hydrator also provides additional food storage space. Vegetables, washed and placed in the hydrator without being dried, retain their fresh-from-the-garden appearance for a longer time than heretofore was possible. Wilted vegetables regain lost moisture over night.

Besides restoring wilted vegetables and keeping fresh ones for longer periods of time, the hydrator will preserve sandwiches in their finest condition for a long time, enabling the hostess to prepare for parties far in advance, and always have a supply on hand for unexpected guests.

The Georgia Medical Association says:

"90% of typhoid

in rural districts is carried by flies"

When a child in your home comes down with typhoid fever, from which over 8,000 people die every year, the cause of this disease is probably the apparently harmless common house fly. He buzzes in when the screen door is open, lights for a moment on your dining room table, and may leave on your food a dangerous disease germ—for he carries 6 million germs on his hairy, furry body. What are you going to do about it?

Be comfortable and safe. Keep your home insect-free. Spray Flit, which is guaranteed (or money back) to be quick-death to flies, mosquitoes, moths, roaches, bedbugs and other household insects. Yet its clean-smelling vapor is harmless to humans.

Flit kills quicker if you use the special inexpensive Flit Sprayer. Insist on Flit and don't accept a substitute. Get yours today!

Flit is sold only in this yellow can with the black band.

THE STATE'S CASH

BALANCE

At the beginning of March there was cash to the credit of Texas amounting to \$19,693,643, according to the figures submitted at that time by the State Treasurer. This a few days. A sixty-foot bridge north of the main balance was more than \$7,000,000 less than that on the bridge also has been completed.

BRIDGES COMPLETED

The new bridge across the Pease river, near Vernon, close to St. James crossing, has been completed. The bridge has by this time been opened to traffic, or will be in by the State Treasurer. This a few days. A sixty-foot bridge north of the main balance was more than \$7,000,000 less than that on the bridge also has been completed.

THE FACE POWDER OF QUALITY

You'll Get Rid of
Blackheads Sure

There is one simple, safe and sure way
that never fails to get rid of blackheads,
that is to dissolve them.

To do this get two ounces of calomine
powder from any drug store—sprinkle a
little on a hot, wet cloth—rub over the
blackheads briskly—wash, the parts and
you will be surprised how the blackheads
have disappeared. Big blackheads, little
blackheads, no matter where they are,
simply dissolve and disappear. Black-
heads are a mixture of dirt and dirt
secretions that form in the pores of the
skin. The calomine powder and the wa-
ter dissolve the blackheads so they wash
right out, leaving the pores free and clean
and in their natural condition.—Adm.

Perfect
dyeing is so
easy!

DIAMOND DYES contain the
highest quality anilines that
money can buy. That's why they
give such clear, bright, new-look-
ing colors to dresses, drapes, lin-
gerie.

It's so easy to use Diamond Dyes
because they are so rich in pure
anilines. That's why they go on
smoothly, and evenly; never spot
or streak. That's the reason they
keep their depth and brilliance
through wear and washing.

Diamond Dyes are just 15c at all
drug stores. When perfect dyeing
costs no more—is so easy to do—
why experiment with makeshift
methods?

HOME PROBLEMS.

WAR ON THE DUST MENACE

Three hundred and fifty million million par-
ticles of dust in your living room, and what
to do about it?

Henry W. Banks, chemist of national repu-
tation, who has just put in six months ex-
perimenting with the problems of dust in the
home, is authority for these amazing figures.

No wonder the housewife's work is never
done! Multiply three hundred and fifty million
million particles of dust by the number of
rooms in your house, and what have you? A
figure incomprehensible!

Wood heating, huge industrial developments,
heavy motor traffic—all have complicated the
modern housekeeper's problem. As never be-
fore, she is aware of the necessity of cleanli-
ness to health. She knows that many of the
prevalent diseases are carried through dust-
laden atmosphere.

Much dirt seeps in through doors and win-
dows. More dust particles are brought home
by members of the family on their clothing
and footwear. It is, of course, impossible to
keep dust and dirt entirely out of our homes.
Much, however, can be done to minimize this
very real menace to the family health.

A step toward cleanliness is to equip every
window and door with weather stripping. Dust
is a formidable enemy that manages to creep
in through the smallest cracks. Do not attack
dust with a broom. It will merely settle in your
lungs, or on the walls and ceiling. A good
vacuum cleaner with all its attachments will
serve as a permanent trap. Drive dust out of
its favorite ambush in radiator with a special
brush for that purpose.

Housekeeping today is not what grand-
mother found it to be. Then she not only had
to struggle with brooms and mops but kitchen
utensils generally were just as clumsy and hard
to use. She could rise at four o'clock and slave
until nine that night and still her work wasn't
finished. She had no time for study or play
with her family. Today daughter has at her
command thousands of handy useful household
devices that are inexpensive and easy to use.
They leave the mother and wife time to im-
prove mind and body and to play with the
family while they are young and all together.
These useful housekeeping devices also help in
entertainment of guests. Following are a few
suggestions both in things you should have in
your kitchen equipment and ideas for parties:

Where it is possible, there should be elec-
tricity in the home, whether from the power
plant at home or commercial lines. Electricity
is the giant that has emancipated woman from
slavery. Electricity properly placed and han-
dled can do more for you than a dozen hired
servants at less than one-tenth the cost.

Electric refrigeration has done away with
the mess of ice delivery, spoiling of foods and
unnecessary worry. The newest refrigerators
are equipped with handy devices for labor
saving, and for quick healthful meals. It is a
good investment for any home, large or small.
Electricity makes quick heat in winter and
artificial breezes in torrid summer. It does the
grinding, chopping, sweeping and cooking as
well. There could hardly be a more faithful
servant—ready day and night to do your bid-
ding—never tired—never "ready to quit." If
you do not now have this servant in your
home—plan to have it as soon as possible.

Electric sweepers have been so materially
improved the last few years you scarcely re-
cognize them. Many say they cannot afford
or do not want the many attachments that
go with the electric sweeper; this is a mis-
taken idea because, if used at the proper mo-
ment, they make cleaning easier and more
profitable. The old-fashioned method, broom
and mop, is as out of date as the horse and
buggy.

There are toasters that will deliver into
your hand bread toasted to the "just right"
shade on both sides. Irons that can be set to
just the right heat for the material you are
ironing. Automatic egg-boilers that will give
each person the kind of egg they like. Then
there are electric stoves in which one may put
the whole dinner, set the dial as to tempera-
tures, set the clock as to time, and go to a
bridge party, club meeting, school course for
adults, etc., with peace of mind, because there
is no need to hurry home to cook dinner, no
need to worry that you are depriving your
family of healthful foods by your outside in-
terests, because they are all there (the proper
menu, well balanced) in the stove, well-cooked
and piping hot; the electric refrigerator, crisp
and delicious. Isn't it all just that much fun?
Aladdin's dream come true for his lady love!
Woman using her head as well as her feet
and hands. What fun it is to surprise your
family or friends with a new recipe concocted
by yourself or one suggested by the lecture
at the club. What new thrills can be put into
the old drudgery of household routine. What
surprises and pleasure in store for all the fam-
ily. What health for the family and new in-
terest.

I know a woman who is one of the most
popular of hostesses and is never left off the
guest list. Her specialty is "after-theater and
after-church" parties. They are the most suc-
cessful I have ever attended and the freest
from any suggestion of "hoorah" garbling or

occasion she will say "Why not go home with

Scientists Perfect Vegetable Reviver

The hydrator, which has the power to revive wilted vege-
tables and keep fresh ones in prime condition for many days
at a time, is the latest achievement of scientists of the elec-
trical refrigeration industry. It is a moist air compartment and
makes it possible for the housewife to have two kinds of cold
in her electrical refrigerator—moist, reviving cold for vege-
tables and the like, and dry cold for meats and similar per-
ishables. Suspended from a refrigerator shelf, the hydrator
also provides additional food storage space. Vegetables,
washed and placed in the hydrator without being dried,
retain their fresh-from-the-garden appearance for
a longer time than heretofore was pos-
sible. Wilted vege-
tables regain lost
moisture over night.

Besides restoring
wilted vegetables and
keeping fresh ones
for longer periods
of time, the hy-
drator will preserve
sandwiches in their
finest condition for
a long time, enab-
ling the hostess to
to prepare for par-
ties far in advance,
and always have a
supply on hand for
unexpected guests.

The favorite ally of dust is oil, so don't use
an oily dustcloth, or an oily polish on the
floors, woodwork, or furniture. Oil catches
dust and holds it like a fly in a spider's net
and must be literally rubbed away. But dust
can be flicked off the wax surface with a
duster or dry cloth.

Be sure that the wood is thoroughly cleaned,
then rub with a prepared wax until there is a
soft sating finish. The wax forms a hard pol-
ished surface which sheds dust readily. Floors,
well waxed, can be kept free of dust by the
daily use of a dry dust mop.

After you have used the mop and dry dust
cloth, carry them carefully outdoors to be
cleaned. Don't shake them where they may
make an attack on your neighbor's entrench-
ments.

Remember that dust is a warrior of the old
school of housekeeping. He thrived and pros-
pered under the regime of the rug-beating
and broom whisking days. You can rout him
only with modern methods and modern equip-
ments.

Refinishing Old Furniture

In refinishing old furniture do not forget
that wax-polishing is not only the easiest, but
also one of the oldest and best methods of fin-
ishing. It is customary to wax wood that has
not been filled, but to which a coat or two of
thin shellac has been applied to set the stain.
Filled woods do not show the polish so advan-
tageously. The wax finish will not show
scratches to such an extent as varnish or
French finish, and may be renewed in the
simplest manner.

PUTTING FUN IN HOUSEKEEPING

me and have a bite to eat?" Her most sought-
after invitation is the after-evening church
suppers; they are an inspiration to us all.
These parties just lend themselves to all that
is lovely. She has no servants, but her parties
are more successful than others I have attend-
ed where there were three or four servants.
This woman has a grown son and daughter
and often friends of the son and daughter join
